# Cylinders with displacement encoder

Features

FESTO

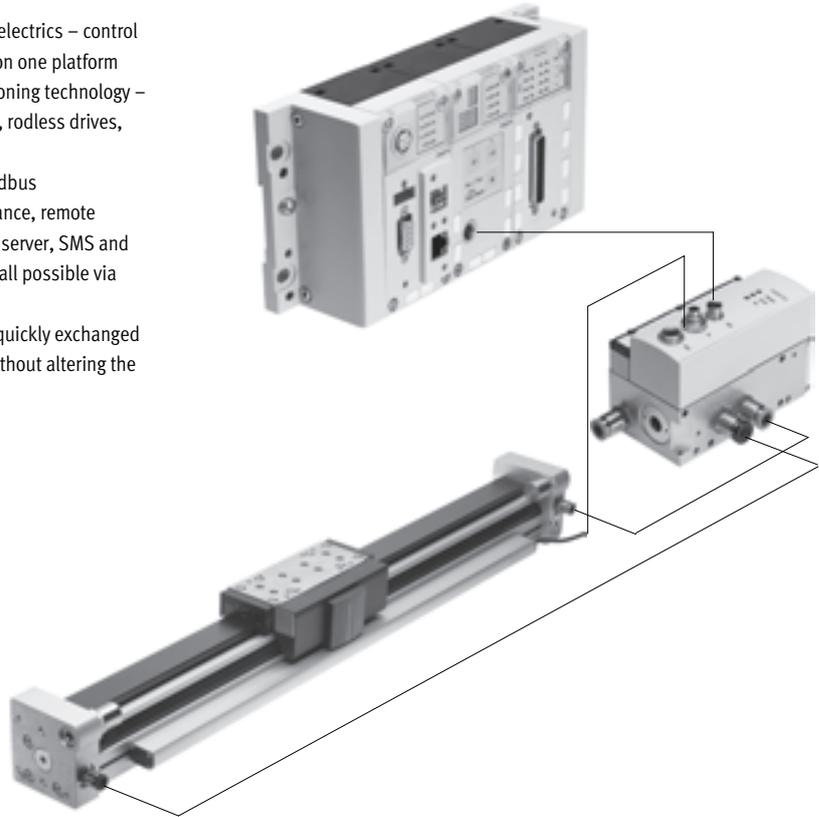

## Servopneumatic drive technology

Positioning and Soft Stop applications as an integral component of the valve terminal CPX – the modular peripheral system for decentralised automation tasks.

The modular design means that valves, digital inputs and outputs, positioning modules and end-position controllers, as appropriate to the application, can be combined in almost any way on the CPX terminal.

Advantages:

- Pneumatics and electrics – control and positioning on one platform
- Innovative positioning technology – piston rod drives, rodless drives, rotary drives
- Actuation via fieldbus
- Remote maintenance, remote diagnostics, web server, SMS and e-mail alerts are all possible via TCP/IP
- Modules can be quickly exchanged and expanded without altering the wiring

## Axis controller CPX-CMAX

Free choice:

Position and force control, directly actuated or selected from one of 64 configurable position sets. If you are looking for something more: the configurable function for switching to the next set enables simple functional sequences to be realised with the axis controller CPX-CMAX.

All stations are recognised as: the auto-identification function identifies each participant with its device data on the controller CPX-CMAX.

Also included:

The functional scope of the controller CPX-CMAX includes actuation of a brake or clamping unit via the proportional directional control valve VPWP.

Up to 8 modules (max. 8 axes) can be operated in parallel and independently of each other. Commissioning via FCT (Festo configuration software) or via fieldbus: no programming, only configuration.

Technical data → Internet: [cpx-cmax](http://cpx-cmax)

Advantages:

- Greater flexibility
- OEM friendly – commissioning also via fieldbus
- Easy installation and fast commissioning
- Cost-effective
- You program the system in your PLC environment

# Cylinders with displacement encoder

Features

FESTO

## End-position controller CPX-CMPX

Fast travel between the mechanical end stops of the cylinder, stopping gently and without impact in the end position.  
Fast commissioning via control panel, fieldbus or handheld unit. Improved control of downtime. Actuation of a brake or clamping unit via the proportional directional control valve VPWP is an integral part of the controller CMPX.

