

**Standard valves to ISO 5599-1**

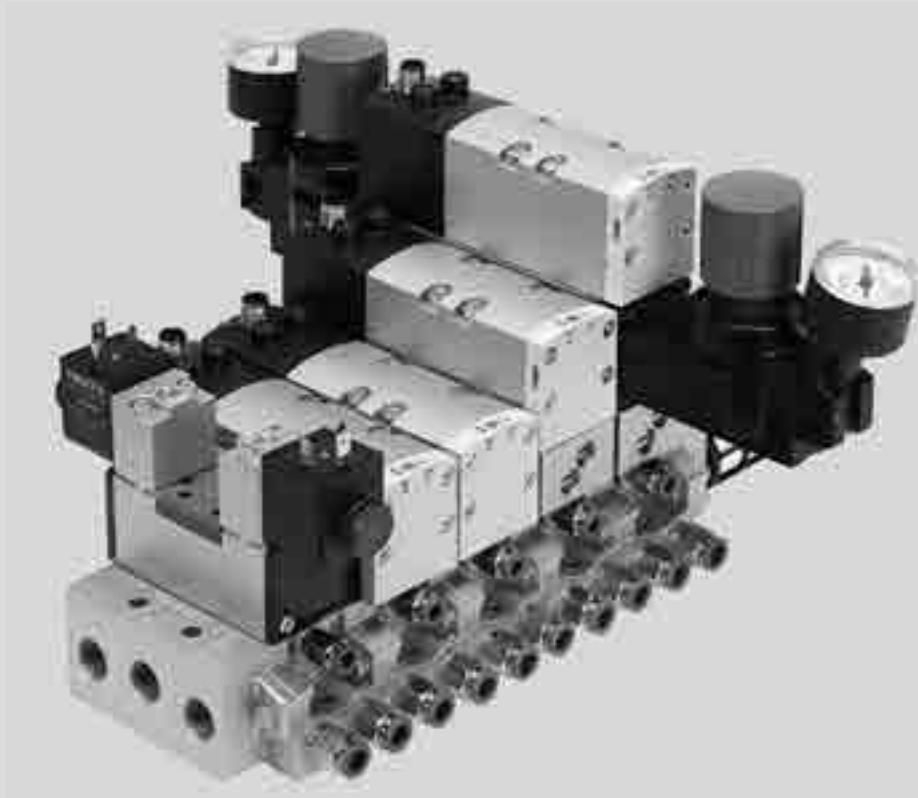

**FESTO**

# Standard valves to ISO 5599-1

Key features

FESTO

## Innovative

- High-performance valves in a sturdy metal housing
- Individual electrical connection via square plug sockets or centrally for each valve via round plug sockets
- Valve replacement under pressure possible using vertical pressure shut-off plate
- Reverse operation
- Vacuum operation

## Versatile

- Modular system offering a range of configuration options
- Easy to convert or extend at a later date
- Integration of innovative function modules possible
  - Pressure regulator plate
  - Flow control plate
  - Vertical pressure shut-off plate
  - Vertical supply plate
- Vertical supply plates permit a flexible air supply and variable pressure zones
- Wide range of valve functions
- Extensive operating voltage range from 12 V DC to 230 V AC

## Reliable

- Sturdy and durable metal components
  - Valves
  - Horizontally linked sub-bases
  - Vertically stacked sub-bases
- Fast troubleshooting thanks to LED in the plug socket or illuminating seal
- LED integrated in the valve with the round plug variant
- Convenient servicing thanks to valves that can be replaced quickly and easily
- Manual override
- Durable thanks to tried-and-tested piston spool valves

