

One-way flow control valve VFOH

FESTO

Characteristics

At a glance

Corrosion-resistant shut-off/flow control valve. External hexagon head as actuating element.

- Easy-to-clean housing (clean design)
- Can be rotated horizontally through 360° when mounted

Function

[E] One-way flow control valve for exhaust air

The speed can be adjusted using exhaust air flow control. Free flowing supply air and throttled exhaust air ensure that the piston moves between the air cushions. This improves motion, even when the load changes.

Adjusting component

[A] External hex

The exhaust air one-way flow control function can be adjusted using a hexagon head.
