

## Motor controllers CMMO-ST

**FESTO**

## Motor controllers CMMO-ST

Key features

### At a glance

- The motor controller CMMO-ST is a closed-loop and open-loop position controller
  - Separate load and logic supply
  - Supports the safety function “safe torque off” (STO)
  - Easy actuation via:
    - I/O interface
    - IO-Link or I-Port
    - Modbus TCP
  - Monitoring of freely defined positions and torque ranges
  - Backup file enables seamless device replacement
  - H-rail mounting possible
  - Encoder option (closed loop), in other words no step losses, following errors are corrected
- Parameterisation possible via:
- Configuration package FCT (Festo Configuration Tool)
  - Ethernet interface with integrated web server

### Communication system IO-Link

#### IO-Link

IO-Link is a standardised I/O technology (IEC 61131-9) which enables communication with sensors and actuators.

This is a form of point-to-point communication.

The data profile FHPP is transmitted via the physical interface.

### Specific I-Port interface from Festo

The I-Port interface is based on IO-Link technology and enables communication with sensors and actuators.

The advantage is that the connected devices are automatically detected by Festo (Plug and Work).

The data profile FHPP is transmitted via the physical interface.

### Communication system Modbus TCP

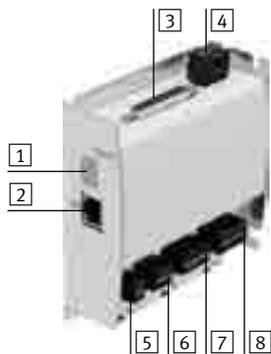

#### Modbus

Modbus TCP is an open communication protocol (IEC 61158) based on the master-slave architecture. It is an established standard for communication via Ethernet-TCP/IP in automation technology.

The data profile FHPP is transmitted via the physical interface.

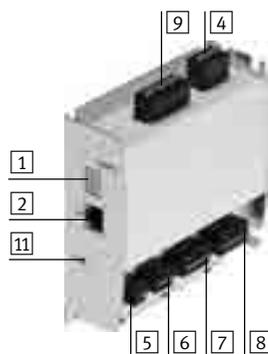

### Description of the interfaces

With I/O interface

- 1** 7-segment display
- 2** Ethernet interface (RJ45)
- 3** I/O interface
- 4** Voltage supply

With IO-Link interface

- 5** Reference switch
- 6** STO safety function
- 7** Encoder
- 8** Motor

- 9** IO-Link interface
- 10** Fastening bracket for mounting on an H-rail
- 11** Status of IO-Link connection