Depending on the fieldbus chosen, up to 9 end-position controllers can be actuated on the CPX terminal. All system data can be read and written via the fieldbus, including, for example, the mid positions.

Technical data → Internet: [cpx-cmpx](#)

Advantages:

- Greater flexibility
- OEM friendly – commissioning also via fieldbus
- Easy installation and fast commissioning
- Cost-effective
  - up to 30% faster cycle rates
  - significantly reduced system vibration
- Improved work ergonomics thanks to significantly reduced noise level
- The extended diagnostics help to reduce the service time of the machine

## Proportional directional control valve VPWP

The 5/3-way proportional directional control valve for applications with Soft Stop and pneumatic positioning. Fully digitalised – with integrated pressure sensors, with new diagnostic functions. In sizes 4, 6, 8 and 10. Flow rate of 350, 700, 1400 and 2000 l/min.

With switching output for actuating a brake. Coloured supply ports. Pre-assembled cables guarantee faultless and fast connection with the controllers CPX-CMPX and CPX-CMAX.

Technical data → Internet: [vpwp](#)

Advantages:

- Easy installation and fast commissioning
- Reduction of system downtimes thanks to the new diagnostic options
- With switching output for actuating a brake/clamping unit

## Measuring module CPX-CMIX

Fully digital data acquisition and transmission means that pneumatic cylinders can be used as sensors. With very high repetition accuracy and incorporating both analogue and digital measuring sensors.

Suitable for the linear drive DGCI with displacement encoder for measuring absolute values, for the piston rod drive DNCI/DDPC with incremental displacement encoder or even for a potentiometer of the type MLO.

Technical data → Internet: [cpx-cmix](#)

Advantages:

- All process steps can be documented, which improves quality
- An adjustable contact force (via pressure regulator) increases the precision of the "displacement sensor"
- With displacement encoders for measuring absolute values, the actual position is immediately available after the system is switched on

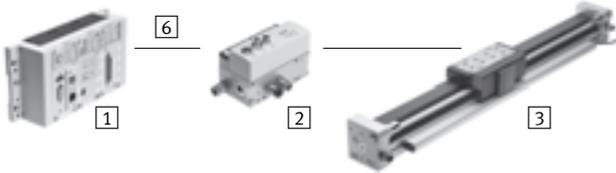

# Cylinders with displacement encoder

Drive options

FESTO

## System with linear drive DDLI, DGCI

Technical data → Internet: [ddli](#) or [dgci](#)

- 1 Controller module CPX-CMPX or CPX-CMAX
- 2 Proportional directional control valve VPWP
- 3 Linear drive DDLI, DGCI with displacement encoder
- 6 Connecting cable KVI-CP-3...

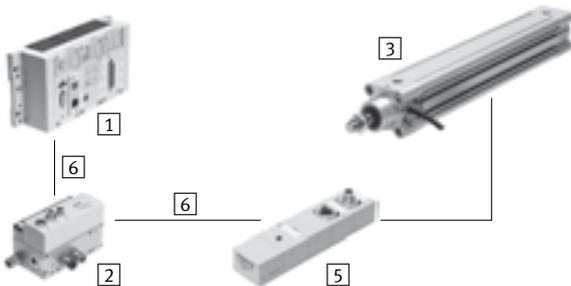

- Pneumatic rodless linear drive with displacement encoder, with or without recirculating ball bearing guide
- Displacement encoder with absolute and contactless measurement
- Diameters:
  - DGCI: 18 ... 63 mm
  - DDLI: 25 ... 63 mm
- Stroke: 100 ... 2000 mm in fixed lengths
- Range of applications: Soft Stop and pneumatic positioning
- Loads from 1 ... 180 kg
- No sensor interface required

Advantages:

- Complete drive unit
- DDLI for easy connection to customer's guide system
- Excellent running characteristics
- For fast and accurate positioning down to  $\pm 0.2$  mm (only with axis controller CPX-CMAX)

## System with standard cylinder DNCI, DDPC

Technical data → Internet: [dnci](#)

- 1 Controller module CPX-CMPX or CPX-CMAX
- 2 Proportional directional control valve VPWP
- 3 Standard cylinder DNCI, DDPC with displacement encoder
- 5 Sensor interface CASM-S-D3-R7
- 6 Connecting cable KVI-CP-3...

