

Control systems CMCA

FESTO

Control systems CMCA

Key features

FESTO

At a glance

The control solution CMCA is suitable for Festo handling systems. It is available in two versions:

- Mounting plate
- Mounting plate in a control cabinet housing

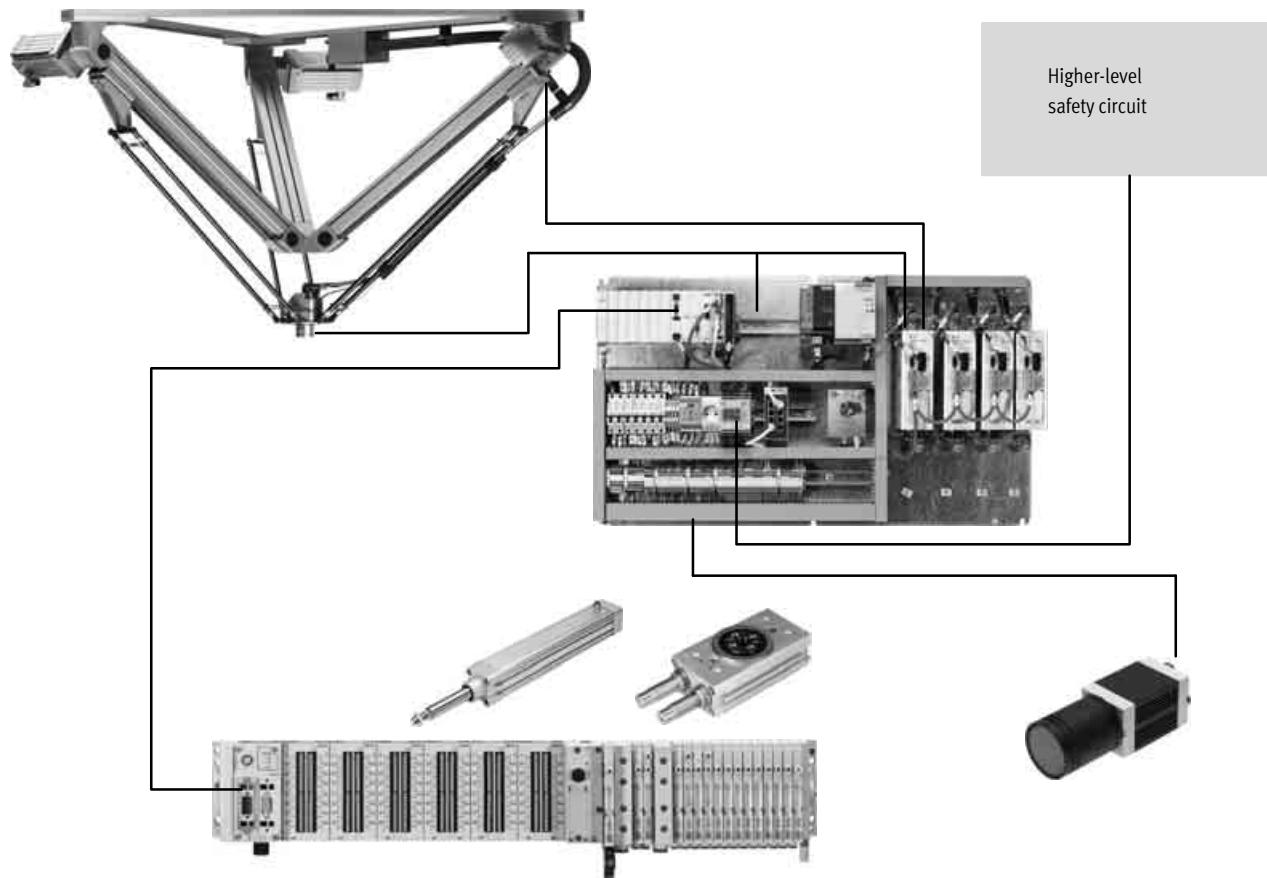

The control solution includes the multi-axis controller CMXR and the motor controller CMMP required for activation. There is also an integrated safety circuit, which together with the teach pendant CDSA represents the basic functionality.

