# Round cylinders DSNU/DSNUP/DSN/ESNU/ESN

## Key features

Additional variants		
Symbol	Key features	Description
	S2 Through piston rod	For working at both ends with the same force in the advance and return stroke, for attaching external stops
	S6 Heat resistant seals	Temperature resistance up to max. 120 °C
	S10 Constant (slow speed) operation at low piston speeds	Suitable for slow stroke movements at a constant, stick-slip-free speed over the full stroke of the cylinder. Seal contains silicone grease (not free of paint-wetting impairment substances)
	S11 Low friction	The special seals considerably reduce system wear. This corresponds to a considerably lower response pressure. Seal contains silicone grease (not free of paint-wetting impairment substances)
	K2 Extended male piston rod thread	–
	K3 Female piston rod thread	–
	K5 Special thread on piston rod	Metric standard thread to ISO
	K6 Shortened male piston rod thread	–
	K8 Extended piston rod	–
	R3 High corrosion protection	All external cylinder surfaces comply with corrosion resistance class 3 to Festo standard 940070. The piston rod is made from corrosion and acid resistant steel
	R8 Dust protection (wiper seal) (32 ... 63 mm)	The cylinder is equipped with a hard-chrome plated piston rod and a rigid wiper seal, which protects against dry, dusty media

### Longer service life with bellows kit DADB

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air of the kit must be ducted via a pressure compensation hole in the connection section **1**.

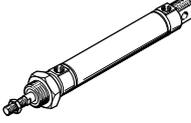

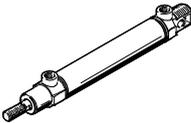

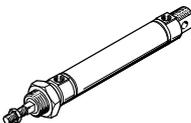

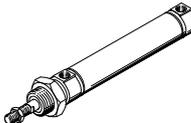

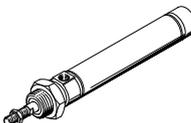

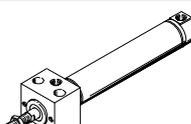

The kit protects the piston rod, seal and bearing against a wide variety of media, for example:

- dust
- chippings
- oil
- grease
- fuel

-  - Note

- |  |  |  |  |
|--|--|--|--|
| 1) Cannot be used on the bearing cap in combination with bellows kit DADB. | 2) Only push-in fittings or one-way flow control valves with cylindrical connecting thread (M or G thread) may be used for the compressed air ports in conjunction with the DSNUP. | 3) The bellows kit protects the cylinder (piston rod, seal and bearings) against a wide range of media and thus prevents premature wear. | It can only be used in combination with an extended piston rod (K8). |

S2 – Through piston rod

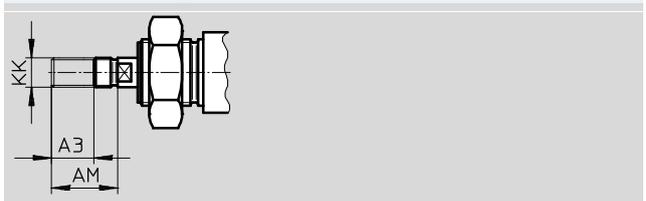

Note  
The thread types at both piston rod ends are identical. In combination with variant Q, the left-hand piston rod end is square, the right-hand piston rod end round.

+ = plus stroke length  
++ = plus 2x stroke length

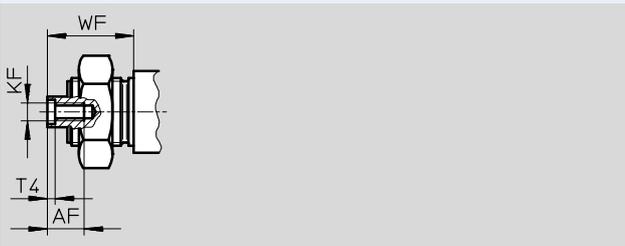

### K2 – Extended male piston rod thread

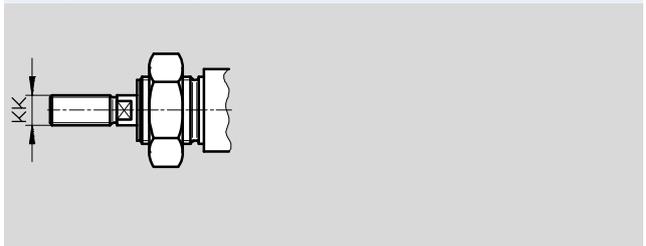

### K6 – Shortened male piston rod thread

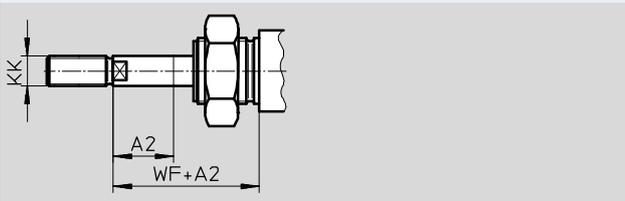

### K3 – Female piston rod thread

### K5 – Special thread on piston rod

### K8 – Extended piston rod

Note  
If variant K8 is required in combination with S2, the piston rod will only be extended on one side.

