Quick coupling sockets/plugs

Key features

FESTO

Mode of operation

Quick connection coupling, shut-off on one/both sides

Coupling

When coupling, the plug is pushed into the socket.

The plug engages automatically when it reaches a certain position.

Decoupling

The plug is unlocked by pressing the releasing sleeve.

When decoupling, it is important to make sure that the quick coupling plug is held until the coupling plug is fully exhausted.

Safety coupling

Coupling

When coupling, the plug is pushed into the socket.

The plug engages automatically when it reaches a certain position.

Decoupling

The releasing sleeve is first turned. This is to release the compressed air from the system.

The plug is then unlocked by pulling the releasing sleeve.

Note

When inserting and releasing couplings, the maximum pressure should be 10 bar.
