Valve terminals type 80 CPV-SC, Smart Cubic

**FESTO**

Valve terminals type 80 CPV-SC, Smart Cubic

Key features

FESTO

Innovative

- Small, compact valve terminal for a wide range of pneumatic applications
- Enormous flexibility during planning, assembly and operational use
- Multi-pin plug connection and fieldbus interface
- Wide range of selectable valve functions; 5/2-way, 3/2-way and 2/2-way functions
- With flow rates of up to 170 l/min, CPV-SC offers outstanding pneumatic performance for a wide range of applications
- Low weight

Versatile

- Provides 2 … 16 valve positions on one terminal
- Ideally suited for operating small pneumatic drives in tight spaces
- The flexibility of the pneumatic working ports provides a practical solution to different requirements
- Round silencers, integrated flat plate silencers or screw/plug connection for ducted exhaust air
- Suitable for vacuum
- Enables multiple pressure zones on a single valve terminal

Reliable

- Manual override
- Durable thanks to the use of tried and tested piston spool valves
- Sturdy thanks to metal housing and connecting thread
- Fast troubleshooting thanks to an LED on each valve and diagnostics via fieldbus

Easy to mount

- Fully assembled and tested valve terminal
- Less complicated when ordering, installing and commissioning
- Suitable for direct mounting even on moving system components

Valve terminals type 80 CPV-SC, Smart Cubic

Key features

FESTO

Reliable operation: detenting
and non-detenting manual override

Width 10 mm

→   ←

Easy expansion: blanking plates reserve
positions for later use

Space-saving:
grid 40x40 mm
max. 16 valves

Practical connection:
screw or plug connection

Comprehensive range of valve functions

Reduced downtimes:
LEDs indicate the operating status

Simple electrical connections:
individual valve connection, Sub-D
plug, flat cable or fieldbus connection via
DeviceNet/Profibus DP (direct integration
or CPI)

Quick mounting: attached directly using screws

Equipment options			
Valve functions		Separator plate with additional compressed air supply	Blanking plate
• 5/2-way valve, single solenoid • 5/2-way valve, double solenoid • 3/2-way valve, normally open	• 3/2-way valve, normally closed • 2/2-way valve, normally closed	• Compressed air channel (1) closed • Compressed air channel (1) and exhaust duct (3/5) closed	• Plate without valve function for reserving a valve position

Electrical connection options			
Individual connection	Multi-pin plug	Fieldbus Direct	CP string extension
• 2 ... 16 valve positions/ max. 16 solenoid coils • Individual connection, horizontal (H) • Individual connection, vertical (T)	• 4 ... 16 valve positions/ max. 16 solenoid coils • Sub-D • Flat cable	• 4 ... 16 valve positions/ max. 16 solenoid coils • Profibus • DeviceNet	• Further valve terminals CPV-SC-CPI or from the CPV/CPA range • Further valve terminals from the CPV/CPA range • Electrical I/O modules
CPI interface

Valve terminals type 80 CPV-SC, Smart Cubic

Key features

Valve terminal configurator **Online via:** ➔ www.festo.com

Selecting a CPV-SC valve terminal using the online catalogue is quick and easy thanks to the convenient valve terminal configurator provided. This makes it much easier to order the right product. The valve terminals are assembled according to your order specifications and are individually tested. This reduces the assembly and installation time to a minimum. The valve terminal type 80 is ordered using the order code.

Ordering system for type 80
➔ Internet: type 80

The illustration above provides an example of a valve terminal configuration.
The following steps explain how you arrive at the order code:

Once you have called up ➔ www.festo.com, click on "Automation" and select "Catalogue" from the "Products" submenu. Now select "Valve Terminals" and then "Universal Valve Terminals".

Choose the valve terminal you want (CPV-SC in this case) and click on the link "Configure common options". You can then configure the valve terminal step by step (from left to right) according to your requirements. Click on the shopping basket to save the selected configuration (this does not create an order).

You can switch to expert mode at any time by clicking on the "Further options" link. This provides you with extended options for configuring your valve terminal.

2D/3D CAD data **Online via:** ➔ www.festo.com

You can request the CAD data for a valve terminal you have configured. To do so, perform the product search as described above. Go to the shopping basket and click on the CAD icon

(compass). On the next page you can generate a 3D preview or request another data format of your choice by e-mail.

Valve terminals type 80 CPV-SC, Smart Cubic

Key features

Individual connection

Connection is independent of the control technology used and is flexible thanks to ready to install cables. This ensures correct polarity during installation.

Valves with integrated LED (CPVSC1-M1LH- …) are available as an option for switching status display. Individual connection permits the selection of 2 to 16 solenoid coils (divided between 2 to 16 valve positions).

