# Cylinders with displacement encoder

Features

FESTO

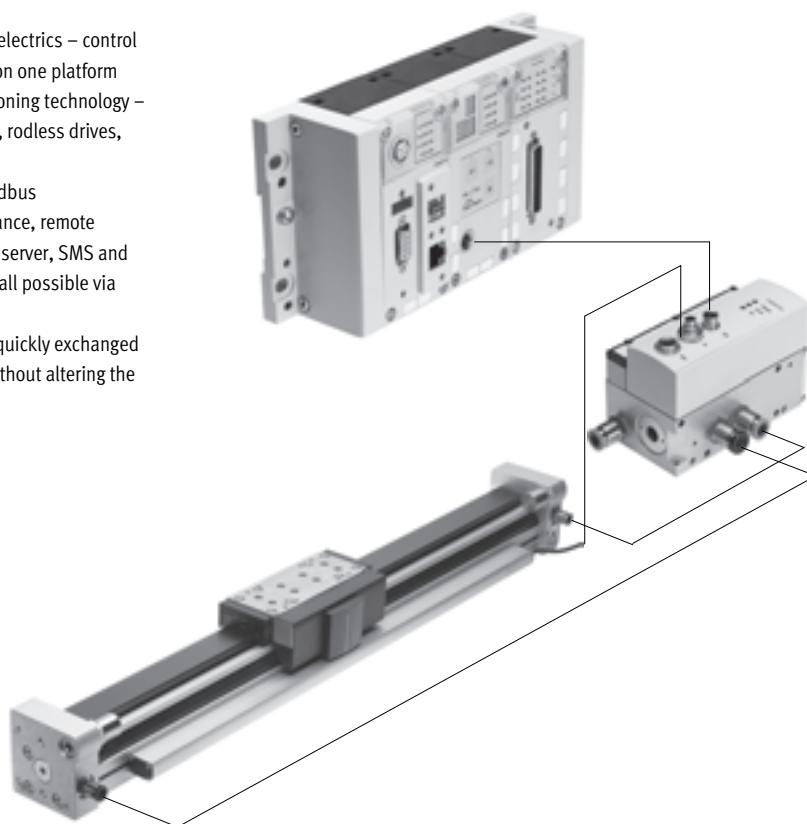

## Servopneumatic drive technology

Positioning and Soft Stop applications as an integral component of the valve terminal CPX – the modular peripheral system for decentralised automation tasks.

The modular design means that valves, digital inputs and outputs, positioning modules and end-position controllers, as appropriate to the application, can be combined in almost any way on the CPX terminal.

### Advantages:

- Pneumatics and electrics – control and positioning on one platform
- Innovative positioning technology – piston rod drives, rodless drives, rotary drives
- Actuation via fieldbus
- Remote maintenance, remote diagnostics, web server, SMS and e-mail alerts are all possible via TCP/IP
- Modules can be quickly exchanged and expanded without altering the wiring

Axis controller CPX-CMAX

### Free choice:

Position and force control, directly actuated or selected from one of 64 configurable position sets. If you are looking for something more: the configurable function for switching to the next set enables simple functional sequences to be realised with the axis controller CPX-CMAX.

All stations are recognised as: the auto-identification function identifies each participant with its device data on the controller CPX-CMAX.

### Also included:

The functional scope of the controller CPX-CMAX includes actuation of a brake or clamping unit via the proportional directional control valve VPWP. Up to 8 modules (max. 8 axes) can be operated in parallel and independently of each other. Commissioning via FCT (Festo configuration software) or via fieldbus: no programming, only configuration.

Technical data ➔ Internet: cpx-cmax

### Advantages:

- Greater flexibility
- OEM friendly – commissioning also via fieldbus
- Easy installation and fast commissioning
- Cost-effective
- You program the system in your PLC environment

# Cylinders with displacement encoder

FESTO

## Features

### End-position controller CPX-CMPX

Fast travel between the mechanical end stops of the cylinder, stopping gently and without impact in the end position.  
Fast commissioning via control panel, fieldbus or handheld unit.  
Improved control of downtime.  
Actuation of a brake or clamping unit via the proportional directional control valve VPWP is an integral part of the controller CMPX.

Depending on the fieldbus chosen, up to 9 end-position controllers can be actuated on the CPX terminal.  
All system data can be read and written via the fieldbus, including, for example, the mid positions.