- Standard cylinder with integrated displacement encoder, conforms to DIN ISO 6432, VDMA 24 562, NF E 49 003.1 and Uni 10 290
- Displacement encoder with contactless and incremental measuring
- Diameter: 32 ... 100 mm
- Stroke: 100 ... 750 mm
- Range of applications: Soft Stop and pneumatic positioning
- Loads from 3 ... 450 kg and a matching sensor interface CASM-S-D3-R7
- Pre-assembled cables guarantee faultless and fast electrical connection

Advantages:

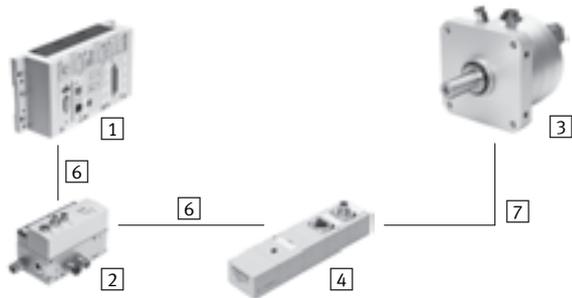

- Compact drive unit
- Can be used universally
- Also with guide unit
- For fast and accurate positioning up to  $\pm 0.5$  mm (only with axis controller CPX-CMAX)

# Cylinders with displacement encoder

Drive options

## System with swivel module DSMI

Technical data → Internet: [dsmi](#)

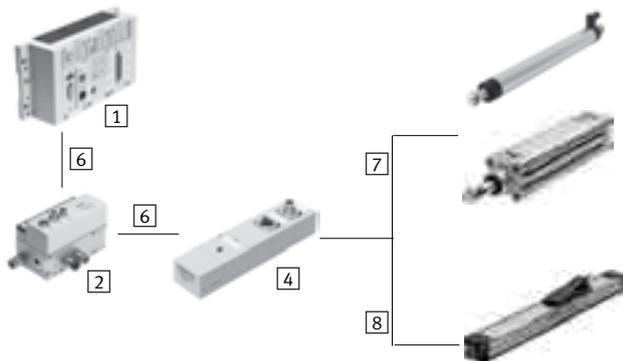

- 1 Controller module CPX-CMPX or CPX-CMAX
- 2 Proportional directional control valve VPWP
- 3 Swivel module DSMI with displacement encoder
- 4 Sensor interface CASM-S-D2-R3
- 6 Connecting cable KVI-CP-3-...
- 7 Connecting cable NEBC-P1W4-K-0,3-N-M12G5

- Swivel module DSMI with integrated displacement encoder
- Identical design to pneumatic swivel module DSM
- Absolute displacement encoder based on a potentiometer
- Swivel range of 0 ... 270°
- Size: 25, 40, 63
- Max. torque: 5 ... 40 Nm
- Range of applications: Soft Stop and pneumatic positioning
- Mass moments of inertia from 15 ... 6000 kgcm<sup>2</sup> and a matching sensor interface CASM-S-D2-R3
- Pre-assembled cables guarantee faultless and fast connection with the proportional directional control valve VPWP

- Advantages:
- Complete drive unit, compact, can be used immediately
  - High angular acceleration
  - With adjustable fixed stops
  - For fast and accurate positioning down to ±0.2° (only with axis controller CPX-CMAX)

## System with potentiometer

Technical data → Internet: [casm](#)

- 1 Controller module CPX-CMPX or CPX-CMAX
- 2 Proportional directional control valve VPWP
- 4 Sensor interface CASM-S-D2-R3
- 6 Connecting cable KVI-CP-3-...
- 7 Connecting cable NEBC-P1W4-K-0,3-N-M12G5
- 8 Connecting cable NEBC-A1W3-K-0,4-N-M12G5