Variants
• Individual connection, horizontal
• Individual connection, vertical
• 2 to 16 solenoid coils

Multi-pin plug connection
Control signals to the valve terminal are transmitted via a pre-assembled multi-core cable, which substantially reduces installation time.

The multi-pin plug connection enables the selection of 4 to 16 solenoid coils (divided between 2 to 16 valve positions).

Variants
• Sub-D connection
• Flat cable connection
• 4 to 16 solenoid coils

Fieldbus Direct
An integrated fieldbus node manages the communication connection to a higher-order PLC. This enables a space-saving pneumatic and electronic solution.

The fieldbus connection enables the selection of 4 to 16 solenoid coils (divided between 4 to 16 valve positions).

Variants
• DeviceNet connection (CP functionality)
• Profibus connection (CPI functionality)
• 4 to 16 solenoid coils

Fieldbus Direct with CP string extension
Fieldbus

The optional string extension enables additional valve terminals and I/O modules to be connected to the field-bus node of the CPV-SC. A CP string of the CPI installation system is integrated in the fieldbus node as an extension. Different input and output modules as well as CPV, MPA, CPV-SC, CPA valve terminals can be connected. The maximum length of the CP string extension is 10 metres, which means that the extension modules can be mounted directly on-site. All of the required electrical signals are transmitted via the CP cable, which in turn means that no further installation is needed on the extension module.

The CP string interface offers:
• Logic and sensor supply for the input modules
• Load voltage supply for the valve terminals
• Logic supply for the output modules
With CP functionality:
• 16 input signals
• 16 output signals for output modules 24 V DC or solenoid coils
With CPI functionality:
• 32 input signals
• 32 output signals for output modules 24 V DC or solenoid coils

➜ www.festo.com

CPI installation system

Valve terminal for CPI installation system:

Valve terminals with CP connection are intended for connection to higher-order fieldbus nodes or to control blocks. A fieldbus node or control block also enables the connection of decentralised input/output units. The following fieldbus protocols are supported:
- Festo fieldbus, ABB CS31, Moeller Suconet K
- Interbus
- Allen Bradley (1771 RIO)
- DeviceNet
- Profibus DP, 12 MBd
- CC-Link
- Modbus/TCP
- Ethernet

Four strings with up to 32 inputs and outputs can be connected to a fieldbus node or control block. The connecting cables transmit the power supply for the input modules and the load voltage for the valves as well as control signals.

Overview – CPV-SC valve terminal

Valve terminal with individual electrical connections

- Vertical individual connection
  Code: T
- Horizontal individual connection
  Code: H

Valve terminals with individual electrical connection can be equipped with 2 to max. 16 valve positions. Each valve position can either be equipped with a valve or a blanking plate.
1	Valve with vertical individual connection	4	Plug socket with cable for individual electrical connection of valves
2	Valve with horizontal individual connection	5	Left-hand end plate for compressed air supply 1 or 12/14
3	Right-hand end plate for unducted exhaust air		
6	Tie rod	8	Inscription label holder
7	Sub-base for working ports (push-in fitting or threaded)	9	Silencer

Valve terminals type 80 CPV-SC, Smart Cubic

Peripherals overview

## Valve terminal with electrical multi-pin plug connection

- 15- and 26-pin Sub-D multi-pin plug connection
  Code: MS, MH
or
- 20-pin multi-pin plug connection with connector for flat cable
  Code: MF

Valves and end plates are the basic pneumatic components of the valve terminal.
The valve terminals are connected to the end plates using tie rods.

Valve terminals with electrical multi-pin plug connection can be equipped with 4 to max. 16 valve positions. Each valve position can either be equipped with a valve or a blanking plate.

The electrical connection is located on the left-hand side, thereby allowing flush mounting of the system.
	1	Electrical control unit (with LED switching status displays) for Sub-D plug or flat cable
	2	Left-hand end plate for compressed air supply 1 or 12/14
	3	Right-hand end plate for ducted exhaust air or silencer (3/5 or 82/84)
	4	Sub-base for ducted exhaust air (push-in fitting or threaded)
	5	Valve
	6	Cover for manual override (optional)
	7	Sub-base for working ports (push-in fitting or threaded)
	8	Tie rod
	9	Electrical valve linking module
	10	Inscription label holder
	11	H-rail mounting
	12	Blanking plate for vacant position

