

- Any combination of suction cup holder and suction cup is possible in the same holder size
- 15 different suction cup diameters from 2-200 mm
- 6 different suction cup materials
- 6 different suction cup designs
- 14 different suction cup holders

## Product overview

Suction gripper and suction cup

Festo vacuum suction grippers offer outstanding functionality and quality.

An extensive range of modular suction cups in different shapes, materials and sizes, plus a wide selection of suction cup holders, angle and height compensators and filters within the

modular suction gripper system, provide users with a huge range of possible combinations for a wide variety of applications.

## Suction gripper ESG

→ 6 / 2.1-6

Modular products with over 2000 variants

- The ideal solution for the transport of workpieces of different weights, surfaces and shapes
- Choose from:
  - 15 suction cup diameters
  - 5 different materials – including antistatic types
  - 5 suction cup shapes
  - Various suction cup holders
  - Optional accessories (filters and angle compensators)

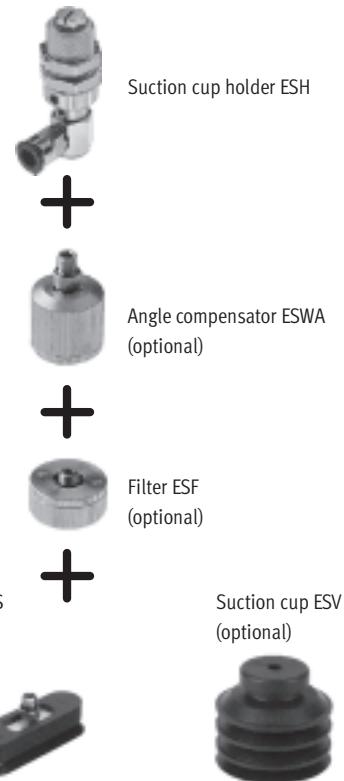

- Wide range of variants
- A suitable solution for every task
- Wide range to suit applications with various temperature ranges and workpiece surfaces
- Suction cups made from silicone are approved for use in the food industry

Suction grippers as a complete solution

Suction grippers made from individual components

# Suction grippers

FESTO

Key features

## Suction cups VAS/VASB

→ 6 / 2.1-76

Sturdy and reliable

- The ideal solution for the transport of workpieces of different weights, surfaces and shapes
- Choose from:
  - 12 suction cup diameters
  - 2 suction cup shapes: round and bellows design
  - 3 suction cup materials: nitrile rubber, polyurethane and silicone for use in a wide variety of applications

- Wide range to suit applications with various temperature ranges and workpiece surfaces
- Suction cups made from silicone are approved for use in the food industry
- All tubing connector sizes correspond to a holder size

Suction grippers

2.1

# Suction grippers

Key features

## At a glance

The Festo suction gripper range offers a wide variety of possible combinations with a modular product system containing more than 2000 variants.

Choose from:

- 2 suction cup shapes:
  - Round, 15 different diameters
  - Oval, 11 different diameters
- 6 suction cup designs
- 6 different suction cup materials
- Various suction cup holders:
  - With and without height compensators
  - With different tubing connectors: Push-in fitting, barbed fitting, or threaded
- Optional accessories: Filters and angle compensators

Even extremely small workpieces, e.g. in the electronics industry, can be accurately and gently transported. Additionally, all components included in the modular range are easily and quickly interchangeable in the event that requirements change. Suction grippers can be ordered complete, or as individual components.

**Cost savings thanks to:**

- Modular range
- The handy suction cup can be replaced easily (wearing part)
- Reduced warehousing
- Long service life
- Low investment costs
- Large range – including industry-related solutions

## The complete solution

The suction gripper ESG comes already assembled to meet your specific requirements and is ready to use.

The suction cup shape and dimensions together form a part number. You can then expand this part number to form a personalised type code by adding your own choice of suction cup material, holder type, tubing connector and accessories.

Your benefits:  
With just one part number and type code you can order your own complete suction gripper system.

## The individual components

If, for instance, you have to handle a different workpiece surface finish, all you need to do is add the right suction cup.

Your benefits:  
By adding individual components you can create new areas of application for your suction gripper ESG.

### Suction cup holder ESH

6 / 2.1-32

The area of application determines which is the right suction cup holder to use.

The suction cup or accessories are attached directly to the suction cup holder.

- 6 holder sizes
- 8 holder types
- 3 tubing connectors

### Suction cup with mounting ESS

6 / 2.1-52

The suction cup consists of the suction cup itself, plus the support plate with mounting.

Here too, the area of application of the suction gripper determines which is the right suction cup to use.

- 6 connection sizes: a tubing connector for every holder size
- 2 suction cup shapes
- 6 suction cup designs
- 6 suction cup materials

## Accessories

### Filter ESF

6 / 4.1-4

- For protecting vacuum generators from contamination or damage

### Angle compensator ESWA

6 / 4.1-5

- The angle compensator ensures maximum suction cup grip for workpieces with sloping surfaces.

Corrosion resistance CRC <sup>1)</sup>	1				2	

1) Corrosion resistance class 1 according to Festo standard 940 070

Components requiring low corrosion resistance. Transport and storage protection. Parts that do not have primarily decorative surface requirements, e.g. in internal areas that are not visible or behind covers.

Corrosion resistance class 2 according to Festo standard 940 070

Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a surrounding industrial atmosphere or media such as cooling or lubricating agents.
