## Swivel/linear unit DSL-40-125-270-P-S20-CC

Part number: 175910

For proximity sensing. Rotary and linear movement can be actuated simultaneously or independently of one another. Rotary movement of 0° - 270° infinitely adjustable.

The maximum rotary angle play at the piston rod is  $2^{\circ}$ . When mounting additional components on the drive shaft, never exceed the maximum permitted tightening torque of 48.4 in lb / 5.5 Nm.

## **Data sheet**

| Feature                                    | Value                                            |
|--------------------------------------------|--------------------------------------------------|
| Cushioning angle                           | 15 deg                                           |
| Rotation angle adjustment range            | 270 deg                                          |
| Stroke                                     | 125 mm                                           |
| Piston diameter                            | 40 mm                                            |
| Swivel angle                               | 240 deg                                          |
| Cushioning                                 | CC: Shock absorber at both ends                  |
|                                            | P: Flexible cushioning rings/plates at both ends |
| Assembly position                          | Any                                              |
| Fine adjustment                            | 1.5 deg                                          |
| Mode of operation                          | double-acting                                    |
| Design structure                           | Rotary vane                                      |
| Position detection                         | For inductive sensors                            |
|                                            | For proximity sensor                             |
| Variants                                   | S20: through, hollow piston rod                  |
| Protection against torque/guide            | with plain-bearing guide                         |
| Operating pressure                         | 2.5 8 bar                                        |
| Max. impact speed                          | 500 mm/s                                         |
| Max. swivel frequency at 6 bar             | 0.7 Hz                                           |
| Operating medium                           | Dried compressed air, lubricated or unlubricated |
| Ambient temperature                        | -10 60 °C                                        |
| Cushioning length                          | 12 mm                                            |
| Torque at 6 bar                            | 20 Nm                                            |
| Theoretical force at 6 bar, return stroke  | 495 N                                            |
| Theoretical force at 6 bar, advance stroke | 660 N                                            |
| Permissible mass moment of inertia         | 0.004 kgm2                                       |
| Additional weight per 10 mm stroke         | 170 g                                            |
| Basic weight for 0 mm stroke               | 5,200 g                                          |
| Product weight                             | 5,200 g                                          |
| Mounting type                              | Clamped in T-slot                                |
|                                            | with external (male) thread                      |
|                                            | Optional                                         |
| Pneumatic connection                       | G1/8                                             |
| Materials information for cover            | Wrought Aluminum alloy                           |
|                                            | Anodized                                         |
| Materials information for seals            | TPE-U(PU)                                        |
| Materials information, housing             | Wrought Aluminum alloy                           |
|                                            | Smooth anodized                                  |
| Materials information for piston rod       | Heat-treatment steel                             |