12	Blanking plate for vacant position

Valve terminals type 80 CPV-SC, Smart Cubic
Key features – Pneumatic components

Valves

CPVSC1 valves are valves with integrated sub-base, i.e. in addition to the valve function they contain all of the ducts for supply, exhaust and the working ports. The supply ducts are a central component of the valve slices and enable a direct flow of air. This helps achieve maximum flow rates. All valves have a pneumatic pilot control for optimising performance. The valve function is based on a piston spool system with a patented sealing principle that guarantees its suitability for a wide range of applications as well as a long service life.

| Valve functions	Code	Circuit symbol	Width 10 mm	Description
	M	82/84 △ 4 2 / 14 / 5 ▽▽ 3 / 1 △ / 12/14 ▷	■	5/2-way single solenoid valve • Pneumatic spring return
	N	82/84 △ 2 / 10 / 1 △▽ 3 / 12/14 ▷	■	3/2-way single solenoid valve • Normally open • Pneumatic spring return
	K	82/84 △ 2 / 12 / 1 △▽ 3 / 12/14 ▷	■	3/2-way single solenoid valve • Normally closed • Pneumatic spring return
	D	82/84 △ 2 / 12 / 1 △ / 12/14 ▷	■	2/2-way single solenoid valve • Normally closed • Pneumatic spring return
	J	82/84 ◁ / 4 2 / 14 12 / 5 ▽ 3 / 1 △ / 12/14 ▷	■	5/2-way double solenoid valve This valve consists of two valve housing units and therefore occupies two valve positions. The pilot control with coil 12 is located on the left and labelled "J12". If both coils are actuated, the signal at port "14" dominates in switching position.

- ▯ - Note

For vacuum operation valves require a filter. This is to avoid that foreign matter is drawn into the valve (e.g. when using a suction cup).

| Valves				
Valve functions	Code	Circuit symbol	Width 10 mm	Description
Pneumatic supply plate with duct separation				
	T	82/84 / 12/14 / 5 / 1 / 3 / 2 / 4	■	Compressed air channel (1) closed For separating pressure zones with a common exhaust. (Using pressure zones ➜ 14) Pneumatic connection: QS-4, M5
	S	82/84 / 12/14 / 5 / 1 / 3 / 2 / 4	■	Compressed air channel (1) and exhaust duct (3/5) closed For separating pressure zones with a separate exhaust. (Using pressure zones ➜ 14) Pneumatic connection: QS-4, M5
Pneumatic supply plate without duct separation				
	U	82/84 / 12/14 / 5 / 1 / 3 / 2 / 4	■	Additional compressed air supply (1) and additional exhaust (3/5). Pneumatic connection: QS-4, M5
Blanking plate				
	L	82/84 / 12/14 / 5 / 1 / 3	■	Plate without valve function for reserving a valve position. No pneumatic connection

In the case of compressed air supply configuration code S or T (exhausting via flat plate silencer), a plug-in silencer UC-QS-4H is included with supply plates.

Constructional design

Valve replacement

Valves can be replaced quickly and easily in just a few movements. Separating seals between the valves are based on a metal support and are secured in place.

Materials

The valve housing and thread in the sub-bases are metallic, while other housing sections are made from robust plastic materials.

Extension

Valves can be ordered as accessories and are available with fully assembled sub-bases with QS or threaded connections. The functionality of the valve terminal can therefore be extended by equipping vacant positions.
For ordering purposes, valves have the valve code printed on the front and the product type on the back.

- 🔅 - Note

The valve with the working sub-base has been tested by Festo for leak tightness.

Pilot air supply

The port for the main pneumatic supply is located on the left-hand end plate.
The ports differ for the following types of pilot air supply:
- Internal
- External

Internal pilot air supply
An internal pilot air supply can be selected if the terminal is working in an operating pressure range between 3 and 7[1] bar.
The pilot air supply in the left-hand end plate is then branched from the compressed air supply 1 using an internal connection. The port 12/14 is closed using a blanking plug.

External pilot air supply
If the terminal is working in an operating pressure range from –0.9 to 3 bar, you must operate your CPV-SC valve terminal using an external pilot air supply. The pilot air supply is also supplied via port 12/14 on the left-hand end plate in this case.

1) 8 bar upon request

Creation of pressure zones and separation of exhaust air

The CPV-SC valve terminal can be operated with multiple pressure zones. After two zones, a supply with duct separation is required for each subsequent pressure zone. It always occupies one valve position. An isolating disc T separates the compressed air supply of a valve group on the left from the compressed air supply of a valve group on the right. The right-hand pressure zone is supplied at port 4 of the supply plate. Port 2 also allows the left-hand pressure zone to be exhausted. All of the exhaust ducts of the valve are interconnected and are exhausted through the right-hand end plate. An isolating disc S also separates exhaust ducts 3 and 5 in addition to pressure duct 1.