## Easy to install

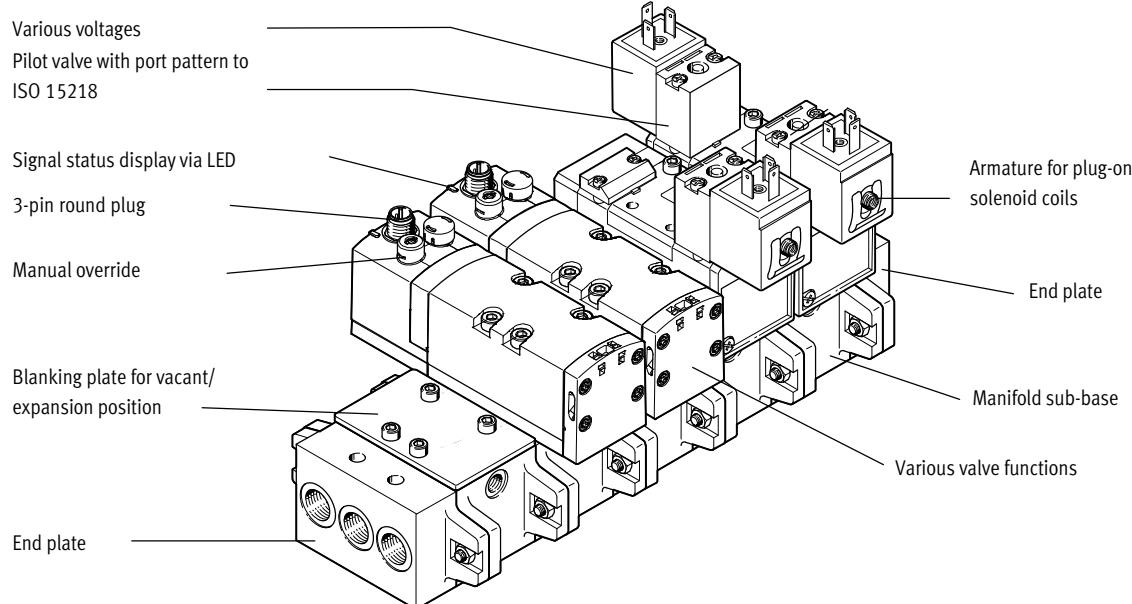

- Plug-in pressure gauges on the pressure regulator plate

# Standard valves to ISO 5599-1

FESTO

Key features

## Individual manifold assembly

## Equipment options

### 2x 2/2-way valve, single solenoid

- Normally closed
- Normally closed, vacuum operation possible at port 3 and 5

### 2x 3/2-way valve, single solenoid

- Normally open
- Normally closed
- 1x normally open, 1x normally closed
- Reverse operation possible (→11)

### 5/2-way valve

- Single solenoid, mechanical or pneumatic spring return
- Double solenoid
- Double solenoid, with dominant signal at port 14

### 5/3-way valve

- Mid-position pressurised
- Mid-position closed
- Mid-position exhausted

## Special characteristics

### Operation with external pilot air supply

- For vacuum applications
- For working pressures lower than 3 bar
- For significant pressure fluctuations in the power section. Power section and pneumatic control section are isolated
- For heavily lubricated air in the power section
- For manifolds where the pressure zones are created via ducts 3 and 5 (not possible with 2x 3/2-way valves)
- For manifolds or pressure zones that are equipped with reversible 2x 3/2-way valves (valves on request)

### Operation with internal pilot air supply

- For small pressure fluctuations in the power section
- For using pressure regulator plates in a vertical stacking construction, also in reverse operation
- As a low-cost solution

### Reverse operation with compressed air supply via ducts 3 and 5

- Pressure zone separation via ducts 3 and 5
  - Example: Duct 3 vacuum, duct 5 ejector pulse
  - Example: Duct 3 high pressure for advancing the piston rod of a double-acting cylinder. Duct 5 low pressure for retracting the piston rod with low energy consumption
- 2x 3/2-way valves used as 5/4-way valve with controllable overlapping and pressure zone separation in the reversible variant

### Reverse operation with a pressure regulator plate, compressed air supply via duct 1

- Reversible pressure regulator combined with a reversible 2x 3/2-way valve regulates outputs 2 and 4
  - AB regulator for outputs 2 and 4
  - A regulator for output 4
  - B regulator for output 2
- Reversible pressure regulators are in the control position immediately after the power supply is switched on
  - Adjustment possible at all times
  - Dynamic response characteristics
  - Reduced regulator load because the supply pressure is maintained when the valve is switched
  - Not exhausted via the regulator

