System expansion (examples)	CPX-CEC as a stand-alone or remote controller	CPX-CEC-C1 as a CANopen fieldbus master

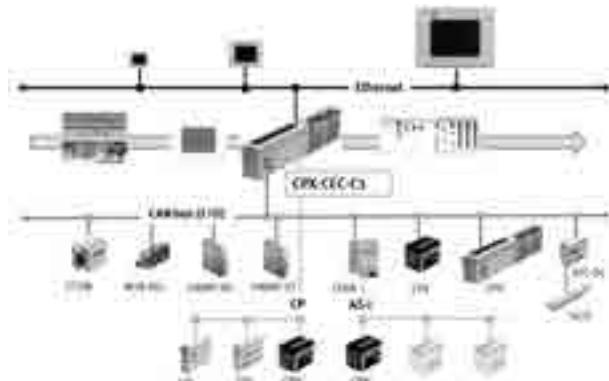

When using external devices, data communication must be programmed by the user.

## System expansion (examples)

CPX-CEC as a stand-alone or remote controller

CPX-CEC-C1 as a CANopen fieldbus master

# Control blocks CPX-CEC-...-V3

FESTO

Key features

## Advantages for users

### Increased performance

Improved cycle times – more connectable actuators.  
Compatibility with almost all control systems on the market is ensured via the CPX terminal.

The extensive CODESYS function library provides diagnostics and condition monitoring options.

### Reduced costs

For standardised pre-processing: reduces installation costs as an intelligent remote I/O terminal to IP65/IP67 directly at the machine.

The control blocks CPX-CEC-...-V3 are ideally adapted to CPX and motion applications with up to 127 axes.

### Simple, yet efficient: decentralised structures

The modular I/O system with up to 512 I/Os and CAN master functionality offers complete flexibility, whether for open-loop or closed-loop control.

Stand-alone for low-cost automation of manual workstations, for example, or remote control with pre-processing.

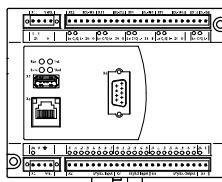

### The only one in the world to IP65

The fully integrated automation platform for standard, proportional and servopneumatics, sensors and motion control to IP65.

Simple commissioning is also included.

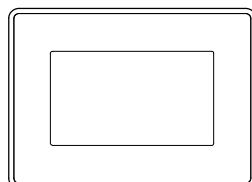

## Classification of CPX-CEC in the portfolio for multi-axis controllers for electric drive technology

### Compact controller CEC

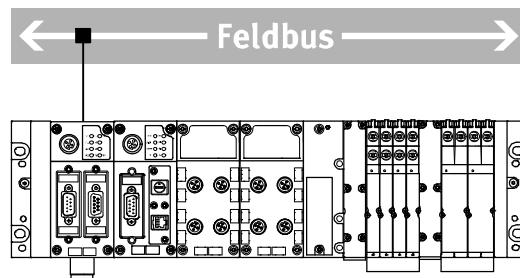

Compact and with more functions. For controlling electric and pneumatic drives for small tasks.  
Stand-alone or in mechatronic solutions via CODESYS V3 provided by Festo.

### Integrated controller in CDPX

Display generation with integrated controller with CODESYS V3 provided by Festo, powerful processors, combined with widescreen technology for greater functionality, higher resolution and versatile access options.

### Integrated control blocks in CPX terminal: CPX-CEC

CODESYS V3 provided by Festo for the best valve/sensor terminal on the market: CPX-CEC reduces installation costs as an intelligent remote system to IP65/IP67 directly at the machine.

Ideal for CPX terminal and motion applications with up to 127 electric drives, PTP and SoftMotion applications up to 3D plus auxiliary axes.

# Control blocks CPX-CEC-...-V3

FESTO

Technical data

## IT services:

The CODESYS controller is a modern control system for CPX terminals that enables programming with CODESYS to IEC 61131-3.

The power supply to and communication with other modules takes place via the interlinking block.

In addition to network connections, LEDs are also provided for the bus status, operating status of the PLC and CPX peripherals information, as are switching elements and a diagnostic interface for CPX-MMI and CPX-FMT.

## Application

### Bus connection

The CPX-CEC is a remote controller that can be connected to a master PLC via the fieldbus nodes of the CPX terminal or via Ethernet. At the same

time, it is possible to operate the CPX-CEC as a compact stand-alone controller directly on the machine.

### Communication protocols

- Fieldbus via CPX fieldbus nodes
- Modbus/TCP
- EasyIP

### Operating modes

- Stand-alone
- Remote controller, fieldbus
- Remote controller, Ethernet

### Setting options

The CPX-CEC has the following interfaces for monitoring, programming and commissioning:

- For the CPX-MMI/-FMT
- Ethernet interface for IT applications
- Remote diagnostics

The operating mode and fieldbus protocol are set using the DIL switch on the CPX-CEC.

The integrated web server offers a convenient means of querying data saved in the CPX-CEC.

### Features

- Easy actuation of valve terminal configurations with MPA, VTSA
- Diagnostics with flexible monitoring options for pressure, flow rate, cylinder operating time, air consumption

- Actuation of decentralised installation systems on the basis of CPI actuation of applications in proportional pneumatics
- AS-Interface actuation via gateway
- Connection to all fieldbuses as a

- remote controller and for pre-processing
- Actuation of electric drives as individual axes via CANopen (CPX-CEC-C1-V3 and CPX-CEC-M1-V3)

- Early warnings and visualisation options
- Closed-loop pneumatic applications

## Product Range and Company Overview

### A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

### The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drivers

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