- 🔅 - Note

Larger or simultaneously operating cylinders generate a back pressure in the exhaust duct of the valve terminal, the level of which depends on the exhaust capacity of the silencer.

In order to prevent interaction with adjacent valves, valves can be separated by means of duct separation using isolating disc S. The pressure zone located to the left of an isolating disc S is exhausted using the supplied plug-in silencer. Where there are more than two valves in such a pressure zone, an additional supply with additional exhaust may be required.
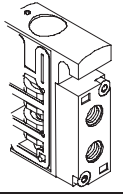

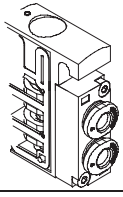

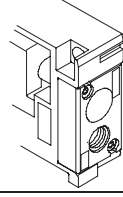

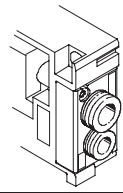

It is therefore useful to meet the higher exhaust requirements in the pressure zone that is exhausted by the right-hand end plate.

Creating pressure zones		Code	Description
		S	Duct 1 and 3/5 separated
		T	Duct 1 separated

Pneumatic working ports		Code	Description
Working port			
		B	M5 threaded connection
		E	QS-3 push-in connector
		F	QS-4 push-in connector
Supply port, left-hand end plate			
		C	Threaded connection • M7 (internal pilot air supply) • M5 and M7 (external pilot air supply)
		G	Push-in connection • QS-6 (internal pilot air supply) • QS-4 and QS-6 (external pilot air supply)

| Ports for supply and exhaust		
Supply and exhaust		
A basic feature of a CPV-SC valve terminal are the two end plates.	The left-hand end plate is used to supply compressed air, while the right-hand end plate is used to exhaust the valve terminal.	Exhaust air escapes either via an integrated flat plate silencer, round silencer or via a push-in or threaded connection.
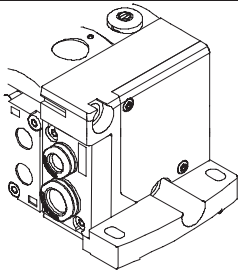

