

Flow sensors SFAB

Flow sensors SFAB

Key features

FESTO

At a glance

Quick and secure installation thanks to QS fitting

Manifold assembly of the sensor via H-rail or individual assembly via adapter plate for wall mounting

Plate assembly of the sensor using mounting screws, 5 measuring ranges from 0.1 ... 10 l/min up to 10 ... 100 l/min

Values up to 200 l/min, optional with integrated flow control valve/flow control element

Display can be rotated 270°

- High-contrast LCD display with blue background and white 9-segment display
- Bar graph visualises the current measured value
- Switching point-dependent colour change

Central electrical connection via M12 plug

Impressive, simple, reliable

Designed according to the attractive display and operation concept, the flow sensors have produced outstanding results in the areas of:

- Leakage detection in production
- Leakage tightness testing of end products
- Flow monitoring in parts feeding

The sensor supplies:

- Absolute flow rate information
 - with threshold values and
 - convenient switching point adjustment via a display
- Cumulative air consumption measurement
- Patented – adjustable consumption-based switching impulse for the cumulative air consumption measurement via the switching output

Easier to operate

- A large, illuminated LCD display increases the operational safety and makes the currently displayed flow rate or consumption values easy to read
- Measured values outside the measuring range are visualised: flow rate values are shown flashing
- Values falling below or above the threshold can also be detected remotely or, if the sensor is in

an inaccessible location, by means of the display changing colour

- Simple checking of the current sensor settings in SHOW mode
- Simple switching between consumption and flow rate display
- An integrated flow control valve can be ordered as a flow control element via the modular product system for values up to 200 l/min

Flexible installation

This is enabled by the extremely compact design that does away with the need for an upstream and downstream smoothing section; the SFAB has an integrated stabilising flow channel.

Systematically more reliable

The sensor supplies precise information thanks to its very large measuring range, even in the case of fluctuating or unreliable flow rate conditions.

User-friendly

- Quick and easy menu navigation
- Integrated QS fittings
- Ultra-fast teach-in function as with the proven pressure sensor SDE1
- Secure connections with extremely short assembly times

- Manual consumption measurement with start/stop and reset functionality
- Rotatable display
- With or without flow control valve

Advantages

For the designer

- During design, minimal information is required regarding the applied flow rate
- Festo plug and work solution
- The same device can be used for different applications
- The sensor covers a large measuring range with a specified accuracy thanks to its high dynamic response of 1:100
- NPN/PNP switching via the software

- Minimal assembly times
- Alternatively with 4 ... 20 mA or 0 ... 10 V analogue output
- Flexible installation without restrictions imposed by smoothing sections, any installation position
- High pneumatic connection variance possible via the modular product system
- Design of more efficient machines

For the machine operator

- Precise information is available even in the event of fluctuating pressure conditions
- Flow rates can be read easily and reliably
- Visualisation (colour change, flashing measured value) of deviations
- Easy operation without the need for training
- Greater system reliability

- Displayed values:
 - Can be displayed for flow rate and consumption for different standard conditions
 - Can be filtered/averaged with highly dynamic measuring independently of the analogue output
- Fast commissioning thanks to easy-to-use, intuitive teach-in function

Flow sensors SFAB

Peripherals overview

Peripherals overview

Mounting attachments and accessories		→ Page/Internet
1	Adapter plate SDE1-...-W-... (included in the scope of delivery with SFAB-...-W...)	11
2	Mounting rail to DIN EN 60715	nrh
3	Connecting cable NEBU-M12G5, straight socket	11
4	Connecting cable NEBU-M12G5, angled socket	11

Flow sensors SFAB

Type codes

SFAB - 600 U - H Q8 - P2 - M12

Type

SFAB	Flow sensor
------	-------------

Flow measuring range [l/min]

10	Max. 10
50	Max. 50
200	Max. 200
600	Max. 600
1000	Max. 1,000

Flow input

U	Unidirectional
---	----------------

Type of mounting

H	Via H-rail
W	Via wall bracket

Pneumatic connection

Q6	Push-in connector 6 mm
Q8	Push-in connector 8 mm
Q10	Push-in connector 10 mm

Electrical output

2SA	2x PNP or NPN, 1 analogue output 4 ... 20 mA
2SV	2x PNP or NPN, 1 analogue output 0 ... 10 V

Electrical connection

M12	Straight plug, M12x1, 5-pin
-----	-----------------------------

Additional variants can be ordered using the modular system → 10

- Pneumatic connection
- Additional function (flow control element)
- Electrical accessories
- EU certification (ATEX)

Flow sensors SFAB

Technical data

Function

Current output 2SA

Voltage output 2SV

- Analogue output 0 ... 10 V, adjustable switching outputs 2x PNP or 2x NPN
- Analogue output 4 ... 20 mA, adjustable switching outputs 2x PNP or 2x NPN
- Freely selectable pulse output for consumption measurement
- Analogue filter for setting the rise time
- Digital filter for smoothing the display values
- Flow control element (flow control valve) for setting the flow rate

General technical data		-10U	-50U	-200U	-600U	-1000U

Product Range and Company Overview

A Complete Suite and Company Overview

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services

Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drivers

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 16,000 employees in 60 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