### Technical data → Internet: cpx-cmpx

- Advantages:
- Greater flexibility
  - OEM friendly – commissioning also via fieldbus
  - Easy installation and fast commissioning
  - Cost-effective
    - up to 30% faster cycle rates
    - significantly reduced system vibration
  - Improved work ergonomics thanks to significantly reduced noise level
  - The extended diagnostics help to reduce the service time of the machine

### Proportional directional control valve VPWP

The 5/3-way proportional directional control valve for applications with Soft Stop and pneumatic positioning.  
Fully digitalised – with integrated pressure sensors, with new diagnostic functions.  
In sizes 4, 6, 8 and 10  
Flow rate of 350, 700, 1400 and 2000 l/min.

With switching output for actuating a brake.  
Coloured supply ports.  
Pre-assembled cables guarantee faultless and fast connection with the controllers CPX-CMPX and CPX-CMAX.

### Technical data → Internet: vpwp

- Advantages:
- Easy installation and fast commissioning
  - Reduction of system downtimes thanks to the new diagnostic options
  - With switching output for actuating a brake/clamping unit

### Measuring module CPX-CMIX

Fully digital data acquisition and transmission means that pneumatic cylinders can be used as sensors.  
With very high repetition accuracy and incorporating both analogue and digital measuring sensors.

Suitable for the linear drive DGCI with displacement encoder for measuring absolute values, for the piston rod drive DNCI/DDPC with incremental displacement encoder or even for a potentiometer of the type MLO.

### Technical data → Internet: cpx-cmix

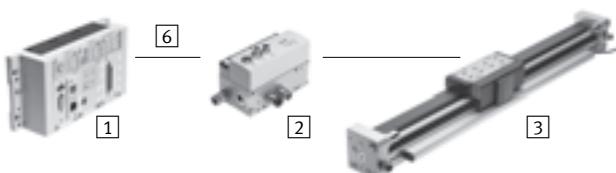

- Advantages:
- All process steps can be documented, which improves quality
  - An adjustable contact force (via pressure regulator) increases the precision of the "displacement sensor"
  - With displacement encoders for measuring absolute values, the actual position is immediately available after the system is switched on

## Cylinders with displacement encoder

Drive options

FESTO

System with linear drive DDLI, DGCI

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [3] Linear drive DDLI, DGCI with displacement encoder
- [6] Connecting cable KVI-CP-3-...

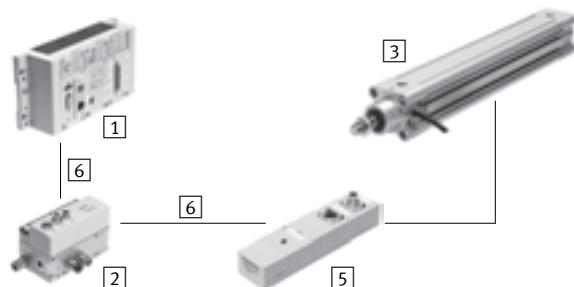

Technical data → Internet: ddli or dgci

- Pneumatic rodless linear drive with displacement encoder, with or without recirculating ball bearing guide
- Displacement encoder with absolute and contactless measurement
- Diameters:
  - DGCI: 18 ... 63 mm
  - DDLI: 25 ... 63 mm
- Stroke: 100 ... 2000 mm in fixed lengths
- Range of applications: Soft Stop and pneumatic positioning
- Loads from 1 ... 180 kg
- No sensor interface required

Advantages:

- Complete drive unit
- DDLI for easy connection to customer's guide system
- Excellent running characteristics
- For fast and accurate positioning down to  $\pm 0.2$  mm (only with axis controller CPX-CMAX)

System with standard cylinder DNCI, DDPC

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [3] Standard cylinder DNCI, DDPC with displacement encoder
- [5] Sensor interface CASM-S-D3-R7
- [6] Connecting cable KVI-CP-3-...