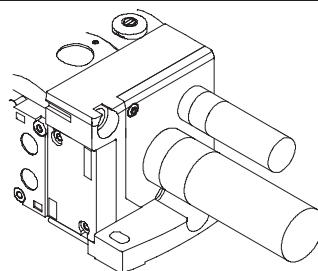

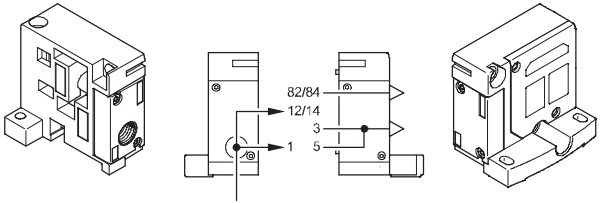

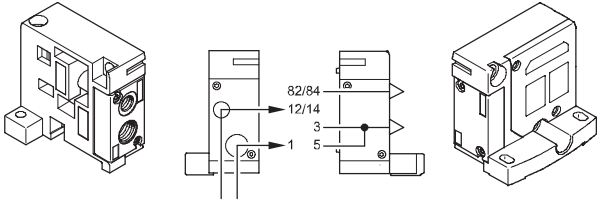

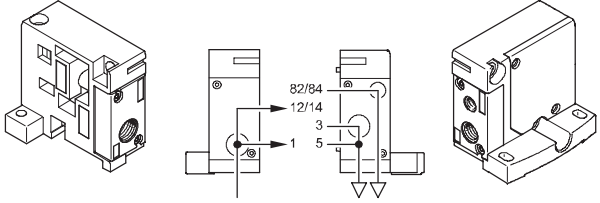

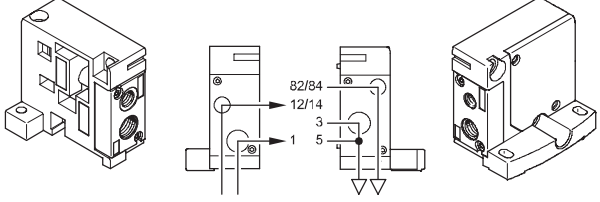

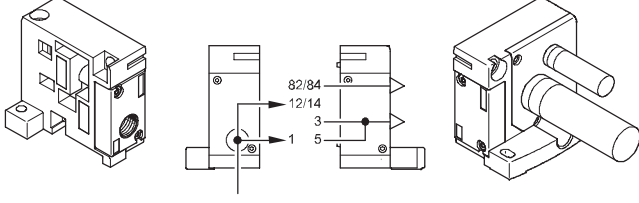

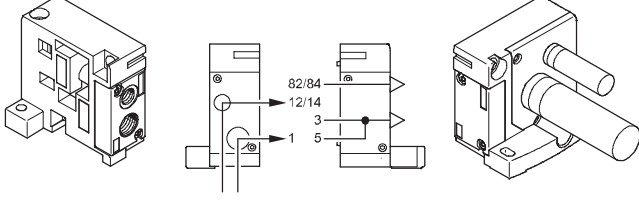

Ports for exhaust	Code	Description
	S	• Internal pilot air supply • Exhaust from duct 3/5 as well as 82/84 is via a flat plate silencer • Replacement part (insert) for flat plate silencer: Type CPVSC1-UA
	T	• External pilot air supply • Exhaust from duct 3/5 as well as 82/84 is via a flat plate silencer • Replacement part (insert) for flat plate silencer: Type CPVSC1-UA
	V	• Internal pilot air supply • Exhaust from duct 3/5 as well as 82/84 is via ducted exhaust air
	X	• External pilot air supply • Exhaust from duct 3/5 as well as 82/84 is via ducted exhaust air
	Y	• Internal pilot air supply • Exhaust from duct 3/5 as well as 82/84 is via a round silencer
	Z	• External pilot air supply • Exhaust from duct 3/5 as well as 82/84 is via a round silencer

Pneumatic supply		
End plate combination	Code	Description
	S	Internal pilot air supply, flat plate silencer For operating pressure in the range 3 … 7 bar
	T	External pilot air supply, flat plate silencer For operating pressure in the range −0.9 … +7 bar
	V	Internal pilot air supply, ducted exhaust air For operating pressure in the range 3 …7 bar
	X	External pilot air supply, ducted exhaust air For operating pressure in the range −0.9 … +7 bar
	Y	Internal pilot air, round silencer For operating pressure in the range 3 … 7 bar
	Z	External pilot air supply, round silencer For operating pressure in the range −0.9 … +7 bar

Protective circuit
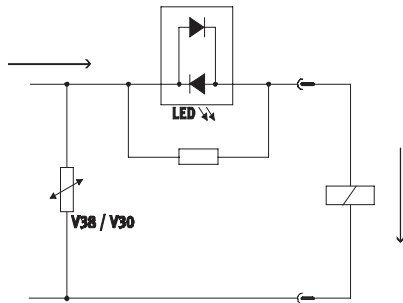

Each solenoid coil is protected with a spark arresting protection circuit as well as against polarity reversal.

Electrical multi-pin plug connection

The following multi-pin plug connection types are offered for the valve terminal CPV-SC:
- Sub-D multi-pin plug connection (15- and 26-pin) or
- Multi-pin plug connection with connector for flat cable (20-pin)

CPV-SC is connected via a multi-pin plug connection with Sub-D or flat cable. Each pin of the multi-pin plug is assigned a maximum of one valve position and therefore one coil or one address.

Double solenoid valves "J" occupy two valve positions. The left-hand valve position with pilot control 12 is actuated by the less significant of the two addresses.

Electrical multi-pin plug connection – Sub-D
Code MS, MH
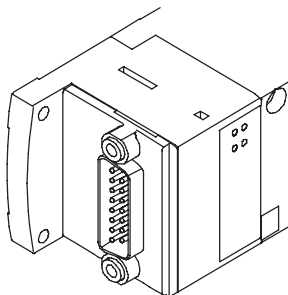

With this electrical connection variant, all valves are centrally actuated via the 15 and 26-pin connector plug. The electrical connection is located on the left-hand side.

Ordering data – Connecting cable Sub-D

Fieldbus Direct
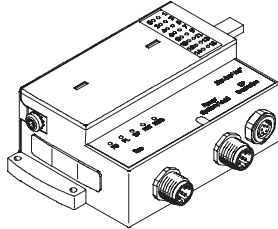

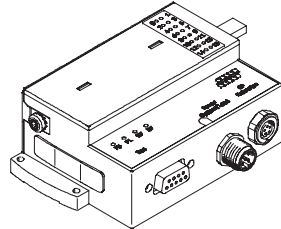

DeviceNet	Profibus DP	Properties

Fieldbus Direct is a system for the compact connection of a valve terminal of various sizes to different fieldbus standards.

The CP string extension option allows the functions and components of the CPI installation system to be used.

The I/O modules and cables for the CP string extension are ordered using the order code for the CPI installation system.