- Attachable potentiometers with absolute measurement, with high degree of protection
- With connecting rod or moment compensator
- Measuring range:  
Connecting rod: 100 ... 750 mm  
Moment compensator: 225 ... 2000 mm
- Pre-assembled cables guarantee faultless and fast connection with the sensor interface CASM
- Range of applications: Soft Stop and pneumatic positioning with cylinder Ø 25 ... 80 mm, e.g. DNC or DSBC
- Loads from 1 ... 300 kg

- Advantages:
- Easy installation and fast commissioning
  - Cost-effective
  - Can also be used in harsh ambient conditions
  - Variety of drives: CPX-CMPX and CPX-CMAX also support cylinders with external displacement encoder

FESTO

**Note**  
 If the drive DNCl is used without an end-position controller CPX-CMPX, SPC11 or axis controller CPX-CMAX, e.g. as a measuring cylinder, then the standard accessories for the drive DNC can be used.

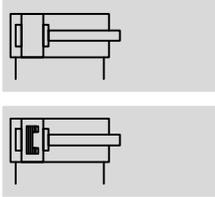

Accessories		
Type	Description	→ Page/Internet
1 Rod eye SGS	With spherical bearing	25
2 Foot mounting HNC	For mounting the drive on the bearing and end cap	24
3 Flange mounting FNC	For mounting the drive on the bearing and end cap	25
4 Slot cover ABP-5-S	For protecting against the ingress of dirt	27
5 Guide unit <sup>1)</sup> FENG-KF	For protecting against rotation at high torque loads	22
6 Push-in fitting QS	For connecting compressed air tubing with standard O.D.	27
7 Proximity sensor SME/SMT-8	For additional sensing of the piston position, can be ordered optionally, only in combination with the order code A in the modular products section for the drive	proximity sensor
8 Trunnion mounting kit DAMT	For swivelling movements of the drive	26
9 Trunnion support LNZG	For securing the trunnion mounting kit DAMT	26

1) Guide unit FENG-KF must be attached to the piston rod in a way that eliminates backlash

-  - Diameter  
32 ... 63 mm
-  - Stroke length  
10 ... 2000 mm

General technical data				
Piston Ø	32	40	50	63
Based on standard	ISO 15552			
Design	Piston			
	Piston rod			
	Profile barrel			
Mode of operation	Double-acting			
Guide <sup>1)</sup>	Guide rod with yoke, with ball bearing guide			
Mounting position	Any			
Type of mounting	Via accessories			
Cushioning	Elastic cushioning rings/pads at both ends			
Position sensing	Integrated displacement encoder			
	Via proximity sensor <sup>2)</sup>			
Measuring principle (displacement encoder)	Encoder, contactless and relative measurement			
Pneumatic connection	G1/8	G1/4	G1/4	G3/8
Stroke				
DNCI-... <sup>3)</sup>	[mm]	10 ... 2000		
DNCI-...-FENG	[mm]	100 ... 500		
Extended piston rod	[mm]	1 ... 500		

- 1) Guide unit FENG-KF can be ordered via the modular product system (feature FENG) and is supplied attached. The maximum stroke is restricted
- 2) Not included in the scope of delivery, can be ordered as an option
- 3) Can only be used without restriction as a positioning drive in the range from 100 ... 750 mm.  
Note stroke reduction in combination with CPX-CMAX

# Standard cylinders DNCI, with integrated displacement encoder

Technical data

Operating and environmental conditions		
Operating pressure	[bar]	0.6 ... 12
Operating pressure <sup>1)</sup>	[bar]	4 ... 8
Operating medium <sup>2)</sup>		Compressed air according to ISO 8573-1:2010 [6:4:4]
Note about the operating/pilot medium		Lubricated operation not possible Pressure dew point 10 °C below ambient/medium temperature
Ambient temperature <sup>3)</sup>	[°C]	-20 ... +80
Vibration resistance to DIN/IEC 68, Part 2-6		Severity level 2
Continuous shock resistance to DIN/IEC 68, Part 2-82		Severity level 2
CE marking (see declaration of conformity) <sup>4)</sup>		To EU EMC Directive
Corrosion resistance class CRC <sup>5)</sup>		1

