

- Simple and reliable connection and release
- With R, G, and metric thread
- Wide range of variants:
Standard, mini, metal, stainless steel,
flame retardant
- QSM-B and QS-B at attractive prices
thanks to larger packaging quantities

Specified types in accordance with ATEX
directive for potentially explosive
atmospheres

Push-in fittings QS, Quick Star

Key features

FESTO

Application	Simply "plug and work"	Reliably connected	Captive seal
 Effortless selection of the right fitting. Quick Star offers a secure solution for every connection. The convenient push-in fitting system includes well over 1000 types of standard and function fittings.	 The stainless steel retaining claw within the fitting holds the tubing securely without damaging its surface. Vibration and pressure surges are safely absorbed. The tubing can be detached easily by pressing down the blue release ring. For your convenience, the appropriate outside tubing diameter is marked on the release ring.	 A nitrile rubber sealing ring guarantees a perfect seal between standard OD tubing and the body of the fitting. Standard tubing is suitable for use with compressed air and vacuum.	 All brass parts of Festo's push-in fittings are nickel plated and are thus highly resistant to corrosion. The tapered ISO R threads have a self-sealing PTFE coating, which allows the fitting to be re-used up to five times without the need for additional sealing components.

Can be repositioned 360°	360° rotatable, with ball bearing
 Alignment is performed during assembly. Tube movement is compensated during use.	 Permits rotating motion of up to 500 rpm during use.

Which fitting fit which thread?		
Metric parallel thread - Cylindrical metric thread is comparable with G thread - Sealing is guaranteed via a sealing ring - Sealing on front face	G parallel thread to DIN ISO 228-1 - Shorter thread - Constant installation depth - Replaceable sealing ring - Sealing on front face - Can be re-used a number of times thanks to replaceable sealing ring	R tapered thread to DIN 2999-1 and ISO 7/1 - Self-sealing thread - Sealing via coated threads - No additional sealing surface required - Smaller installation dimensions since there is no need for a rebate for the sealing surface - Can be re-used up to five times
 Metric thread, male Metric thread, female	 G-thread, male G-thread, female	 R-thread, male G-thread, female R-thread, female

Push-in fittings QS, Quick Star

FESTO

Key features

Push-in fitting QSM Quick Star, mini

Miniature push-in fitting for maximum assembly in minimum fitting space. For pneumatic applications with a temperature range up to 80°C and a pressure range up to 14 bar. Tubing outside diameters of 3, 4 and 6 mm with connecting threads M3, M5, M7, R $\frac{1}{8}$ and G $\frac{1}{8}$.

Push-in fitting QS Quick Star, standard

Wide selection of push-in fittings for pneumatic applications with a temperature range up to 80°C and a pressure range up to 14 bar. Tubing outside diameters of 4, 6, 8, 10, 12 and 16 mm with connecting threads from R $\frac{1}{8}$... R $\frac{1}{2}$ and G $\frac{1}{8}$... G $\frac{1}{2}$.

Push-in fitting QSM-B Quick Star, mini

Miniature push-in fitting for maximum assembly in minimum fitting space. For core pneumatic applications with a temperature range up to 60 °C and a pressure range up to 10 bar. Tubing outside diameters of 3, 4 and 6 mm with connecting threads M3, M5, M7, R $\frac{1}{8}$ and G $\frac{1}{8}$.

Push-in fitting QS-B Quick Star, standard

Push-in fittings for core pneumatic applications with a temperature range up to 60°C and a pressure range up to 10 bar. Tubing outside diameters of 4, 6, 8, 10, 12 and 16 mm with connecting threads from R $\frac{1}{8}$... R $\frac{1}{2}$.

Push-in fitting QS-F Quick Star, metal

Solid-metal push-in fitting with chrome plated surface coating. High corrosion resistance (CRC3) and chemical resistance with approval for use in the food and packaging industry. For pneumatic applications with a temperature range up to 150 °C and a pressure range up to 16 bar. Tubing outside diameters of 4, 6, 8, 10 and 12 mm with connecting threads M5, M7 and G $\frac{1}{8}$... G $\frac{1}{2}$.

Push-in fitting CRQS Quick Star, stainless steel

Stainless steel push-in fitting. High corrosion resistance (CRC4) and chemical resistance with approval for use in the food and packaging industry. For pneumatic applications with a temperature range up to 120°C and a pressure range up to 10 bar. Tubing outside diameters of 4, 6, 8, 10, 12 and 16 mm with connecting threads M5 and R $\frac{1}{8}$... R $\frac{1}{2}$.

Push-in fitting QS-V0 Quick Star, flame-retardant

Flame-retardant push-in fitting for use in all areas where there is a risk of fire, for example welding systems in the automotive industry, and in construction. For pneumatic applications with a temperature range up to 60 °C and a pressure range up to 10 bar. Tubing outside diameters of 6, 8, 10 and 12 mm with connecting threads R $\frac{1}{8}$... R $\frac{1}{2}$ and G $\frac{1}{8}$... G $\frac{1}{2}$.

Technical data

FESTO

Recommended tightening torque/screw-in depth

When using Quick Star push-in fittings with internal hex, ensure that the Allen key is not inserted too far into

the fitting to prevent the risk of damage to components behind the fitting.

Note

Malfunctions may occur with function fittings when screwed too far into the connecting thread. The insertion depth and the recommended tightening torque must be observed. Damage may otherwise occur if the recommended tightening torque is exceeded by more than 50%.

Connecting thread	Tightening torque [Nm]	Approx. screw-in depth [mm]
M thread		
M3	0.7	2.5

1) Corrosion resistance class 1 according to Festo standard 940 070

Components requiring low corrosion resistance. Transport and storage protection. Parts that do not have primarily decorative surface requirements, e.g. in internal areas that are not visible or behind covers.

Corrosion resistance class 2 according to Festo standard 940 070

Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Corrosion resistance class 3 according to Festo standard 940 070

Components requiring higher corrosion resistance. External visible parts in direct contact with industrial atmospheres or media such as solvents and cleaning agents, with a predominantly functional requirement for the surface.

Corrosion resistance class 4 according to Festo standard 940 070

Components requiring higher corrosion resistance. Parts used with aggressive media, e.g. food or chemical industry. These applications should be supported with special tests with the media if required.

2) Value range in brackets for screw connectors QS-F in conjunction with tubing PLN.