➔ Internet: cpi

Fieldbus connection CP
All CP valve terminals and CP modules are connected using a ready to install CP cable, and are attached to the CP interface. Four modules, for example one CPV-SC valve terminal and one to three CP input modules, make up an installation string that ends at the CP interface. The installation system supports a maximum of 4 installation strings, which can be connected to a CP fieldbus node.

The CP interface of CPV-SC is represented in the CP/CPI system by a module with 16 outputs.

- ⬲ - Note

Further information can be found in
➔ Internet: cpi

Address allocation – Solenoid coils

Example:
Valve terminal where valve positions 5 and 6 are prepared for double solenoid valves.
|1| Single solenoid valves occupy one valve position

|2| Double solenoid valves occupy two valve positions

The addresses of the valve positions on the CPV-SC-DN/CPV-SC-DP are assigned from left to right. Each valve position has an address, regardless of whether or not a valve is mounted there.

Double solenoid valves "J" occupy two valve positions. The left-hand valve position with pilot control 12 is actuated by the less significant of the two addresses.

Display and operation

The switching status of every solenoid coil is displayed on the control unit LED. Inscription labels (type MH-BZ-80x) can be applied to each valve for labelling purposes.

The manual override (MO) allows the valve to be activated without electronic control or power supply. The valve is activated by pushing the manual override. The set switching status can also be secured by rotating the manual override.

A cover can be fitted over the manual override to prevent it from being activated accidentally (code V).

- Note

A manually activated valve (manual override) cannot be reset electrically. Conversely, an electrically activated valve cannot be reset using the manual override facility.

Manual override (MO)
1 Manual override (non-detenting or detenting via turning using a screwdriver)
2 Cover for manual override (code V)
3 Location for valve position inscription label (type MH-BZ-80x)
4 Numbering of valve positions
5 LED signal status display per valve position

Manual override with automatic return (non-detenting)
Manual override is actuated by pushing it with a pointed object or screwdriver and reset by spring force.

Manual override set via turning (detenting)
Manual override remains active until it is reset with a screwdriver.

Display and operation

Fieldbus Direct – DeviceNet
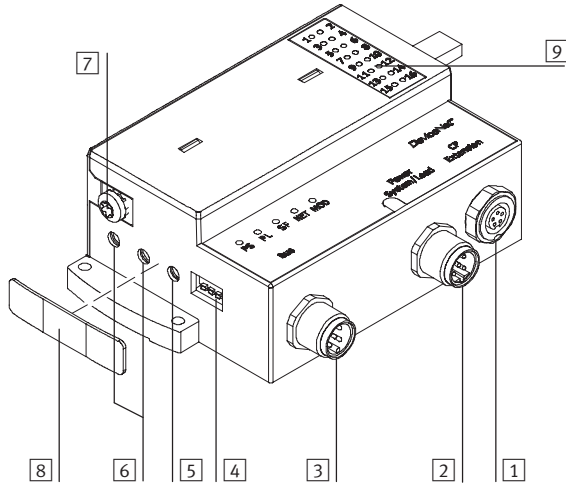

1	Connection for CP extension (with CP functionality)
2	Connection for power supply
3	Connection for fieldbus

Mounting – Valve terminal

Sturdy terminal mounting thanks to:
- Four through-holes for wall mounting
- H-rail mounting

Wall mounting
1 Mounting holes for screws M3

H-rail mounting
The mounting CPVSC1-HS35 facilitates mounting on a H-rail to EN 60715.
The CPV-SC valve terminal is attached to the H-rail (see arrow A).
The valve terminal is then swivelled on the H-rail and secured in place with the clamping component (see arrow B).

1 Holes for wall mounting
2 Self-tapping M4x10 screw of the H-rail clamping unit
3 Clamping component of the H-rail clamping unit

Valve terminals type 80 CPV-SC, Smart Cubic

Technical data

- Flow rate
  170 l/min

- Valve width
  10 mm

- Voltage
  5, 12, 24 V DC

General technical data						
Valve		5/2-way valve		3/2-way valve		2/2-way valve
		Single solenoid	Double solenoid	Normally open	Normally closed	Normally closed
Valve function order code		M	J	N	K	D
Constructional design		Electromagnetically actuated piston spool valve				
Width	[mm]	10		10		10
Nominal diameter	[mm]	2.5		2.5		2.5
Standard nominal flow rate	[l/min]	170		170		150
Lubrication		Life-time lubrication				
Type of mounting		Wall mounting				
Mounting position		Any				
Manual override		Non-detenting/detenting/blocked				
Pneumatic connections						
Supply	1	M7, QS-6				
Exhaust port	3/5	M7, QS-6, round silencer or integrated flat plate silencer				
Working ports	2/4	Depending on the connection type selected				
		• M5				
		• QS-3				
		• QS-4				
Pilot air port	12/14	M5, QS-4				
Pilot exhaust air port	82/84	M5, QS-4, round silencer or integrated flat plate silencer				

