

Motor controllers SFC-LAC

Motor controllers SFC-LAC

Key features

FESTO

Hardware

- The motor controller SFC-LAC serves as a positioning controller and closed loop position controller
 - Available with or without control panel
 - Thanks to IP54 protection, the motor controller can be mounted close to the drive
- Parameter assignment via:
- Control panel:
 - suitable for simple position sequences
 - FCT (Festo Configuration Tool) configuration package:
 - with RS 232 interface
 - Windows-based PC user interface, Festo Configuration Tool
- Easy actuation via:
- I/O interface
 - Profibus
 - CANopen, “Interpolated position mode” included
 - DeviceNet

For controlling

linear module HME

FHPP – Festo Handling and Positioning Profile

Optimised data profile

Festo has developed an optimised data profile, the “Festo Handling and Positioning Profile (FHPP)”, that is tailored to the target applications for handling and positioning tasks.

The FHPP data profile permits the actuation of Festo motor controllers, using a fieldbus interface, via standardised control and status bytes.

The following are defined, among others:

- Operating modes
- I/O data structure
- Parameter objects
- Sequence control

Motor controllers SFC-LAC

Key features

FESTO

FCT software – Festo Configuration Tool

Software platform for electric drives from Festo

- All drives in a system can be managed and archived in a common project
- Project and data management for all supported device types
- Simple to use thanks to graphically-supported parameter entry
- Universal mode of operation for all drives
- Working offline at your desk or online at the machine

Mechanical reference positions and limit positions

- Reference positions can be either edited or taught in
- Flexible adaptation to installation conditions
- Settings are displayed clearly

Position set table

- 31 position sets ensure flexibility in positioning
- Absolute or relative positioning values can be used
- The following parameters can be set flexibly for each application:
 - Position
 - Speed
 - Acceleration
 - Braking ramps
- Complete function test

DeviceNet

General technical data				
Type	SFC-...-IO	SFC-...-PB	SFC-...-CO	SFC-...-DN
Operating mode	Adaptive status controller			
Position sensor	Encoder			
Encoder input	CAN bus			
Display (optional)	Interface with full-text display via graphic LCD display (128 x 64 pixels)			
Control elements (optional)	4 keys			
Interface	I/O interface for 31 position sets and homing	Profibus DP	CANopen	DeviceNet
Number of digital logic inputs	8	–		
Number of digital logic outputs	4	–		
Bus terminating resistor	–	Not integrated in the device		
Communication profile	–	DP-V0/V1 / FHPP	DS301 / FHPP	FHPP
	–	Step7 functional modules	DS301, DSP402	Device type 0C _h
Max. fieldbus baud rate [Mbit/s]	–	12	1	0.5
Mains filter	Integrated			
Type of mounting	H-rail, wall or surface bracket			
Product weight [g]	1,200			

Electrical data		
General		
Rated output	[VA]	480
Parameterisation interface		RS232; 38,400 baud
Max. intermediate circuit voltage	[V DC]	48
Peak power	[VA]	960
Peak current per phase, effective	[A]	15
Load supply		
Nominal voltage	[V DC]	48 +5/−10%
Nominal current	[A]	10
Peak current	[A]	20
Logic supply		
Nominal voltage	[V DC]	24 ±10%
Nominal current	[A]	0.5
Peak current	[A]	0.8
Max. current per output (digital logic outputs)	[A]	0.5