# Standard valves to ISO 5599-1

Key features

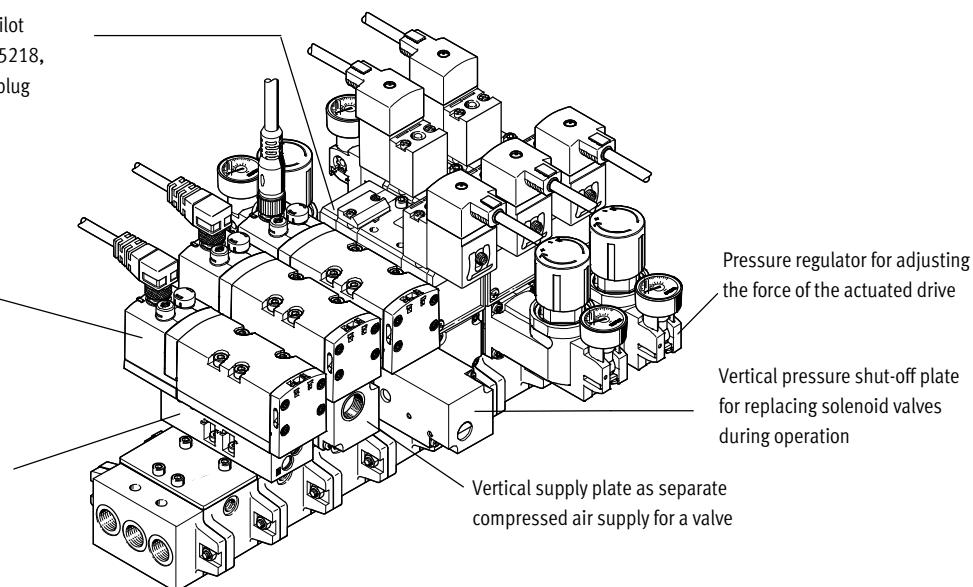

FESTO

## Manifold assembly with vertical stacking

Solenoid valve with individual pilot valves and port pattern to ISO 15218, can be connected using square plug sockets

Solenoid valve with central round plug

Flow control plate for adjusting the speed of the drive

## Vertical stacking function

### Pressure regulator

- Single variant to regulate the pressure in duct 4 or 2 or at 1
- Dual variant to regulate the pressure in ducts 4 and 2 individually
- As reversible version with internally replaced ducts 1 and 3/5
- With pressure gauge connection

### Flow control plate

- Designed with two flow control valves, at which the exhaust air flow rate at ducts 5 or 3 can be adjusted.
- The movement of the drive is initiated and the required speed is set via the flow control plate using the manual override on the valve.

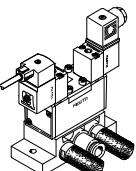

### Vertical pressure shut-off plate

- Equipped with a switch via which the compressed air supply can be shut off. As a result, components mounted on the vertical pressure shut-off plate (e.g. a valve) can be replaced without switching off the overall air supply.
- If the control chain has a redundant connection, the cycle can continue even in the case of a cyclical control system.

### Vertical supply plate

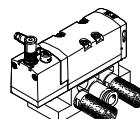

- As additional air supply for a valve
- Separates the valve from duct 1 of the manifold sub-base
- To supply an additional pressure zone

## Individual connection with square plug

The directional control valve has a pilot control to ISO 15218. The solenoid coil plugged onto the armature can be chosen in different designs and operating voltages.

## Individual connection with central round plug

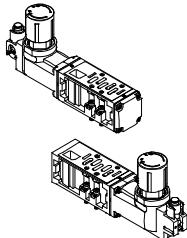

The electrical connection is established via a standardised M12 plug, 24 V DC (EN 61076-2-101).

# Standard valves to ISO 5599-1

FESTO

Key features

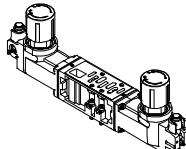

## Pressure regulator with one regulated duct

### Versions

- For pressure regulation at the supply input (P), duct 1. Set pressure is identical for ducts 2 and 4
- For pressure regulation at the working port (A), duct 4
  - The pressure regulator for reverse operation is supplied via duct 1 of the manifold sub-base and supplies duct 5 on the valve
  - The valve is exhausted via duct 1 to ducts 3 and 5 of the manifold sub-base
- For pressure regulation at the working port (B), duct 2
  - In reverse operation duct 3 is supplied here

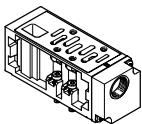

## Pressure regulator with 2 regulated ducts

### Versions

- For pressure regulation at the working ports (A and B), ducts 4 and 2
  - The pressure regulators for reverse operation are supplied via duct 1 of the manifold sub-base and supply ducts 5 and 3 on the valve
  - The directional control valve is exhausted via duct 1 to ducts 3 and 5 of the manifold sub-base

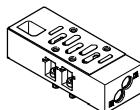

## Vertical supply plate

### Versions

- As intermediate supply
  - For one valve
  - To supply an additional pressure zone
- Can be equipped with a valve