Technical data → Internet: dnci

- Standard cylinder with integrated displacement encoder, conforms to DIN ISO 6432, VDMA 24 562, NF E 49 003.1 and Uni 10 290
- Displacement encoder with contactless and incremental measuring
- Diameter: 32 ... 100 mm
- Stroke: 100 ... 750 mm
- Range of applications: Soft Stop and pneumatic positioning
- Loads from 3 ... 450 kg and a matching sensor interface CASM-S-D3-R7
- Pre-assembled cables guarantee faultless and fast electrical connection

Advantages:

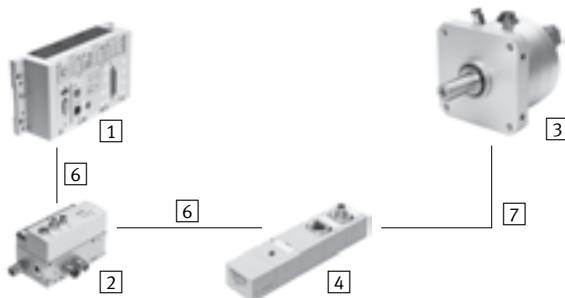

- Compact drive unit
- Can be used universally
- Also with guide unit
- For fast and accurate positioning up to  $\pm 0.5$  mm (only with axis controller CPX-CMAX)

# Cylinders with displacement encoder

**FESTO**

Drive options

System with swivel module DSMI

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [3] Swivel module DSMI with displacement encoder
- [4] Sensor interface CASM-S-D2-R3
- [6] Connecting cable KVI-CP-3...
- [7] Connecting cable NEBC-P1W4-K-0,3-N-M12G5

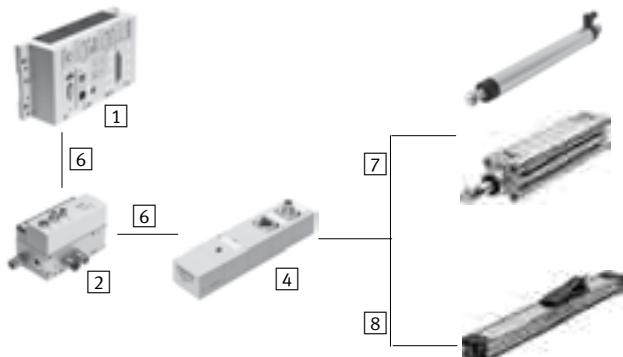

Technical data → Internet: dsmi

- Swivel module DSMI with integrated displacement encoder
- Identical design to pneumatic swivel module DSM
- Absolute displacement encoder based on a potentiometer
- Swivel range of 0 ... 270°
- Size: 25, 40, 63
- Max. torque: 5 ... 40 Nm
- Range of applications: Soft Stop and pneumatic positioning
- Mass moments of inertia from 15 ... 6000 kgcm<sup>2</sup> and a matching sensor interface CASM-S-D2-R3
- Pre-assembled cables guarantee faultless and fast connection with the proportional directional control valve VPWP

Advantages:

- Complete drive unit, compact, can be used immediately
- High angular acceleration
- With adjustable fixed stops
- For fast and accurate positioning down to ±0.2° (only with axis controller CPX-CMAX)

System with potentiometer

- [1] Controller module CPX-CMPX or CPX-CMAX
- [2] Proportional directional control valve VPWP
- [4] Sensor interface CASM-S-D2-R3
- [6] Connecting cable KVI-CP-3...
- [7] Connecting cable NEBC-P1W4-K-0,3-N-M12G5
- [8] Connecting cable NEBC-A1W3-K-0,4-N-M12G5

Technical data → Internet: casm

- Attachable potentiometers with absolute measurement, with high degree of protection
- With connecting rod or moment compensator
- Measuring range:  
Connecting rod: 100 ... 750 mm  
Moment compensator: 225 ... 2000 mm
- Pre-assembled cables guarantee faultless and fast connection with the sensor interface CASM
- Range of applications: Soft Stop and pneumatic positioning with cylinder Ø 25 ... 80 mm, e.g. DNC or DSBC
- Loads from 1 ... 300 kg

Advantages:

- Easy installation and fast commissioning
- Cost-effective
- Can also be used in harsh ambient conditions
- Variety of drives: CPX-CMPX and CPX-CMAX also support cylinders with external displacement encoder

Technical data

- Ø - Size  
25 ... 63

- = - Torque  
5 ... 40 Nm

## General technical data

Size	25	40	63
Design	Rotary vane		
	Drive shaft, fitted with ball bearings		
Mode of operation	Double-acting		
Type of mounting	Via female thread		
Position sensing	Via integrated angular displacement encoder Via proximity sensor <sup>1)</sup>		
Measuring principle (angular displacement encoder)	Analogue with conductive plastic potentiometer		
Min. travel speed [°/s]	50		
Max. travel speed [°/s]	2000		
Max. swivel angle <sup>2)</sup> [°]	272		
Adjustment range of swivel angle [°]	0 ... 270		
Pneumatic connection	M5	G1/8	G1/4
Push-in fitting used	QSM-M5-6	QS-G1/8-8-I	QS-G1/4-8-I
Compressed air tubing O.D. [mm]	6	8	8

