

Pressure boosters DPA

FESTO

Pressure boosters DPA

Key features

FESTO

Function

The pressure booster is a twin-piston pressure intensifier intended solely for compressing air.

When the DPA is pressurised with compressed air, integrated non-return valves automatically facilitate pressure build-up on the secondary side. The output pressure p_2 can increase to up to twice the value of the

supply pressure p_1 . The required output pressure is set using a manually operated pressure regulator.

In the case of pressure boosters without a pressure regulator, the output pressure is always twice the supply pressure.

The air supply to both drive pistons is controlled by a pneumatic directional

control valve that reverses automatically when the stroke end position is reached.

The pressure booster starts automatically when the supply pressure is applied and the desired output pressure has not yet been reached.

When the set output pressure is

reached, the pressure booster switches to energy-saving mode but restarts automatically if the pressure drops during system operation. With the DPA with sensing option, it is also possible to record individual strokes of the drive piston with the aid of an external sensor and adding counter.

Note

Pressure boosters are intended for the occasional relieving of compressed air. They are not suitable as a replacement for compressors, as wear on seals and drive pistons increases significantly during continuous operation without breaks.

Note

The pressure regulator is supplied with a non-tensioned regulator spring (DPA-...-10/16 only). After the supply pressure is applied, the regulator spring is pretensioned by turning the regulator knob until the desired output pressure p_2 is achieved.

A pressure gauge is strongly recommended to monitor the output pressure p_2 . In the case of the DPA-63/100, the regulator setting can be secured against unauthorised adjustment by means of the regulator lock LRVS.

Connection to the compressed air network

Supply pressure side

The use of a 3/2-way on-off valve (e.g. HE-...-D, HEE-...-D or a similar type) in the air supply line to the pressure booster is recommended. The 3/2-way on-off valve must not be opened until the supply pressure p_{in} has already built up.

Output pressure side

The connection of a 3/2-way on-off valve on the output pressure side of the pressure booster is recommended for safe venting of the output pressure p_{out} . If a 3/2-way valve is not used, the output pressure can only be vented by fully releasing the regulator spring (regulator knob turned all the way to the left).

Note

If there is a soft-start valve in the system, it is essential that a 3/2-way on-off valve is inserted between the soft-start valve and pressure booster.

Note

In the case of pressure boosters without pressure regulator, external venting must be ensured via a 3/2-way on-off valve.

- 1 Pressure booster
- 2 Pressure gauge
- 3 Silencer
- 4 Filter

- 5 3/2-way on-off valve on the supply pressure side
- 6 3/2-way on-off valve on the output pressure side

Pressure boosters DPA

Key features

FESTO

Installation with air reservoir

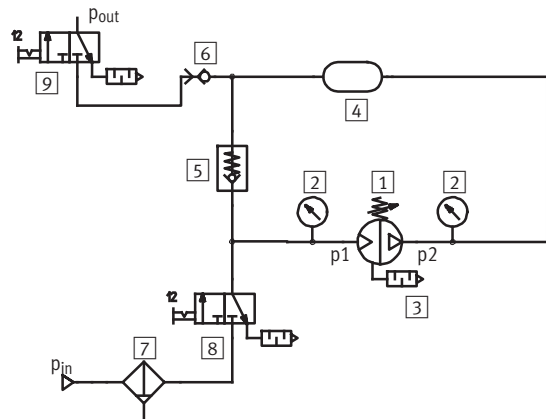

An air reservoir (e.g. CRVZS) should always be used on the output pressure side to compensate for pressure fluctuations. The air reservoir evens out the pulsation of the pressure booster. An effective way of filling the air reservoir with the supply pressure p_1 is via a connecting cable. The pressure booster only has to make up

the difference between the supply and output pressures. The air reservoir is filled faster. A non-return valve prevents the air from flowing back out of the reservoir.

This configuration corresponds to the scope of delivery of the pressure booster/air reservoir combination that can be ordered (→ 16).

Circuitry with 2 on-off valves

The air reservoir is vented via the regulator knob of the pressure booster.

Circuitry with 3 on-off valves

The air reservoir is vented via the additional on-off valve.

Adding counter CCES for DPA-63/100-...-A

Material:
Housing: Polycarbonate
Conforms to RoHS

Ordering data				Technical data → Internet: cces	
For type	Display	Power supply	Weight [g]	Part No.	Type
DPA-63/100-...-A	8-digit	Lithium battery (nominal value retention 7 years)	30	549403	CCES-P-C8-E

Ordering data – Proximity sensor SME/SMT for adding counter CCES					Technical data → Internet: sme-8m, smt-8m	
	Switching element function	Switch output	Electrical connection	Cable length [m]	Part No.	Type
	N/O contact	Contacting, bipolar	Cable, 3-wire	2.5	543862	SME-8M-DS-24V-K-2,5-OE
		PNP	Cable, 3-wire	2.5	543867	SMT-8M-PS-24V-K-2,5-OE

Note

Please note the following points:

- The abovementioned proximity sensor SME can be connected to the adding counter as a 2-wire switch without additional power supply.
- If using other proximity sensors, an additional power supply is needed
- and the clock pulse input of the adding counter must be reprogrammed from NPN to PNP.
- Screened cables must be used for cables longer than 3 m.
- The maximum permissible cable length is 30 m.

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
