

Operator unit CDSV

FESTO

Characteristics

At a glance

The operating panel CDSV is used to operate and display the measured values of the mass flow controller VEFC. It clearly displays the digitalised mass flow rate on a blue, inverse LCD display, which ensures good legibility even in different lighting conditions. Operating the device and parameterising the mass flow controller VEFC is simple and intuitive using three separate setting buttons, which can be used to make the required settings directly on the device.

Type code

001	Series
CDSV	Operator unit CDSV

002	Allocation
P20	Version P20

003	Device version
A	Standard version

Datasheet

General technical data

Operator controls	3 keys
Display type	Illuminated LCD
Ready status indication	Through backlighting
Status indication	Blue LED = normal status Red LED = malfunction
Product weight	21 g

Electrical data

Plug CDSV, pin allocation:

- Pin 1: Operating voltage: +24 V DC
- Pin 2: Communication
- Pin 3: unassigned, no connection
- Pin 4: 0 V DC

Operational voltage range DC	15 ... 30 V
Nominal operating voltage DC	24 V
Current consumption at nominal operating voltage	Electronics: ≤ 100 mA
Electrical power consumption	0.5 W
Max. current consumption	20 mA
Max. cable length	3 m

Operating and environmental conditions

Ambient temperature	0 ... 50°C
Storage temperature	-20 ... 80°C
Relative air humidity	0 - 85%
Nominal altitude of use	≤ 2000 m NHN
Cleanroom class	Class 4 according to ISO 14644-1
Reverse polarity protection	For all electrical connections
Overload protection	Available
Suitability for the production of Li-ion batteries	Suitable for battery production with reduced Cu/Zn/Ni values (F1a)
Degree of protection	IP40
Protection class	III
KC mark	KC-EMV

Materials

Material housing	PA-reinforced
Note on materials	RoHS-compliant
LABS (PWIS) conformity	VDMA24364-B1/B2-L

Dimensions

Dimensions – Operator unit CDSV