The version with the control cabinet housing also features control elements and fans in the door. The control solution CMCA is pre-programmed and already tested together with the relevant parallel kinematic system.

Additional features:

- Terminals for control cabinet lighting
- Plug socket in the control cabinet for a PC
- Terminals for a camera
- Terminals for 2 proximity sensors per axis

System overview

Connection of the Festo compact vision system

- A 24 V terminal is provided for the power supply
- Communication takes place via the integrated network switch
- Lighting connection:
230 V, 2 A

Connection of kinematic systems or gantries

- Motors are connected directly to the motor controller CMMP-AS
- Terminals for two proximity sensors each are provided for axes 1 to 4

Connection of peripheral equipment or grippers

- It is recommended to only connect time-critical inputs/outputs to the peripheral modules
- Link all other inputs/outputs decentrally via CANopen

Additional emergency stop position

- An additional emergency stop position can be connected directly at the control cabinet

Interface to higher-level safety circuit

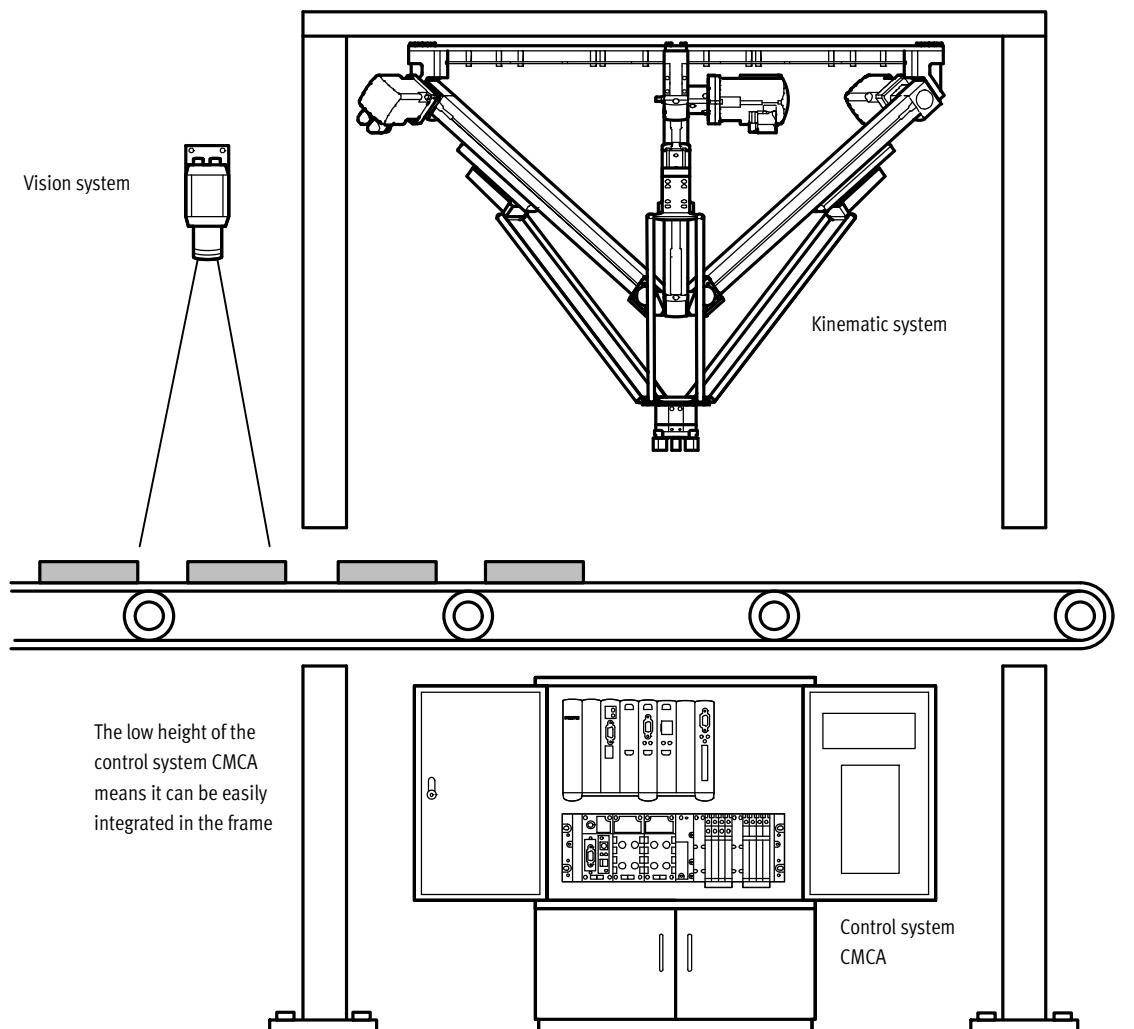

2 channels for safety door contacts	For indicating the status of the safety doors in manual mode
2 channels for external emergency stop	For triggering an emergency stop by means of a higher-level safety circuit
2 floating contacts for emergency stop	For indicating an emergency stop at a higher-level safety circuit
2 inputs for operating mode selection	The operating mode can be selected externally instead of using the integrated key actuator

Control systems CMCA

Key features

Sample application

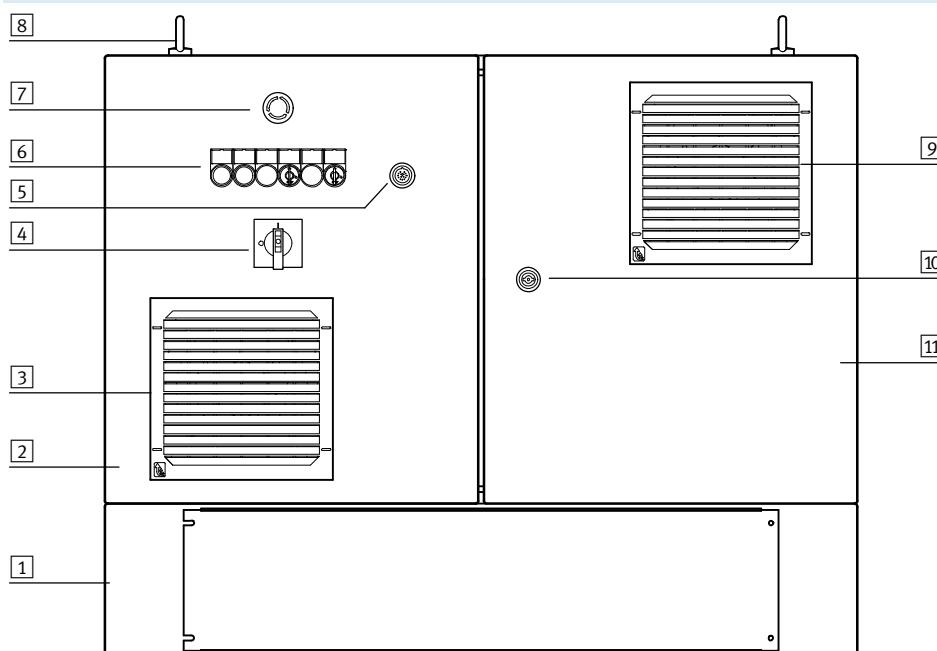

Control systems CMCA

Key features

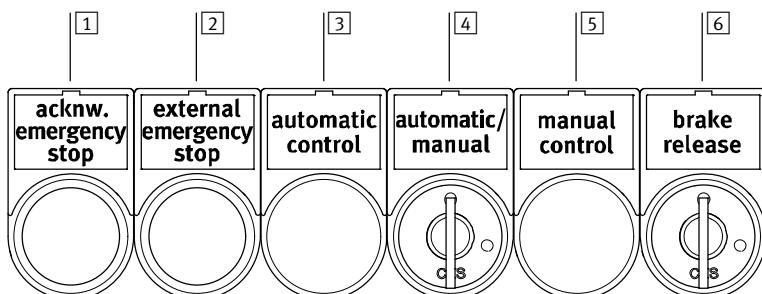

FESTO

Control cabinet

- [1] Base (optional)
- [2] Left control cabinet door
- [3] Cover for control cabinet fan
- [4] Power switch
- [5] Connection for teach pendant CDSA
- [6] Control and signal elements
- [7] Emergency stop switch
- [8] Transport lugs
- [9] Cover for outlet filter
- [10] Lock for control cabinet doors
- [11] Right control cabinet door

Control and signal elements

- - Note

The labels for marking the control elements in German are also included with the control cabinet.

