

Mechanically actuated valves, NPT

FESTO

Key features

Innovative

- Small and compact for a wide range of pneumatic applications
- Numerous selectable valve functions: 3/2-way and 5/2-way functions
- Flow rates up to 1200 l/min
- Outstanding pneumatic performance for a wide range of applications
- Light weight
- Minimal actuating forces

Versatile

- Flexibility of the pneumatic working ports provides a practical solution to different requirements
- Round silencer for ducted exhaust air
- Suitable for vacuum in some cases
- Reverse operation possible in some cases
- Actuation: direct and piloted
- Available pressure range from vacuum to 10 bar.
- Design:
 - Stem actuated valve
 - Roller lever valve
 - Roller lever valve with idle return

Reliable

- Durable thanks to tried-and-tested piston spool valves and poppet valves
- Sturdy thanks to metal housing and connecting thread or connector

Easy to install

- Mounted via through-holes (stem actuated valves are also suitable for front panel mounting)
- Can be precisely adjusted using mounting kit

Key features

- [1] Stem as actuator
- [2] Practical connection: via threaded connection or connector
- [3] Fast mounting: screwed directly via through-hole, front panel mounting possible

Equipment options

3/2-way valve, monostable

- Normally open/closed
- Mechanical spring
- Vacuum operation possible

- Directly controlled and pneumatically piloted
- Reversible
- Ducted exhaust air

5/2-way valve, monostable

- Pneumatic spring/mechanical spring
- Vacuum operation possible

- Reversible in some cases
- Pneumatically piloted
- Ducted exhaust air

Key features – Pneumatic components

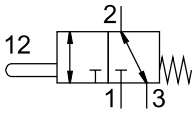

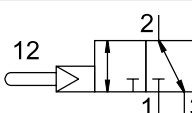

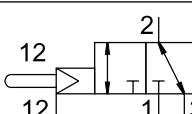

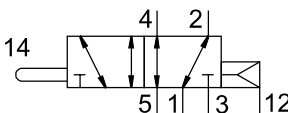

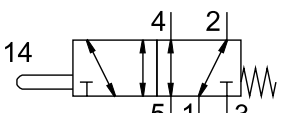

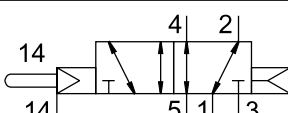

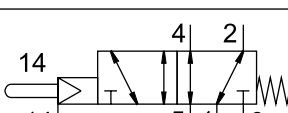

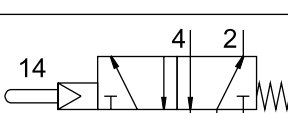

Mechanically actuated valves

Mechanically actuated valves are often used as "signal valves", and return a pneumatic signal to the controller. This signal, e.g. "end position reached", is transmitted via a stem or roller actuated valve.

This application sounds simple; it is used in smaller machines and in conveyor systems, e.g. to control simple clamping and locking processes in semi-automatic assembly and manufacturing.

Benefits of mechanically actuated valves:

- No expensive programming
- Easy to set up and connect
- No electronic controller required
- Can be controlled and measured using sensors

<p>The circuit symbol shows a roller lever actuator (14) on the left. The valve has five ports: 4 (top left), 2 (top right), 5 (bottom left), 1 (bottom center), and 3 (bottom right). A spring symbol is connected to port 2, indicating a normally closed position (4 → 2) and a normally open position (5 → 2).</p>	VMEF-K-M52-M-...	5/2-way valve, monostable <ul style="list-style-type: none"> • Mechanical spring return • Directly actuated • Suitable for vacuum • Reversible

**Note**

A filter must be installed upstream of valves operated in vacuum mode. This prevents any foreign matter in the intake air getting into the valve (e.g. when operating a suction cup with connector).

Type codes

Directly actuated stem actuated valves VMEFS-... can be extended with the actuator attachment VAOM-R4-20-... to form a roller lever valve or roller lever valve with idle return. Actuator attachments are available for 3/2-way and 5/2-way valves.

→ Page 25

The valve can be moved in the actuation direction with the mounting kit VAME-R4-20-PA. This enables the correct switching point to be set. → Page 29

 **Note**

- When screwing the actuator attachment VAOM-R4-20-... onto the valve, ensure that the prescribed torque of 1.5 Nm ± 10% is observed.
- An actuator attachment VAOM-R4-20-... can only be mounted on a basic valve three times.