### For actuating

Electric cylinder EPCO

Toothed belt axis ELGR

Rotary drive ERMO

Stepper motor EMMS-ST

# Motor controllers CMMO-ST

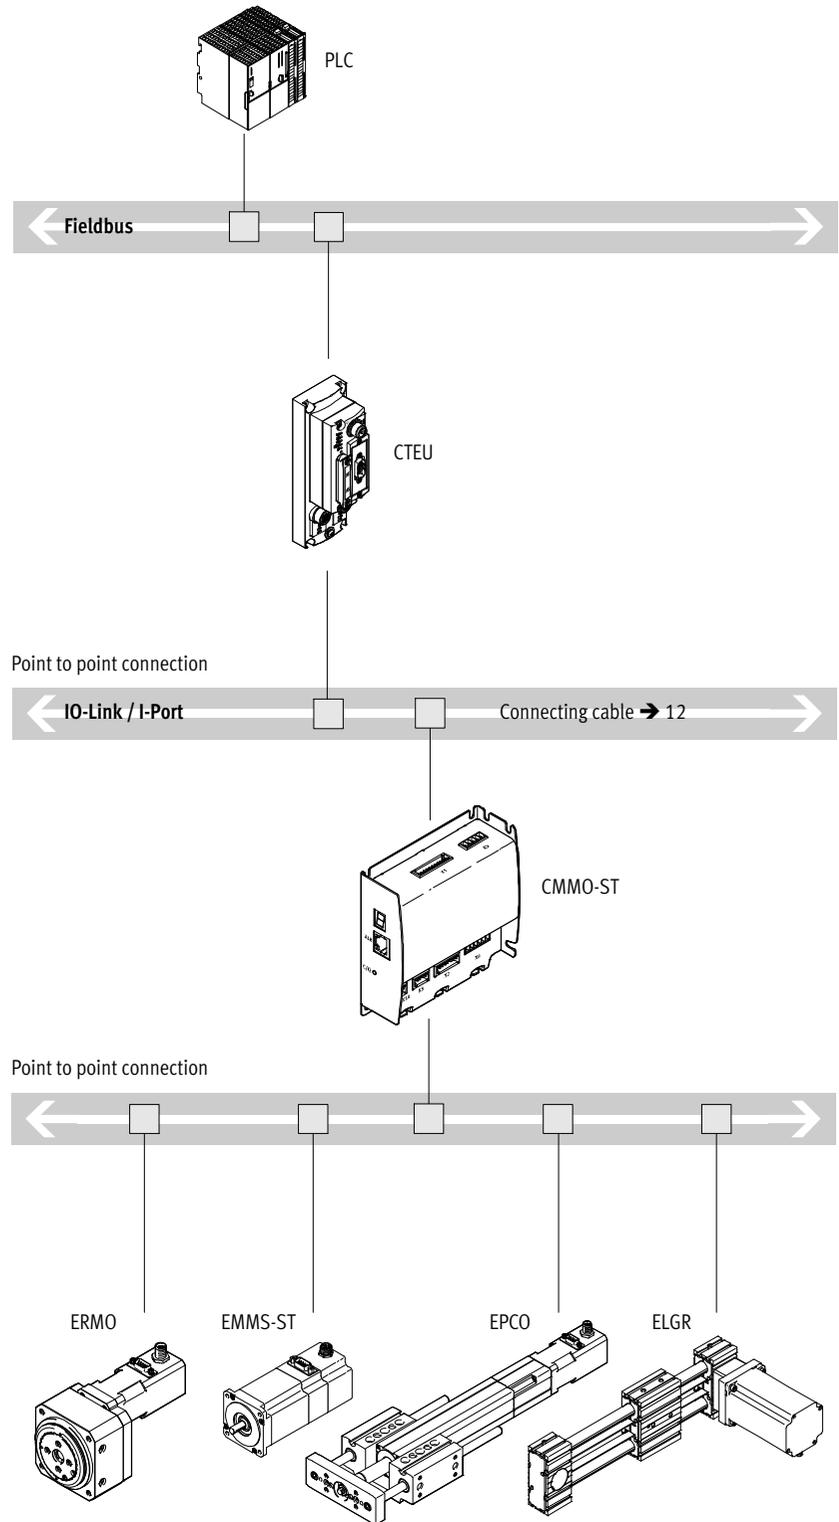

Key features

## System overview

Fieldbus modules CTEU serve as an interface between the PLC controller and the motor controller CMMO-ST. This is then integrated into the control systems of various manufacturers using different bus nodes.

The following protocols are supported using the appropriate module:

- CANopen
- DeviceNet
- EtherCAT
- PROFIBUS
- PROFINET

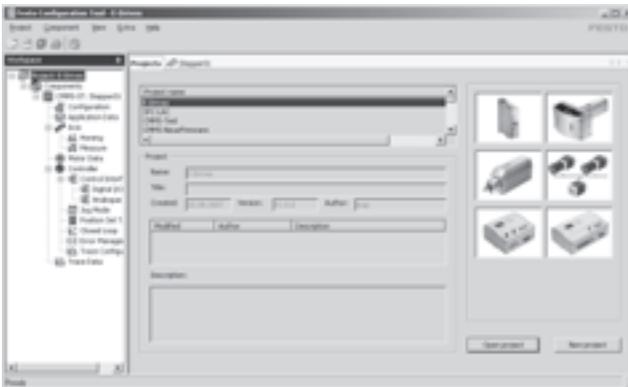

For actuating:  
Electric cylinder EPCO  
Toothed belt axis ELGR  
Rotary drive ERMO  
Stepper motor EMMS-ST

## Motor controllers CMMO-ST

Key features

### FCT software – Festo Configuration Tool

Software platform for electric drives from Festo

- All drives in a system can be managed and saved in a common project
- Project and data management for all supported device types
- Easy to use thanks to graphically supported parameter entry
- Universal mode of operation for all drives
- Work offline at your desk or online at the machine

### Mechanical reference positions and limit positions

- Reference positions can be either edited or taught in
- Flexible adaptation to installation conditions
- Settings are displayed clearly

