

Compact cylinder CDC, to ISO 21287, clean design

FESTO

Key features

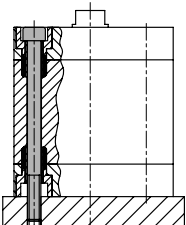

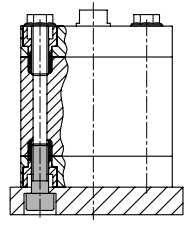

Design	Easy to clean	Easy to install	Flexible
<ul style="list-style-type: none"> The cylinder series CDC (Clean Design Compact) provides an easy-to-clean, compact cylinder variant for the modular system ADN It is based on ISO 21287 for compact cylinders, and is characterised by short strokes and a compact design, just like compact cylinder ADN Space savings of up to 50% compared with standard ISO 15552 The compact cylinder CDC is designed as a double-acting pneumatic cylinder with piston, piston rod and profile barrel 	<ul style="list-style-type: none"> Clean design means smooth surfaces without grooves and edges, making it difficult for dirt to accumulate For hygiene reasons, the threads on the cylinder caps should be sealed with suitable cover screws Resistant to conventional cleaning agents Increased corrosion protection 	<ul style="list-style-type: none"> Comprehensive range of mounting accessories for just about every type of installation Contactless position sensing via proximity switches 	<ul style="list-style-type: none"> The variants can be configured according to individual needs using a modular product system Excellent flexibility thanks to a wide range of variants
