

Solenoid valves CDSV, Clean Design

Solenoid valves CDSV, Clean Design

Key features

FESTO

Innovative

Proven valve technology combined with a highly resistant polymer material.

Versatile

- 1 valve position
- 2 solenoid coils
- Flow rate 300 ... 650 l/min
- Valve width 24 mm
- Connected via 10 m PVC cable

Reliable

Developed with practical considerations in mind

- Hygienic
- Corrosion resistant

- Easy to clean
- External pilot air
- Ducted venting hole

Solenoid valves CDSV, Clean Design

Key features

FESTO

CDSV and CDVI – The requirements

The food industry has higher hygiene requirements than any other sector, which means there is no room for compromises when it comes to ease of cleaning and resistance to corrosion.

The result: CDSV and MPA-C. Developed in close consultation with trendsetters from the food and packaging industry, the CDSV and CDVI represent a totally new valve and valve terminal solution for splash zones. The Clean Design valves have a revolutionary corrosion-resistant design that sets them apart from their competitors and scores them top marks for ease of cleaning.

CDSV and MPA-C – The solution

The new Clean Design valves - a clean solution

As well as reduced cleaning times, the CDSV and MPA-C also take less time to install and assemble. Stainless steel control cabinets have become a thing of the past and the electrical connection is now established using the pre-assembled, ready-to-connect cable.

The individual sub-base includes all supply ports and common exhausts.

Valve terminal MPA-C

The valve terminal MPA-C provides up to 32 valve positions with a maximum of 32 solenoid coils.

Further information

➔ Internet: mpac

Clean in theory and practice – CDSV

The requirements for the hygienic design of machine components to DIN EN 1672-2 and DIN ISO 14 159 have been implemented.

Easy to clean thanks to:

- no sharp edges
- no small radii
- no crevices where dirt can gather
- space between the valves for easy cleaning
- corrosion-resistant materials

The Clean Design valve CDSV can be cleaned using sector-specific cleaning agents that are compatible with aluminium, available from the following manufacturers:

- Henkel
- Ecolab
- Johnson Diversey
- Kärcher

Solenoid valves CDSV, Clean Design

Key features – Pneumatic components

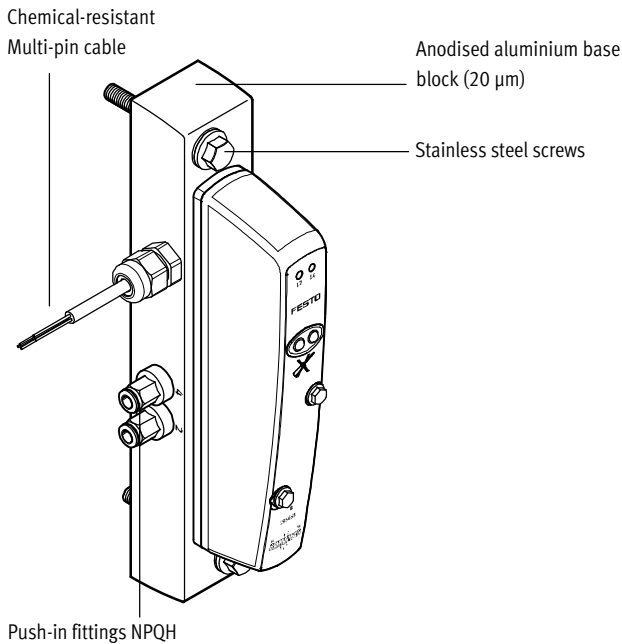

Range of services

The CDSV supports the following valve types:

- 5/2-way valve, single solenoid
- 5/2-way valve, double solenoid
- 5/3-way valve, mid-position pressurised
- 5/3-way valve, mid-position exhausted
- 5/3-way valve, mid-position closed
- 3/2-way valve, single solenoid, normally closed
- 3/2-way valve, single solenoid, normally open
- 2x 3/2-way valve, single solenoid, normally closed
- 2x 3/2-way valve, single solenoid, normally open
- 2x 3/2-way valve, single solenoid, 1x normally open, 1x normally closed
- 2/2-way valve, single solenoid, normally closed
- 2/2-way valve, single solenoid, normally open

Individual sub-base

The CDSV has a connection for external pilot air supply, is pre-assembled with a 10 m PVC cable and is fully inspected before shipment.

Mounting

The CDSV can be mounted in any position. However, it should be mounted in such a way that dirt can be cleaned off and cleaning agent can drain off.

Pressure compensation

The exhaust air from the pilot solenoid coils of the valves is collected and drawn off via the pressure compensation hole on the right-hand side.

The ideal range for the food industry

Choose from

- a wide range of actuators in corrosion-resistant designs that are easy to clean,
 - as well as valves,
 - stainless steel fittings and flow control valves and
 - tubing approved for use in the food industry.
- All have been tested using cleaning agents from leading manufacturers.