Pilot pressure p2 as a function of operating pressure p1
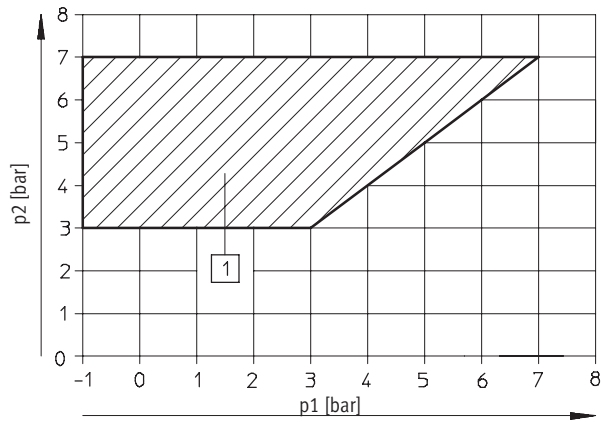

1 Operating range for valves with external pilot air

Valve response times [ms]

Valve function order code		M	J	N	K	D
Response times	on	10	10	10	10	10
	off	10	–	10	10	10
	changeover	–	8	–	–	–

Operating and environmental conditions

Valve function order code		M	J	N	K	D
Operating medium		Filtered compressed air, lubricated or unlubricated, inert gases permissible ➜ 28				
Grade of filtration	[µm]	40				
Paint-wetting impairment substances criterion		Yes (free of paint-wetting impairment substances)				
CE certification		Yes, with control unit to EMC regulations				
Certification		cULus recognized (OL)				
Operating pressure	bar]	−9 ... +7				
Operating pressure for valve terminal with internal pilot air supply	bar]	3 ... 7				
Pilot pressure	bar]	3 ... 7				
Ambient temperature	[°C]	−5 ... +50				
Temperature of medium	[°C]	−5 ... +50				
Storage temperature	[°C]	−20 ... +40				
Corrosion resistance class CRC[1]		1				

1) Corrosion resistance class 1 according to Festo standard 940 070
Components requiring low corrosion resistance. Transport and storage protection. Parts that do not have primarily decorative surface requirements, e.g. in internal areas that are not visible or behind covers.

Technical data

Electrical data			M	J	N	K	D
Valve function order code			M	J	N	K	D
Electromagnetic compatibility of the CPV-SC valve terminal with Sub-D or flat cable connection			Interference emission tested to DIN EN 61000-6-4, industry				
			Interference immunity[1] tested to DIN EN 61000-6-2, industry				
Protection against electric shock (protection against direct and indirect contact to EN 60204-1/IEC 204)			By means of PELV power supply unit				
Nominal operating voltage of valve terminal	Multi-pin plug connection	[V DC]	24				
	Individual sub-base	[V]	5 , 12, 22, 24				
Permissible voltage fluctuations		[%]	±10				
Coil characteristics	Nominal voltage	[V DC]	5 , 12, 22, 24				
	Electrical power consumption	[W]	1				
Duty cycle			100% at 40°C ambient temperature				
Protection class to EN 60529			IP40 (in assembled state and with detenting plug)				
Relative air humidity		[%]	90 at 40 °C, non-condensing				

1) The maximum signal line length is 10 m

Materials	M	J	N	K	D
Valve function order code	M	J	N	K	D
Electrical interface	Polymer				
End plate, electrical sub-base	Polymer				
Seals	Elastomer				
Valve slice	Die-cast aluminium				
Sub-base for working ports	Polyamide				

Product weight [g]	M	J	N	K	D
Valve function order code	M	J	N	K	D
5/2-way, 3/2-way valve	30.5				
5/2-way double solenoid valve	56.5				
Blanking plate	22.5				
Right-hand end plate	42.5				
Left-hand end plate	28				
Actuator housing	43				
Tie rod, 16-fold	29.6				
Electrical manifold module, 16-fold	64				
Control unit (fieldbus)	200				
Electrical interface CPI	150				

Equipment

Operate your equipment with unlubricated compressed air if possible. Festo valves and cylinders are designed so that, if used as designated, they will not require additional lubrication and will still achieve a long service life.

The quality of compressed air downstream from the compressor must correspond to that of unlubricated compressed air. If possible, do not operate all of your equipment with lubricated compressed air. The lubricators should, where possible, always be installed directly upstream of the cylinders used.

Incorrect additional oil and too high an oil content in the compressed air reduces the service life of a valve terminal.