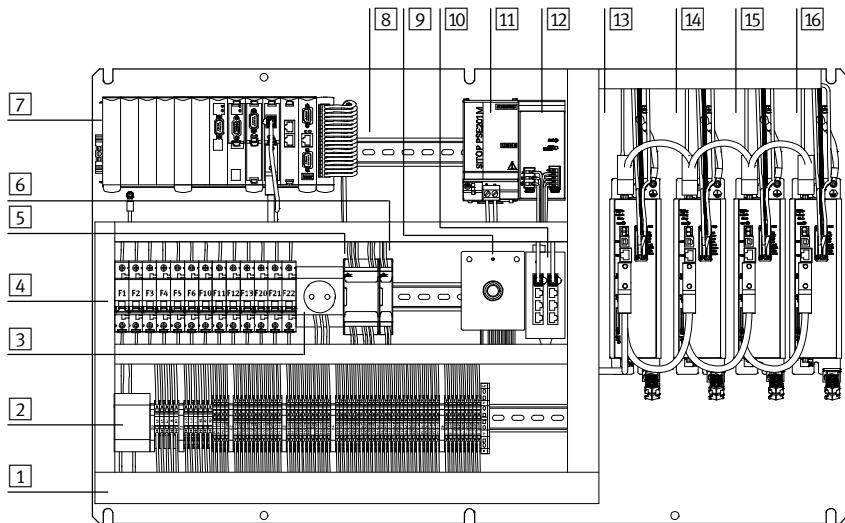

- [1] "acknw. emergency stop" illuminated push-button:
confirms that the emergency stop circuit is unlocked
- [2] "external emergency stop" indicator light:
external emergency stop circuit triggered
- [3] "automatic control" indicator light:
automatic mode active
- [4] "automatic/manual" key actuator:
switches between automatic and manual mode
- [5] "manual control" indicator light:
manual mode active
- [6] "brake release" key actuator:
releases the motor brakes (only possible in manual mode and in combination with enabling button on the teach pendant)

Control systems CMCA

FESTO

Key features

Mounting plate (the actual control system may differ from the one shown, depending on the equipment)

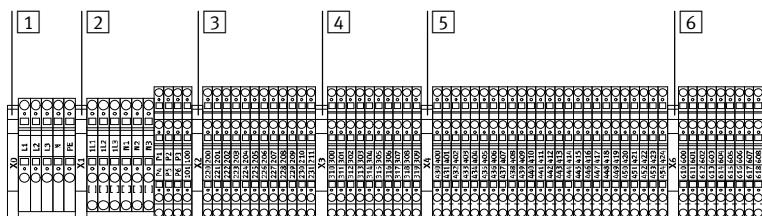

- [1] Terminal strips X0 ... X6
- [2] Monitoring module for mains failure detection (only for characteristic S2)
- [3] Protective contact socket type F for PC (230 V AC, max. 10 A)
- [4] Fuses F1 ... F22
- [5] Safety circuit control system
- [6] Extension for safety circuit control system
- [7] Multi-axis control system
- [8] Additional peripheral modules possible
- [9] Connection for CDSA (on the left door on the control cabinet version)
- [10] Ethernet switch
- [11] Buffer module 24 V DC (only for characteristic S2)
- [12] 24 V DC power supply unit
- [13] Motor controller for axis 1
- [14] Motor controller for axis 2
- [15] Motor controller for axis 3 (option)
- [16] Motor controller for axis 4 (option)

- - Note

Up to 6 other peripheral modules can be connected to the multi-axis controller CMXR (→ Internet: CMXR). These can be connected to the internal power supply. If the additional power requirement exceeds the value

of 1.5 A, these peripheral modules must be supplied with 24 V externally. The plug connectors on the additional cards must be used as terminals.

Overview of interfaces

- [1] X0: Supply upstream of power switch
- [2] X1: Supply downstream of power switch
- [3] X2: 24 V DC control circuit
- [4] X3: Emergency stop
- [5] X4: External emergency stop
- [6] X6: Control and signal elements

Product Range and Company Overview

A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drivers

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