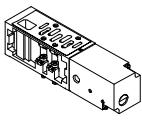

## Flow control plate

### Versions

- Exhaust air flow control valves in ducts 3 and 5
  - The flow control plates act as supply air flow control valves for pressure zones that are created via ducts 3 and 5

## Vertical pressure shut-off plate

### Versions

- A switch activated with a slotted screwdriver shuts off duct 1.
  - The flow control plates, pressure regulators or valves positioned above it can be replaced
  - Other components of the control chain such as drives, for example, can be replaced following venting via the valve

## Pressure gauge

### Version

- Plugs into the pressure regulators

# Standard valves to ISO 5599-1

Key features

**FESTO**

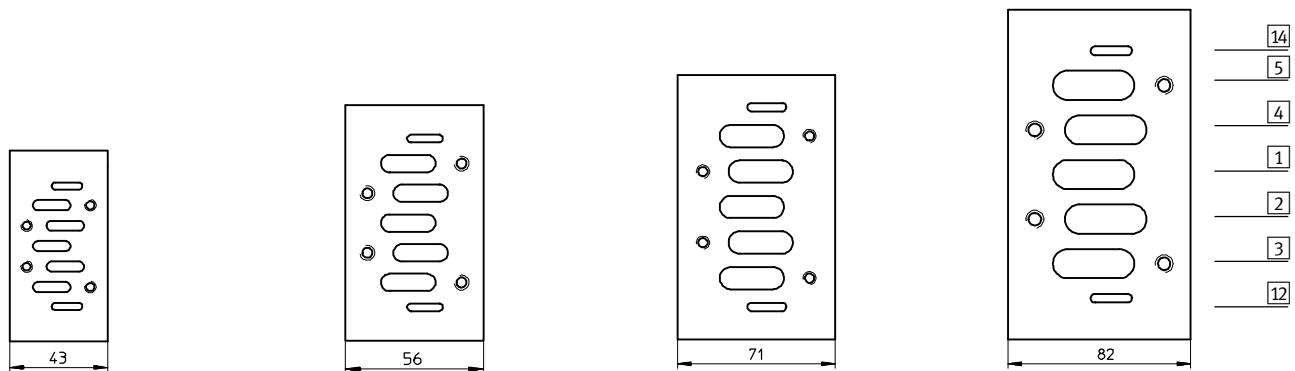

## Port pattern on sub-base to ISO 5599-1

Width 42 mm (ISO 1)

Width 52 mm (ISO 2)

Width 65 mm (ISO 3)

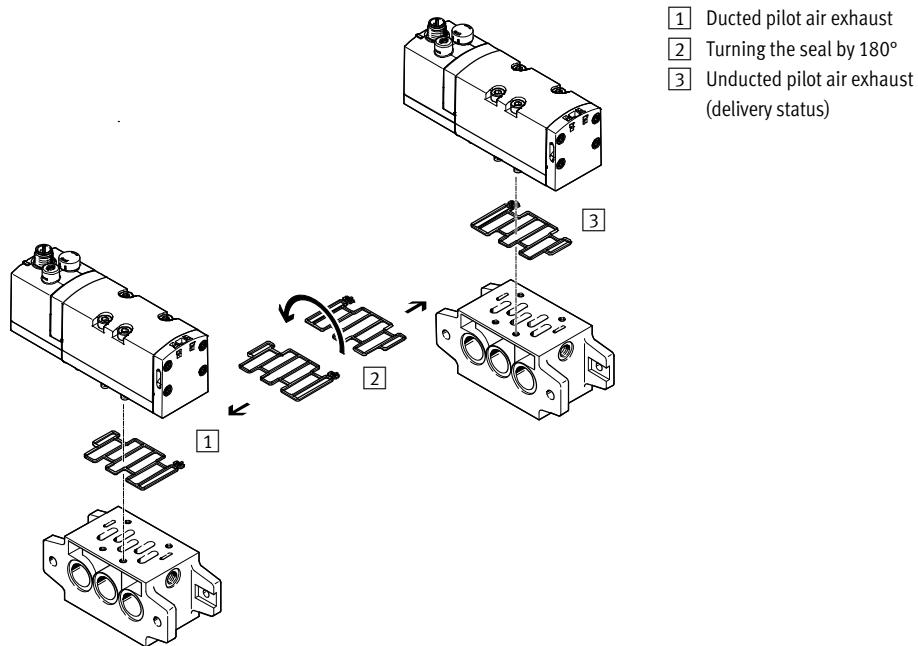

Width 76 mm (ISO 4)