Use Festo special oil OFSW-32 or the alternatives listed in the Festo catalogue (as specified in DIN 51524 HLP32; basic oil viscosity 32 CST at 40°C).

Bio-oils

When using bio-oils (oils which are based upon synthetic or native ester, e.g. rapeseed oil methyl ester), the maximum residual oil content of 0.1 mg/m^3 must not be exceeded (see ISO 8573-1 Class 2).

Mineral oils

When using mineral oils (e.g. HLP oils to DIN 51524, Parts 1 to 3) or similar oils based on poly-alpha-olefins (PAO), the maximum residual oil content of 5 mg/m^3 must not be exceeded (see ISO 8573-1 Class 4).

A higher residual oil content irrespective of the compressor oil cannot be permitted, as the basic lubricant would be flushed out over time.

Solenoid valve with QS-4 push-in connectors		
5/2-way single solenoid valve	CPVSC1-M1HT-M-H-Q4	548 063
5/2-way double solenoid valve	CPVSC1-M1HT-J-H-Q4	548 064
3/2-way valve, normally open	CPVSC1-M1HT-N-H-Q4O	548 062
3/2-way valve, normally closed	CPVSC1-M1HT-K-H-Q4C	548 061
2/2-way valve, normally closed	CPVSC1-M1HT-D-H-Q4C	548 060

| Ordering data – Valves with individual electrical connection, detenting manual override, vertical plug, 12 V DC		
Designation	Type	Part No.
Solenoid valve with M5 connections		
5/2-way single solenoid valve	CPVSC1-M5H-M-T-M5	547 367
5/2-way double solenoid valve	CPVSC1-M5H-J-T-M5	547 368
3/2-way valve, normally open	CPVSC1-M5H-N-T-M5O	547 366
3/2-way valve, normally closed	CPVSC1-M5H-K-T-M5C	547 365
2/2-way valve, normally closed	CPVSC1-M5H-D-T-M5C	547 364
Solenoid valve with QS-3 push-in connectors		
5/2-way single solenoid valve	CPVSC1-M5H-M-T-Q3	547 372
5/2-way double solenoid valve	CPVSC1-M5H-J-T-Q3	547 373
3/2-way valve, normally open	CPVSC1-M5H-N-T-Q3O	547 371
3/2-way valve, normally closed	CPVSC1-M5H-K-T-Q3C	547 370
2/2-way valve, normally closed	CPVSC1-M5H-D-T-Q3C	547 369
Solenoid valve with QS-4 push-in connectors		
5/2-way single solenoid valve	CPVSC1-M5H-M-T-Q4	547 377
5/2-way double solenoid valve	CPVSC1-M5H-J-T-Q4	547 378
3/2-way valve, normally open	CPVSC1-M5H-N-T-Q4O	547 376
3/2-way valve, normally closed	CPVSC1-M5H-K-T-Q4C	547 375
2/2-way valve, normally closed	CPVSC1-M5H-D-T-Q4C	547 374

| Ordering data – Valves with individual electrical connection, pushing manual override, horizontal plug, 12 V DC		
Designation	Type	Part No.
Solenoid valve with M5 connections		
5/2-way single solenoid valve	CPVSC1-M5H-M-H-M5	547 382
5/2-way double solenoid valve	CPVSC1-M5H-J-H-M5	547 383
3/2-way valve, normally open	CPVSC1-M5H-N-H-M5O	547 381
3/2-way valve, normally closed	CPVSC1-M5H-K-H-M5C	547 380
2/2-way valve, normally closed	CPVSC1-M5H-D-H-M5C	547 379
Solenoid valve with QS-3 push-in connectors		
5/2-way single solenoid valve	CPVSC1-M5H-M-H-Q3	547 387
5/2-way double solenoid valve	CPVSC1-M5H-J-H-Q3	547 388
3/2-way valve, normally open	CPVSC1-M5H-N-H-Q3O	547 386
3/2-way valve, normally closed	CPVSC1-M5H-K-H-Q3C	547 385
2/2-way valve, normally closed	CPVSC1-M5H-D-H-Q3C	547 384
Solenoid valve with QS-4 push-in connectors		
5/2-way single solenoid valve	CPVSC1-M5H-M-H-Q4	547 392
5/2-way double solenoid valve	CPVSC1-M5H-J-H-Q4	547 393
3/2-way valve, normally open	CPVSC1-M5H-N-H-Q4O	547 391
3/2-way valve, normally closed	CPVSC1-M5H-K-H-Q4C	547 390
2/2-way valve, normally closed	CPVSC1-M5H-D-H-Q4C	547 389