1) Not included in the scope of delivery, can be ordered as an option

2) Note stroke reduction in combination with axis controller CPX-CMAX

## Operating and environmental conditions

Operating pressure [bar]	2 ... 10
Operating pressure <sup>1)</sup> [bar]	4 ... 8
Operating medium <sup>2)</sup>	Compressed air according to ISO 8573-1:2010 [6:4:4]
Note about the operating/pilot medium	Lubricated operation not possible Pressure dew point 10 °C below ambient/medium temperature
Ambient temperature <sup>3)</sup> [°C]	-10 ... +60
Vibration resistance to DIN/IEC 68, Part 2 - 6	Severity level 2
Continuous shock resistance to DIN/IEC 68, Part 2 - 82	Severity level 2
CE marking (see declaration of conformity) <sup>4)</sup>	To EU EMC Directive
Corrosion resistance class CRC <sup>5)</sup>	1

1) Only applies to applications with end-position controller CPX-CMPX, SPC11 and axis controller CPX-CMAX

2) The proportional directional control valve VPWP, MPYE requires these characteristic values

3) Note operating range of proximity sensors

4) For information about the applicability of the component see the manufacturer's EC declaration of conformity at: [www.festo.com/sp](http://www.festo.com/sp) → User documentation.

If the component is subject to restrictions on usage in residential, office or commercial environments or small businesses, further measures to reduce the emitted interference may be necessary.

5) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. For dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

**FESTO**

Technical data

## Positioning characteristics with Soft Stop end-position controller CPX-CMPX, SPC11

Size	25	40	63
Mounting position	Horizontal		
End-position repetition accuracy <sup>1)</sup> [°]	< ±0.2		
Intermediate-position repetition accuracy [°]	±2		
Cushioning <sup>2)</sup>	Electronically controlled		
Min. mass moment of inertia, horizontal <sup>3)</sup> [kgm <sup>2</sup> ]	15 x 10 <sup>-4</sup>	60 x 10 <sup>-4</sup>	300 x 10 <sup>-4</sup>
Max. mass moment of inertia, horizontal <sup>3)</sup> [kgm <sup>2</sup> ]	300 x 10 <sup>-4</sup>	1200 x 10 <sup>-4</sup>	6000 x 10 <sup>-4</sup>
Min. swivel stroke [°]	15		
Recommended proportional directional control valve			
For CPX-CMPX	VPWP-4-L-5-Q6-10-E-F	VPWP-4-L-5-Q8-10-E-F	
For SPC11	MPYE-5-M5-010-B	MPYE-5-1/8-LF-010-B	

1) When using the DSMI stops

2) The cushioning pad on the stop lever must be removed for applications with Soft Stop. The stop lever must not swivel to the end stop at too great a speed as this could damage the swivel module

3) Must not change during the movement, but may be outside the centre of gravity

## Electrical data – Displacement encoder

Output signal	Analogue
Linearity error <sup>1)</sup> [%]	< ±0.25
Power supply <sup>2)</sup> [V DC]	10
Max. current consumption [mA]	4
Wiper current	
Recommended [µA]	< 1
Maximum <sup>3)</sup> [mA]	10
Connection resistance [kΩ]	5
Connection resistance tolerance [%]	±20
Protection class	IP65
CE marking (see declaration of conformity)	To EU EMC Directive <sup>4)</sup>
Electrical connection	4-pin plug, □ 16, DIN 45 322

1) Refers to max. swivel angle

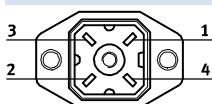

2) Stabilised power supply is recommended, max. 42 V DC permissible

3) Only permissible in the short term in the event of a fault

4) For information about the applicability of the component see the manufacturer's EC declaration of conformity at: [www.festo.com/sp](http://www.festo.com/sp) ➔ User documentation.

If the component is subject to restrictions on usage in residential, office or commercial environments or small businesses, further measures to reduce the emitted interference may be necessary.

## Pin allocation of plug

	For displacement encoder connection	194332 SD-4-WD-7

## Product Range and Company Overview

### A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

### The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drivers

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
