

Optoelectronic sensor S00D

FESTO

Characteristics

At a glance

The optoelectronic sensors S00D are the perfect solution for a wide variety of object detection tasks, even in very confined application environments. They are faster and more cost-effective than ever thanks to an integrated concept with standardised sensor functions and reusable mounting configurations.

Sensor function

[BS] Diffuse sensor with background suppression

Sensing is done via optical triangulation. Object detection is therefore virtually independent of other objects in the background as well as colour, size or surface. Only minimal remission is required for these sensors.

Advantages of diffuse reflection sensors with background suppression:

- Switching distance, virtually independent of colour and surface
- Can also be used with a shiny or reflective background

[TB] Through-beam sensor, transmitter/receiver

In the case of the through-beam sensor, the transmitter and receiver are located in different housings and must be installed opposite one another. Any object that interrupts the light beam between the transmitter and receiver will be detected. This is one of the most reliable principles in harsh ambient conditions. The disadvantage is that two separate components (transmitter and receiver) have to be wired and set up.

[RS] Retro-reflective sensor

The light transmitted is bounced back to the receiver by a reflector. Objects located between the sensor and the reflector interrupt the light beam and are therefore detected. All Festo retro-reflective sensors use polarised light to prevent problems from occurring with reflective objects.

Characteristics

Type of light

[L]	Laser red	[R]	Red
-----	-----------	-----	-----

S00D sensors comply with laser safety class 1 according to EN 60825-1:2007. Devices from laser safety class 1 are safe due to their radiation level; these devices do not pose a threat to humans. Eye protection is not required when handling these devices.

Electrical output 1

[S]	PNP or NPN
-----	------------

Working range

[30]	30 mm	[50]	50 mm
[80]	80 mm

Datasheet

General technical data – Diffuse sensor with background suppression, laser HGA

Design	Block design
Conforms to standard	EN 60947-5-2
Approval	RCM trademark, c UL us - Recognized (OL)
CE mark (see declaration of conformity)	To EU EMC Directive, In accordance with EU RoHS Directive
UKCA marking (see declaration of conformity)	To UK instructions for EMC, To UK RoHS instructions
Certificate issuing authority	UL E232949
Note on materials	RoHS-compliant
LABS (PWIS) conformity	VDMA24364 zone III

Input signal, measuring element diffuse sensor with background suppression

Operating distance	15 ... 80 mm	1 ... 30 mm	3 ... 50 mm
Min. object diameter	5 mm	2 mm	3.5 mm
Max. light spot	5 mm at a sensing range of 80 mm	2 mm at a sensing range of 30 mm	3.5 mm at a sensing range of 50 mm
Max. black-white difference	20%	7%	15%
Hysteresis	2.4 mm	0.3 mm	0.5 mm
Reference material	Standard white 90%, 100x100 mm		
Detection method	Diffuse sensor with background clipping		
Measuring principle	Optoelectronic		
Type of light	Red, LED		
Ambient temperature	-25 ... 60°C		

Switching output diffuse sensor with background suppression

Switching output	Push-pull
Switching element function	PNP, light switching, NPN, dark switching
Max. switching frequency	800 Hz
Max. output current	50 mA
Voltage drop	0 ... 1.5 V

Electronics – Diffuse sensor with background suppression

Operational voltage range DC	10 V, 30 V
Residual ripple	10%
No-load supply current	10 mA
Reverse polarity protection	For all electrical connections
Short circuit current rating	Pulsed

Datasheet

Electromechanics – Diffuse sensor with background suppression

Electrical connection 1, function	Switching output, Power supply
Electrical connection 1, connection type	Cable with plug
Electrical connection 1, connector system	M8x1, A-coded, to EN 61076-2-104
Electrical connection 1, number of connections/cores	3
Electrical connection 1, type of mounting	Screw-type lock, size 9 mm A/F, Rotatable
Electrical connection 1, compatible type of mounting	Compatible with rotatable/non-rotatable screw-type lock
Material electrical contact	Gold-plated brass
Cable length	150 mm
Cable characteristic	Standard
Material cable sheath	TPE-U(PUR)

Mechanics – Diffuse sensor with background suppression

Type of mounting	With through-hole
Tightening torque	0.5 Nm
Mounting position	optional
Product weight	10 g
Material housing	ABS, PC, TPE-U(PU)

Display, operation diffuse sensor with background suppression

Ready status indication	Green LED
Switching status indication	Yellow LED

Immission, emission diffuse sensor with background suppression

Insulation voltage	500 V
Immunity to surge	1 kV
Corrosion resistance class CRC ¹⁾	1 - Low corrosion stress
Pollution degree	3