Solenoid valves CDSV, Clean Design

Peripherals overview

Overview – Individual Clean Design valve

	Brief description	→ Page/Internet	
1	Mounting screw	Mounting from above or below	–
2	Sub-base for individual valve	–	14
3	Individual electrical connection	–	–
4	Push-in fitting	For working ports	15
5	Push-in fitting	For pilot air supply and exhaust, venting hole	15
6	Push-in fitting	For compressed air supply and exhaust	15
7	Valve	–	14
8	LED display	–	–
9	Manual override	For each solenoid coil, non-detenting	–

The individual sub-base CDSV has a connection for external pilot air supply, is pre-assembled with a 10 m PVC cable and is fully inspected

before shipment. The exhaust air from the pilot solenoid coils of the valves is collected and drawn off via the pressure

compensation hole (venting hole) on the rear side.

 - Note
All ports and mounting holes that are not required must be sealed with blanking plugs. Exception: venting hole

Solenoid valves CDSV, Clean Design

Key features – Pneumatic components

Valves			
	Code	Circuit symbol	Description
	R		2/2-way valve, single solenoid <ul style="list-style-type: none"> • Normally closed • Pneumatic spring return • Suitable for vacuum • External supply air
	S		2/2-way valve, single solenoid <ul style="list-style-type: none"> • Normally open • Pneumatic spring return • Suitable for vacuum • External supply air
	X		3/2-way valve, single solenoid <ul style="list-style-type: none"> • Normally closed • Pneumatic spring return • Suitable for vacuum • External supply air
	W		3/2-way valve, single solenoid <ul style="list-style-type: none"> • Normally open • Pneumatic spring return • Suitable for vacuum • External supply air
	K		2x 3/2-way valve, single solenoid <ul style="list-style-type: none"> • Normally closed • Pneumatic spring return • Not suitable for vacuum
	N		2x 3/2-way valve, single solenoid <ul style="list-style-type: none"> • Normally open • Pneumatic spring return • Not suitable for vacuum
	H		2x 3/2-way valve, single solenoid <ul style="list-style-type: none"> • 1x normally closed, 1x normally open • Pneumatic spring return • Not suitable for vacuum

Note

A filter must be installed upstream of valves operated in vacuum mode. This prevents any foreign matter in the intake air getting into the valve (e.g. when operating a suction cup).

Solenoid valves CDSV, Clean Design

Key features – Pneumatic components

Valves and cover		Code	Circuit symbol	Description
	M		5/2-way valve, single solenoid <ul style="list-style-type: none"> • Pneumatic spring return • Suitable for vacuum 	
	J		5/2-way valve, double solenoid <ul style="list-style-type: none"> • Suitable for vacuum 	
	G		5/3-way valve <ul style="list-style-type: none"> • Mid-position closed • Mechanical spring return • The piston-rod side of a cylinder remains held under pressure when the valve is in the normal position • Suitable for vacuum 	
	B		5/3-way valve <ul style="list-style-type: none"> • Mid-position pressurised • Mechanical spring return • The piston rod of a connected cylinder advances when the valve is in the normal position due to the different surface areas of the piston • Suitable for vacuum 	
	E		5/3-way valve <ul style="list-style-type: none"> • Mid-position exhausted • Mechanical spring return • The piston rod can be moved freely in the normal valve position • Suitable for vacuum 	

Solenoid valves CDSV, Clean Design

Key features – Pneumatic components

Assembly

- 1 Hole for front mounting using M6 screws; if not required, the hole can be covered with blanking plug G $\frac{1}{8}$
- 2 Hole for rear mounting using M6 screws

Manual override (MO)

MO with automatic return (non-detenting)

- 1 Press in the stem of the manual override with a pointed object. Valve is in switching position.

- 2 Remove the pointed object. The mechanical force pushes the stem of the manual override back. The valve returns to its normal position (not in the case of 5/2-way double solenoid valve, code J).

Display and control elements

- 1 Yellow LEDs (one per solenoid coil)
- 2 Non-detenting manual override (per solenoid coil)

Solenoid valves CDSV, Clean Design

Key features – Pneumatic components

Connecting components

- 1 Pilot air supply port 12/14
- 2 Pilot exhaust port 82/84
- 3 Pressure compensation port/
venting hole
- 4 Electrical connection
- 5 Working port 4
- 6 Working port 2
- 7 Exhaust port 3/5
- 8 Supply port 1

Electrical power as a result of current reduction

Each solenoid coil is protected with a spark arresting protective circuit as well as against polarity reversal. All valve types are also equipped with

integrated current reduction. Advantages:

- Lower power consumption
- Lower temperature rise

Terminal allocation – Cable for individual sub-base

Wire colour	Allocation
Brown	Solenoid coil 14
Black	Solenoid coil 12 (not on 5/2-way single solenoid valve)
Blue	com ¹⁾

1) 0 V for positive switching valves; 24 V can be connected for negative switching control signals