## Sub-base port designations

Duct	Function	Description
14	Control section	Pilot air supply for pilot valves 12 and 14
5	Power section	Exhaust port
4	Power section	Working port
1	Power section	Working air supply port
2	Power section	Working port
3	Power section	Exhaust port
12	Control section	Exhaust port for pilot air supply

## Conversion of pilot air exhaust

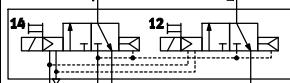

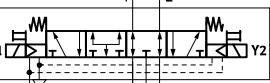

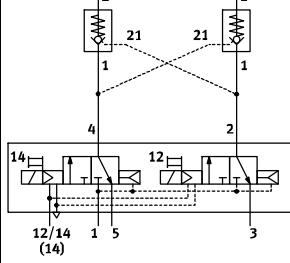

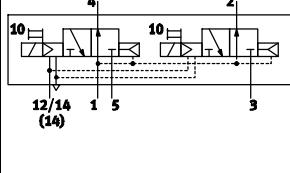

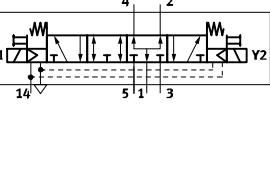

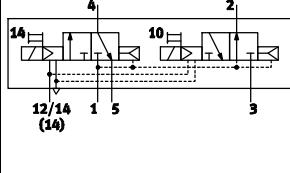

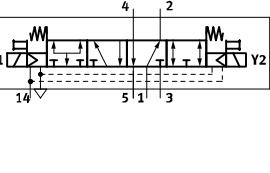

VSPA manifold assemblies are supplied with unducted pilot air exhaust. By turning the seal between the valve and manifold block, exhaust air (pilot air) can be diverted into pilot duct 12 and can thus be contained and silenced (see illustration).

[1] Solenoid valve	MN1H-...	With armature for solenoid coil MSN1	20	
	JMN1H-...	With armature for solenoid coil MSN1	20	
	JMN1DH-...	With armature for solenoid coil MSN1	20	
	MFH-...	With armature for solenoid coil MSF	32	
	JMFH-...	With armature for solenoid coil MSF	32	
	JMFDH-...	With armature for solenoid coil MSF	32	
	VSVA-...	With central plug M12, 3-pin	44	
	MEBH-...	With central plug M12, 4-pin	54	
	JMEBH-...	With central plug M12, 4-pin	54	
	JMEBDH-...	With central plug M12, 4-pin	54	
	MDH-...	With solenoid coil MD with round plug M12x1	66	
	JMDH-...	With solenoid coil MD with round plug M12x1	66	
	JMDDH-...	With solenoid coil MD with round plug M12x1	66	
Pneumatic valve	VL-...	Port pattern to ISO 5599-1	87	
	J-...	Port pattern to ISO 5599-1	87	
	JD-...	Port pattern to ISO 5599-1	87	
[2] Blanking plate	NDV-...	For sealing unused manifold sub-bases	110	
[3] Flow control plate	VABF-S1-...-F1B1-C	Controls the flow of exhaust air in ducts 3 and 5	113	
	GRO-ZP-...	Controls the flow of exhaust air in ducts 3 and 5	113	
[4] Vertical supply plate	VABF-S1-...-P1A3-G38	Alternative compressed air supply for port 1 of the assembled valve	116	
[5] Vertical pressure shut-off plate	VABF-S1-...-L1D1-C	For blocking duct 1 and duct 14 upstream of a valve	118	
[6] Regulator plate	VABF-S1-...-R...	Pressure regulator for manually setting a particular pressure in the regulated port upstream or downstream of the valve	120	
	LR-ZP-...	Pressure regulator for manually setting a particular pressure in the regulated port upstream or downstream of the valve	120	
[7] End plate kit	NEV-...	With ports for air supply 1 and exhausts 3 and 5	109	
[8] Manifold sub-base	NAV-...	With ports 2 and 4 underneath	108	
[9] Isolating disc	NSC-...	For sealing ducts 1, 3, 5 between end plate and manifold sub-base, e.g. to create pressure zones	110

