## Swivel/linear unit DSL-40- -270-CC-A-S20-KF-B Part number: 556772

**FESTO** 

## **Data sheet**

| Feature                                                      | Value                                                                                      |
|--------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| Cushioning angle                                             | 16 deg                                                                                     |
| Rotation angle adjustment range                              | 0 deg240 deg                                                                               |
| Stroke                                                       | 10 mm160 mm                                                                                |
| Piston diameter                                              | 40 mm                                                                                      |
| Swivel angle                                                 | 0 deg240 deg                                                                               |
| Cushioning                                                   | Shock absorber at both ends<br>Elastic cushioning rings/plates at both ends                |
| Mounting position                                            | optional                                                                                   |
| Fine adjustment                                              | -3 deg                                                                                     |
| Mode of operation                                            | Double-acting                                                                              |
| Design                                                       | Vane                                                                                       |
| Position detection                                           | Via proximity switch                                                                       |
| Variants                                                     | Through, hollow piston rod                                                                 |
| Protection against torque/guide                              | Via ball bearings                                                                          |
| Operating pressure                                           | 2.5 bar8 bar                                                                               |
| Max. impact speed                                            | 500 mm/s                                                                                   |
| Max. swivel frequency at 0.6 MPa (6 bar, 87 psi)             | 0.7 Hz                                                                                     |
| Rotary angle backlash                                        | 0.05 deg                                                                                   |
| Repetition accuracy                                          | 0.1 deg                                                                                    |
| Operating medium                                             | Compressed air to ISO 8573-1:2010 [7:4:4]                                                  |
| Note on operating and pilot medium                           | Lubricated operation possible (in which case lubricated operation will always be required) |
| Corrosion resistance class CRC                               | 1 - Low corrosion stress                                                                   |
| LABS (PWIS) conformity                                       | VDMA24364-B2-L                                                                             |
| Ambient temperature                                          | -10 °C60 °C                                                                                |
| Dynamic load torque                                          | 5.4 Nm                                                                                     |
| Theoretical force at 0.6 MPa (6 bar, 87 psi), return stroke  | 495 N                                                                                      |
| Theoretical force at 0.6 MPa (6 bar, 87 psi), advance stroke | 603 N                                                                                      |
| Theoretical torque at 0.6 MPa (6 bar, 87 psi)                | 20 Nm                                                                                      |
| Permissible mass moment of inertia                           | 0.004 kgm²                                                                                 |
| Product weight                                               | 5350 g                                                                                     |
| Basic weight for 0 mm stroke                                 | 5350 g                                                                                     |

| Feature                            | Value                                           |
|------------------------------------|-------------------------------------------------|
| Additional weight per 10 mm stroke | 175 g                                           |
| Type of mounting                   | Clamped in T-slot<br>Via male thread<br>Either: |
| Pneumatic connection               | G1/8                                            |
| Material cover                     | Wrought aluminium alloy<br>Anodised             |
| Material seals                     | TPE-U(PU)                                       |
| Material housing                   | Aluminium<br>Smooth anodised                    |
| Material piston rod                | Tempered steel                                  |
