

- Variable end-position adjustment at both ends
- Backlash-free power transmission
- Wide choice of mounting options

Semi-rotary drives DRQ

Features

FESTO

Rotating and swivelling

The linear movement of the cylinder is converted into rotational movement by a backlash-compensating gear unit. Precision is increased by backlash-free transmission of force from the gear rack to the pinion.

The semi-rotary drive DRQ-...-PPVJ-A has variable end-position adjustment at both ends, combined with adjustable end-position cushioning. This permits constant cushioning over the entire end-position adjustment range.

- Nominal swivel angles of 90°, 180°, 270° or 360°
- Freely selectable swivel angle from 0 to 360°
- With adjustable end-position cushioning at both ends and end-position adjustment for piston Ø 16 to 100 mm

- With adjustable end-position cushioning at both ends for piston Ø 40 to 100 mm
- For contactless position sensing
- Backlash-free power transmission
- Wide choice of mounting options

-  - Note
Sizing software
Calculating inertia

-  - Note
DRQ-...-PPV-A (without end-position adjustment) is only available for drives with piston Ø 40 to 100 mm.

Semi-rotary drives DRQ

Key features and product range overview

FESTO

Individually adjustable end positions

The externally adjustable end position adjustment increases service life and permits precise adjustment of the swivel angle.

The design principle always guarantees the full cushioning length. Exception: small swivel angle

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support
and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors,
controllers & drives

Pneumatics
Pneumatic linear and rotary actuators,
valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors
and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