- 1) Only applies to applications with end-position controller CPX-CMPX, SPC11 and axis controller CPX-CMAX
- 2) The proportional directional control valve VPWP, MPYE requires these characteristic values
- 3) Note operating range of proximity sensors
- 4) For information about the applicability of the component see the manufacturer's EC declaration of conformity at: [www.festo.com/sp](http://www.festo.com/sp) → User documentation.  
If the component is subject to restrictions on usage in residential, office or commercial environments or small businesses, further measures to reduce the emitted interference may be necessary.
- 5) Corrosion resistance class 1 according to Festo standard 940 070  
Components subject to low corrosion stress. Transport and storage protection. Parts that do not have primarily decorative surface requirements, e.g. in internal areas that are not visible or behind covers.

Forces [N] and impact energy [Nm]				
Piston ∅	32	40	50	63
Theoretical force at 6 bar, advancing	483	754	1178	1870
	S2 415	633	990	1682
Theoretical force at 6 bar, retracting	415	633	990	1682
	S2 415	633	990	1682
Impact energy in the end positions	0.1	0.2	0.2	0.5

Permissible impact velocity:

$$v_{perm.} = \sqrt{\frac{2 \times E_{perm.}}{m_{dead} + m_{load}}}$$

Maximum permissible load:

$$m_{load} = \frac{2 \times E_{perm.}}{v^2} - m_{dead}$$

$v_{perm.}$  Permissible impact velocity  
 $E_{perm.}$  Max. impact energy  
 $m_{dead}$  Moving mass (drive)  
 $m_{load}$  Moving effective load

 Note  
 These specifications represent the maximum values that can be achieved. Note the maximum permissible impact energy.

# Standard cylinders DNCI, with integrated displacement encoder

Technical data

Positioning characteristics with axis controller CPX-CMAX					
Piston Ø		32	40	50	63
Stroke	[mm]	100 ... 750			
Mounting position		Any			
Resolution	[mm]	0.01			
Repetition accuracy	[mm]	≤ ±0.5			
Minimum load, horizontal	[kg]	3	5	8	12
Maximum load, horizontal	[kg]	45	75	120	180
Minimum load, vertical <sup>1)</sup>	[kg]	3	5	8	12
Maximum load, vertical <sup>1)</sup>	[kg]	15	25	40	60
Minimum travel speed	[m/s]	0.05			
Maximum travel speed	[m/s]	1.5			
Typical positioning time, long stroke <sup>2)</sup>	[s]	0.45/0.70	0.50/0.75	0.65/0.80	0.55/0.75
Typical positioning time, short stroke <sup>3)</sup>	[s]	0.35/0.55	0.40/0.55	0.45/0.60	0.40/0.55
Minimum positioning stroke <sup>4)</sup>	[%]	≤ 3			
Stroke reduction <sup>5)</sup>	[mm]	10		15	
Recommended proportional directional control valve					
For CPX-CMAX		→ 27			

- 1) Only in combination with an external guide
- 2) At 6 bar, horizontal mounting position, DNCI-XX-500, 400 mm travel at min./max. load
- 3) At 6 bar, horizontal mounting position, DNCI-XX-500, 100 mm travel at min./max. load
- 4) In relation to the maximum stroke of the drive, but never more than 20 mm
- 5) The stroke reduction must be maintained on each side of the drive, the max. positionable stroke is therefore: stroke – 2x stroke reduction

Force control characteristics with axis controller CPX-CMAX					
Piston Ø		32	40	50	63
Stroke	[mm]	100 ... 750			
Mounting position		Any			
Maximum controllable force <sup>1)</sup>	[N]	435/375	680/570	1060/890	1685/1515
Typical friction forces <sup>2)</sup>	[N]	30	40	70	70
Repetition accuracy of pressure control <sup>3)4)</sup>	[%]	< ±2			