# Round cylinders DSNU-KP, with clamping unit

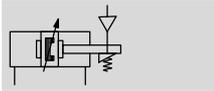

Technical data

FESTO

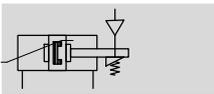

Function  
P cushioning

PPV cushioning

PPS cushioning

⌀ - Diameter  
8 ... 25 mm  
ISO 6432

⌀ - Diameter  
32 ... 63 mm

l - Stroke length  
1 ... 500 mm

⚠ - Note

Additional measures are required for use in safety-related applications; in Europe, for example, the standards listed under the EC Machinery Directive must be observed. Without addi-

tional measures in accordance with statutory minimum requirements, the product is not suitable for use in safety-related sections of control systems.

**S2 – Through piston rod**

Note

The thread types at both piston rod ends are identical. The clamping unit is mounted on only one side. In

combination with variant Q, the right-hand piston rod is square, the left-hand piston rod round.

The clamping unit is mounted on the left-hand, round piston rod.

# Round cylinders ESNU

Technical data

FESTO

Function  
Flexible cushioning

-  Diameter  
8 ... 25 mm  
IO 6432
-  Diameter  
32 ... 63 mm
-  Stroke length  
1 ... 50 mm

General technical data											
Piston Ø	8	10	12	16	20	25	32	40	50	63	
Conforms	ISO 6432						-				
Pneumatic connection	M5	M5	M5	M5	G $\frac{1}{8}$	G $\frac{1}{8}$	G $\frac{1}{8}$	G $\frac{1}{4}$	G $\frac{1}{4}$	G $\frac{3}{8}$	
Piston rod thread	M4	M4	M6	M6	M8	M10x1.25	M10x1.25	M12x1.25	M16x1.5	M16x1.5	
Stroke <sup>1)</sup> [mm]	1 ... 50										
Constructional design	Piston / Piston rod / Cylinder barrel										
Cushioning	Flexible cushioning rings/pads at both ends										
Position sensing	Via proximity sensor										
Type of mounting	Via accessories										
Mounting position	Any										

1) Cylinders with position sensing require a minimum stroke of 10 mm to ensure reliable sensing

- | - Note: This product conforms to ISO 1179-1 and to ISO 228-1

Operating and environmental conditions											
Piston Ø	8	10	12	16	20	25	32	40	50	63	
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]										
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)										
Operating pressure [bar]	1.5 ... 10			1.2 ... 10							
Ambient temperature <sup>1)</sup> [°C]	-20 ... +80										
Corrosion resistance class CRC <sup>2)</sup>	2										

1) Note operating range of proximity sensors.

2) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation may occur. External visible parts with primarily decorative requirements for the surface and which are in direct contact with the ambient atmosphere typical for industrial applications.

## Materials

Sectional view

Round cylinder	
1	Piston rod High-alloy steel
2	Bearing cap Anodised aluminium
3	Cylinder barrel High-alloy stainless steel
4	End cap Anodised aluminium
-	Seals TPE-U(PU), NBR
-	Spring Spring steel
Note on materials RoHS compliant

- || - Note: This product conforms to ISO 1179-1 and to ISO 228-1

Operating and environmental conditions						
Piston Ø	8	10	12	16	20	25
Operating medium	Compressed air in accordance with ISO 8573-1:2010 [7:4:4]					
Note on operating/pilot medium	Operation with lubricated medium possible (in which case lubricated operation will always be required)					
Operating pressure [bar]	1.5 ... 10			1 ... 10		
Ambient temperature [°C]	-20 ... +80					
Corrosion resistance class CRC <sup>1)</sup>	2					

1) Corrosion resistance class CRC 2 to Festo standard FN 940070  
Moderate corrosion stress. Indoor applications in which condensation may occur. External visible parts with primarily decorative requirements for the surface and which are in direct contact with the ambient atmosphere typical for industrial applications.

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. For dry indoor applications or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

Corrosion resistance class CRC 4 to Festo standard FN 940070

Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, for instance in the chemical or food industries. These applications may need to be supported by special tests (➔ also FN 940082) using appropriate media.

