Position transmitters SMAT-8M, for T-slot

FESTO

Key features

Design

General

The SMAT-8M is a position transmitter for the contactless sensing of the piston position of drives that can be detected magnetically. It supplies a displacement-proportional analogue

output signal in the position measuring range. It is connected directly to the analogue PLC inputs without any accessories. With its extremely compact design,

the SMAT-8M is the ideal solution for grippers, short-stroke cylinders and all applications in which installation space is restricted.

Note

It can be used with Festo cylinders with T-slot (profile slot 8) as well as round cylinders and tie-rod cylinders with mounting kits. A selection aid with suitable drives can be found on the following pages.

Position measuring range

The SMAT-8M supplies a displacement-proportional analogue output signal of 0 ... 10 V in the position measuring range of up to 40 mm (depending on the drive used). In other words, the output voltage increases when the piston moves in the direction of the piston rod. When the piston retracts, the output voltage drops.

The installation direction of the SMAT-8M is irrelevant in this case. To achieve the best possible function on the drive in question, the position measuring range must be initialised on the drive during installation.

As a visual aid, the green LED lights up within the position measuring range (B) and the red LED lights up outside of the measuring range (A)/(C) in normal operation.

Repetition accuracy

The repetition accuracy is ± 0.025 mm on grippers and ± 0.1 mm on standard drives.

With standard drives, the repetition accuracy in the centre of the measuring range is lower than at the edge. It is ± 0.06 mm at a distance of ± 5 mm from the centre, for example. For critical applications, it is recommended that the SMAT-8M be mounted so as to have the relevant measuring points close to 5.5 V.

Repetition accuracy as a function of position measuring range S

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