- 1) Advancing/retracting at 6 bar
- 2) These values can fluctuate greatly from cylinder to cylinder and are not guaranteed. These friction forces must also be taken into consideration when using an external guide or when the cylinder is moving other components subject to friction
- 3) This value defines the repetition accuracy with which the internal differential pressure in the cylinder is controlled and refers to the maximum controllable force (the internal differential pressure corresponds to the prescribed force setpoint value)
- 4) The effective force at the workpiece and its accuracy depends largely on the friction in the system as well as the repetition accuracy of the internal control system. Note that friction forces always work against the direction of movement of the piston. The following formula can be used as a rule of thumb for the force F at the workpiece:  

$$F = F_{\text{setpoint}} \pm F_{\text{friction forces}} \pm \text{repetition accuracy of pressure control}$$

# Standard cylinders DNCI, with integrated displacement encoder

## Materials

Sectional view

Standard cylinder	
1	Piston rod High-alloy steel
2	Cylinder barrel Anodised aluminium
3	Bearing/end caps Die-cast aluminium
-	Dynamic seals Polyurethane TPE-U
-	Static seals NBR
Note on materials RoHS-compliant	
Displacement encoder	
-	Sensor housing Polyacetal
-	Cable sheath Polyurethane
-	Plug housing Polybutylene terephthalate
-	Mounting plate Polyacetal
-	Screws for mounting plate Steel

# Standard cylinders DNCI, with integrated displacement encoder

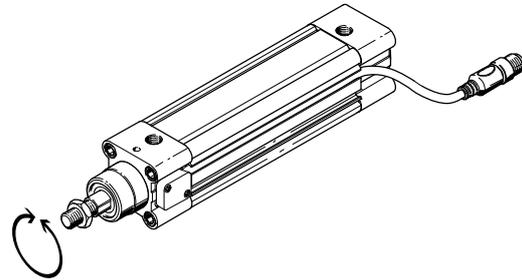

Technical data

## Torques and lateral forces

The piston rod must not absorb any torque. We therefore recommend that an external guide FENG-KF be used with the drive DNCI. The guide unit is supplied attached.

The permissible static and dynamic characteristic load values with and without attached guide as well as with regard to the technical data of the variants (S2, S8, S9)

→ Internet: dnc

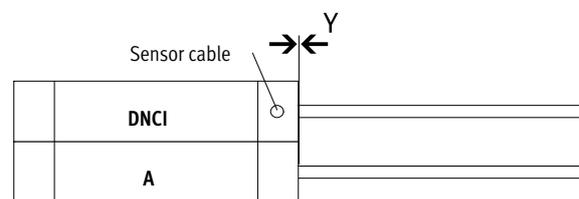

## Mounting conditions

When mounting a drive A with magnet (for position sensing) next to a standard cylinder DNCI, the following conditions must be observed:

- X Minimum distance between the drives
- Y Offset between the drives on the bearing cap

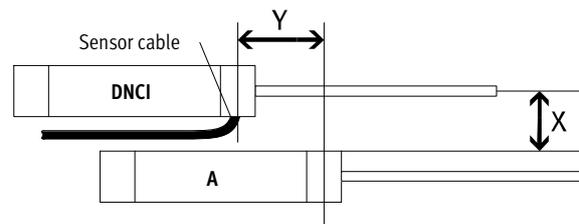

### Parallel assembly

If the offset  $Y = 0$  mm, the drives can be assembled directly next to one another.

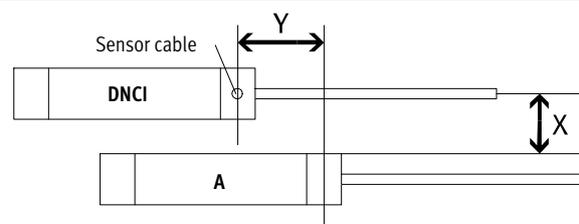

### Offset assembly, cable outlet between the drives

If the offset is  $Y > 0$  mm and the cable outlet is between the drives, a distance of  $X > 70$  mm must be observed.

### Offset assembly, cable outlet upwards or downwards

If the offset is  $Y > 0$  mm and the cable outlet is up or down, a distance of  $X > 60$  mm must be observed.

## Product Range and Company Overview

### A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

### The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drivers

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