Accessories

## Swivel mounting SBN

Material:

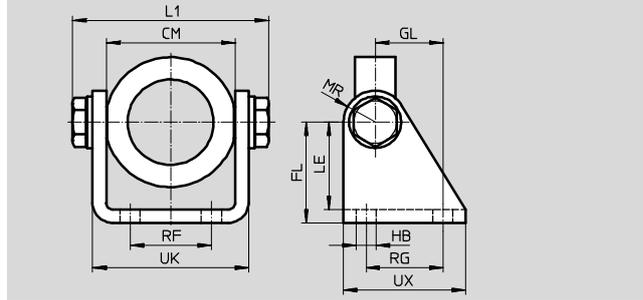

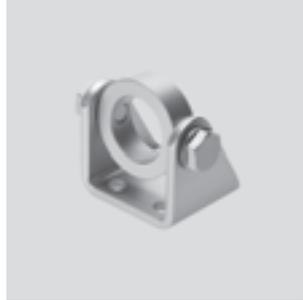

Mounting ring: Wrought aluminium alloy, anodised

Bearing: Bronze

Screws: Galvanised steel

Bracket: Steel

Cannot be used on the bearing cap in combination with bellows kit DADB.

## Speed of travel $v$ as a function of tube length $l$

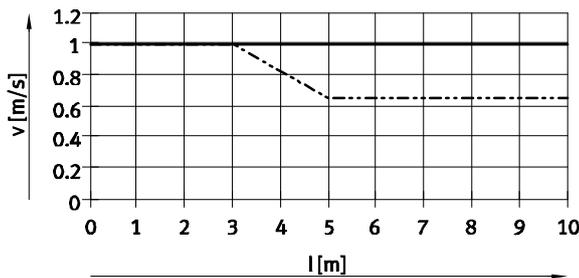

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air must be ducted via a pressure compensation hole in the

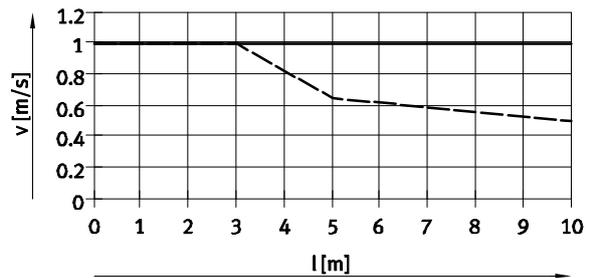

connection part **1**. The pressure generated in the bellows kit by the positioning motion is primarily defined by speed of travel

and tubing length. The recommended tubing length based on the travel speed of the drive can be read from the graph.

### Advancing

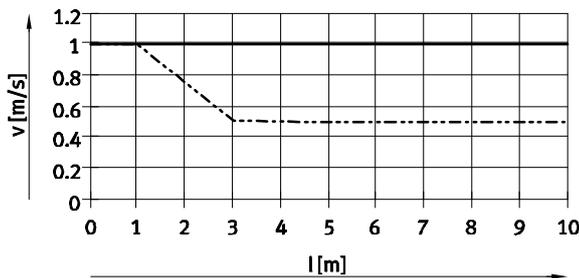

— Ø 12/16  
- - - - - Ø 20/25

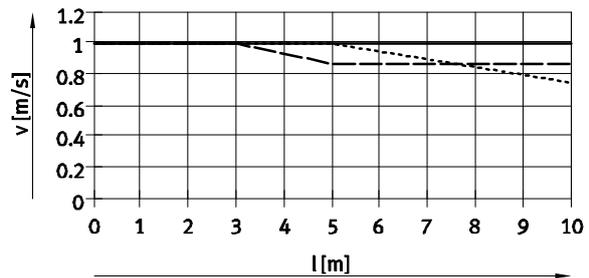

— Ø 32/50/63  
- - - - - Ø 40

— Ø 12/16  
- - - - - Ø 20/25

— Ø 32  
- - - - - Ø 40  
- · - · - Ø 50/63

**Note**  
The push-in fittings opposite must be used for the pressure compensation hole.  
Silencers can be used as an alternative. This reduces the travel speed slightly.

## Ordering data – Bellows kit

An extended piston rod (order code K8) is required when using a bellows kit  
 → Ordering data – Modular products.

The necessary dimensions for K8 as a function of piston diameter and cylinder stroke as well as the corresponding bellows kit are indicated in the table below:

### Order example:

Selected standard cylinder:  
 DSNU-25-320-PPV-A-MQ-...

The dimension for the corresponding K8 value (see table):  
 101 mm

Complete type code for standard cylinder:

DSNU-25-320-PPV-A-MQ-...-101K8

The corresponding bellows kit:

DADB-S1-25-S301-350

 Only push-in fittings or one-way flow control valves with cylindrical connecting thread (M or G thread) may be used for the compressed air ports in conjunction with the DSNUP.

## Product Range and Company Overview

### A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

### The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drivers

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