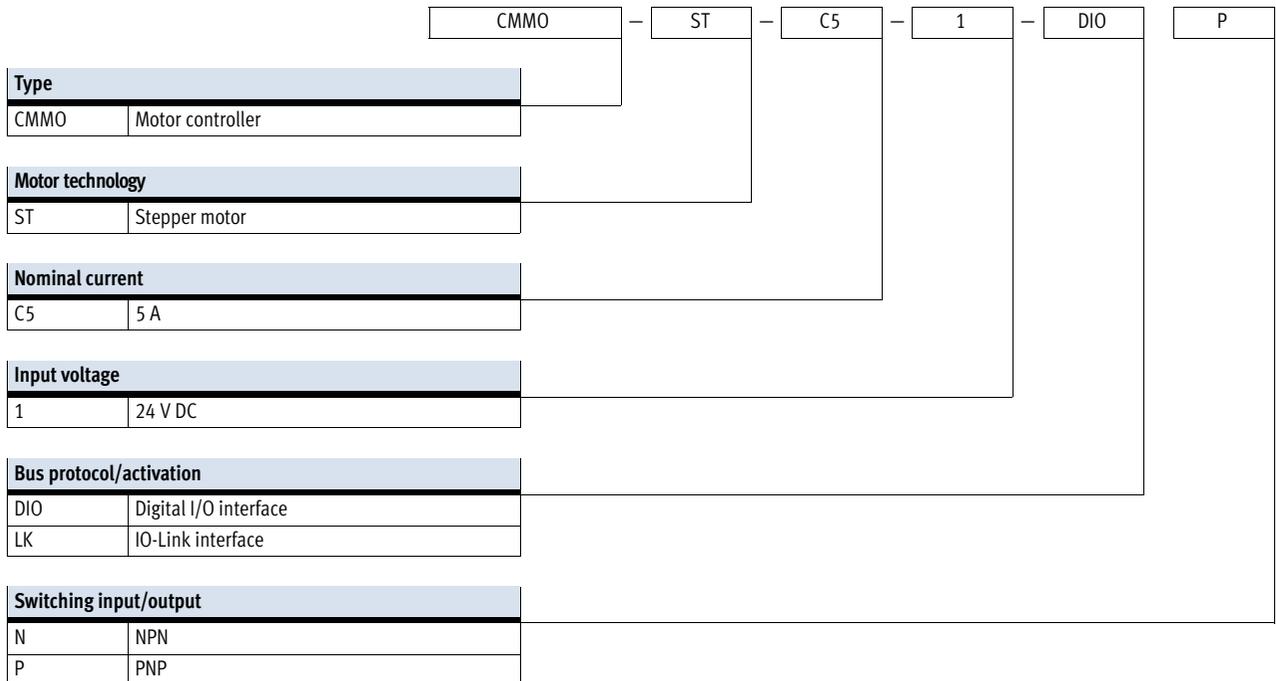

### Position set table

- Up to 64 position sets ensure flexibility in positioning
- Absolute or relative positioning values can be used
- The following parameters can be set flexibly for each application:
  - Position
  - Speed
  - Acceleration
  - Braking ramps
- Force control
- Complete function test

Technical data

General technical data		
Type CMMO-ST-...	-DIO	-LK
Operating mode	Cascade controller with	
	PI speed controller	
	PI current controller	
	P position controller	
	PWM MOSFET power output stage	
Operating mode		
Open-loop operation	Sinusoidal current form	
Closed-loop operation	Controlled sinusoidal current, cascade controller for speed and position	
Display	7-segment display	
Rotary position encoder	Encoder	
Encoder interface input	RS422	
Parameterisation interface	Ethernet	
Ethernet, supported protocols	TCP/IP	TCP/IP, TCP mode
Protocol	–	IO-Link
		I-Port
		Modbus TCP
Position sets	32	64
Communication profile	–	FHPP
Number of digital logic inputs	11	1
Number of digital logic outputs	11	3
Characteristics of digital logic outputs	Freely configurable in some cases	
	Not galvanically isolated	
Adjustable current reduction	Via software	
Nominal current setting	Via software	
Braking resistor	[Ω]	15
Pulse power of braking resistor	[kVA]	0.1
Mains filter	Integrated	
Type of mounting	Screwed onto connecting plate, lying down or upright	
	Via H-rail	
Product weight	[g]	290

## Product Range and Company Overview

### A Complete Suite and Company Overview

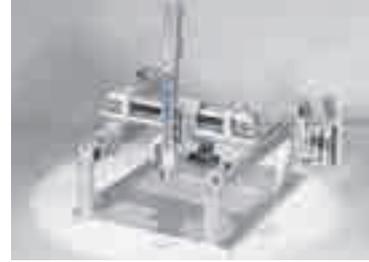

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

### The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drivers

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