-  - Flow rate  
1200 l/min

## General technical data

Design	Piston spool valve				
Sealing principle	Soft				
Actuation type	Electric				
Type of control	Piloted				
Direction of flow	With external pilot air supply	Reversible			
	With internal pilot air supply	Non-reversible			
Exhaust function	With flow control				
Manual override	Non-detenting, detenting via accessory				
Type of mounting	On sub-base, via through-hole				
Mounting position	Any				
Nominal size	[mm]	8			
No overlap	Yes				
Width	[mm]	42			
Grid dimension	[mm]	43			
Pneumatic ports	Sub-base size 1 to ISO 5599-1				
Noise level	[dB (A)]	85			
Conforms to standard	ISO 5599-1				
Certification	Germanischer Lloyd				

## Flow rates

Valve function	5/2-way single solenoid valve	5/2-way double solenoid valve	5/3-way valve
Standard nominal flow rate	[l/min]	1200	

## Switching times [ms]

## ATEX

Type	MFH- ... -EX, JMFH- ... -EX, JMFDH- ... -EX	
ATEX category gas	II 2G	
Ignition protection type for gas	c T4	
ATEX category for dust	II 2D	
Ignition protection type for dust	c T105°C	
Explosion-proof ambient temperature [°C]	-5 <= Ta <= +40	
CE marking (see declaration of conformity)	As per EU Explosion Protection Directive (ATEX)	

## Operating and environmental conditions

Reset method	Pneumatic spring	Mechanical spring	
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]		
Pilot medium	Compressed air to ISO 8573-1:2010 [7:4:4]		
Note on operating/pilot medium	Lubricated operation possible (in which case lubricated operation will always be required)		
Operating pressure	Internal pilot air supply [bar]	2 ... 10	3 ... 10
	External pilot air supply [bar]	-0.9 ... +16	-0.9 ... +16
Pilot pressure	[bar]	2 ... 10	3 ... 10
Ambient temperature	[°C]	-5 ... +40	
Temperature of medium	[°C]	-10 ... +60	
	[°C]	-5 ... +40 (MFH- ... -EX, JMFH- ... -EX, JMFDH- ... -EX)	

## Safety characteristics

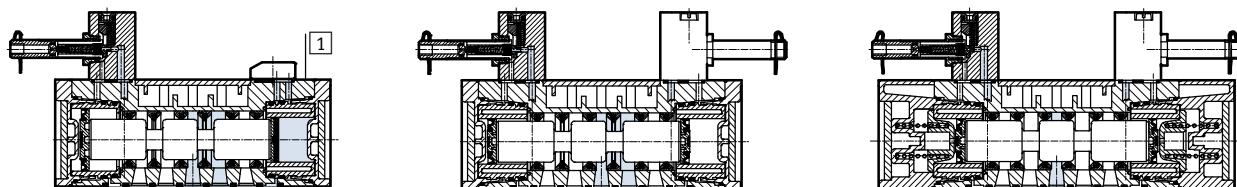

Note on forced switch on/off	Switching frequency min. 1/week
Max. positive test pulse with 0 signal	[μs] 2200
Max. negative test pulse with 1 signal	[μs] 3700
Shock resistance	Shock test with severity level 2 to FN 942017-5 and EN 60068-2-27
Vibration resistance	Transport application test with severity level 1 to FN 942017-4 and EN 60068-2-6

## Electrical data

Electrical connection	Via F coil, to be ordered separately
Degree of protection to EN 60529	IP65

## Materials

Sectional view

[1] Housing	Die-cast aluminium
- Seals	HNBR, NBR
- Note on materials	RoHS-compliant

Technical data – Width 65 mm

-  - Flow rate  
4500 l/min

-  - Voltage  
24 V DC

## General technical data

Design	Piston spool valve			
Sealing principle	Soft			
Actuation type	Electric			
Type of control	Piloted			
Direction of flow	Non-reversible			
Exhaust function	With flow control			
Manual override	Non-detenting			
Type of mounting	On sub-base, with through-hole and screw			
Mounting position	Any			
Nominal size	[mm]	14.5		
No overlap		Yes		
Width	[mm]	65		
Grid dimension	[mm]	71		
Pneumatic ports	Sub-base size 3 to ISO 5599-1			
Noise level	[dB (A)]	85		
Conforms to standard	ISO 5599-1			

## Flow rates

Valve function	5/2-way valve	5/3-way valve		
		Normally closed	Normally exhausted	Normally open
Standard nominal flow rate	[l/min]	4500	4100	4600
				4000

## Product Range and Company Overview

### A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

### The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drivers

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