VMEF-R-M52-...N14	62.1	34.5	36.2	24.3					48.3	25.9	48.3	70.8		

If required, actuator attachments VAOM-R4-20-... can be used as spare parts for existing directly actuated roller lever valves. → Page 25

The valve can be moved in the actuation direction with the mounting kit VAME-R4-20-PA. This enables the correct switching point to be set. → Page 29

Note

When screwing the actuator attachment VAOM-R4-20-... onto the valve, ensure that the prescribed torque of 1.5 Nm ± 10% is observed.

**General technical data**

Design	Roller lever with idle return	
Width [mm]	20	
Type of control	Directly actuated	
Application information	Risk of pinching	
Actuation type	Mechanical	
Mounting	Via through-hole	
Sealing principle	Soft	
Flow direction	Reversible	
Mounting position	Any	
Max. switching frequency [Hz]	3	
Max. actuating speed for side actuation [m/s]	0.7	
Cam angle in angular degrees	30	

Technical data – Poppet valve

Type	VMEF-KT-M32...18	VMEF-KT-M32...14
Design	Poppet valve	
Standard nominal flow rate 1 → 2 [l/min]	750	870
Valve function	3/2-way valve, monostable	
Overlap	Zero overlap	
Reset method	Mechanical spring	
Pneumatic connection 1, 2, 3	1/8 NPT	1/4 NPT
Nominal width [mm]	5.6	6
Max. stroke limit (hard) [mm]	11	
Actuating force [N]	32.7	

Technical data – Piston spool valve

Type	VMEF-K-M52-M...18	VMEF-K-M52-M...14
Design	Piston spool valve	
Standard nominal flow rate 1 → 2 [l/min]	750	1200
Valve function	5/2-way valve, monostable	
Overlap	Positive overlap	
Reset method	Mechanical spring	
Pneumatic connection 1, 2, 3	1/8 NPT	1/4 NPT
Nominal width [mm]	5.2	7
Max. stroke limit (hard) [mm]	11.8	
Actuating force [N]	23.5	

Datasheet – Roller lever valve

Materials	
Housing	Anodised wrought aluminium alloy
Cover	Reinforced PA (VMEF...-M52-)
Actuator attachment	Galvanised steel
Seal	NBR
Note on materials	RoHS-compliant
PWIS conformity	VDMA24364-B1/B2-L

Operating and environmental conditions	
Operating medium	Compressed air to ISO 8573-1:2010 [7:-:-]
Note on the operating/pilot medium	Lubricated operation possible (in which case lubricated operation will always be required)
Operating pressure	[MPa] -0.095 ... 1
	[bar] -0.95 ... 10
Temperature of medium	[°C] -10 ... +60
Ambient temperature	[°C] -10 ... +60
Note on ambient temperature	Influence of heat on wear
Corrosion resistance class CRC ¹⁾	1

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, or parts which are covered in the application (e.g. drive trunnions).

Datasheet – Actuator attachments

Actuator attachments as replacement or extension option for stem actuated valves:

- Roller lever
- Roller lever with idle return

General technical data		VAOM-R4-20-D1-...	VAOM-R4-20-D2-...
Type		Roller lever	Roller lever with idle return
Design		Roller lever	Roller lever with idle return
Width	[mm]	20	
Type of control		Directly actuated	
Actuation		Mechanical	
Mounting position		Screwed onto valve, in the movement plane	
Mounting		Screwed with self-tapping screws	
Ambient temperature	[°C]	-10 ... +60	
Materials			
Actuator attachment		Galvanised steel	
Note on materials		RoHS-compliant	
Corrosion resistance class CRC ¹⁾		1	

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, or parts which are covered in the application (e.g. drive trunnions).

Actuator attachments for valves

Stem actuated valves from the series VMEF can be retrofitted with the actuator attachments VAOM.

If an actuator attachment VAOM is screwed onto the corresponding stem actuated valve of the VMEF series, it converts it to a roller lever valve or roller lever valve with idle return.

- Roller lever valves can be actuated by a cam from either side, i.e. from the left (forward movement) or from the right (backward movement).
- Roller lever valves with idle return can only be actuated by a cam from one side, i.e. only in one direction (forward movement). If the actuation is applied from the other direction (backward movement), the valve is not actuated.

The actuator attachments VAOM can also be used to replace mechanically worn attachments for roller lever valves or roller lever valves with idle return.
