# Control blocks CPX-CEC

FESTO

Control blocks CPX-CEC

Key features

Application

Controller

The CODESYS controllers are modern control systems for CPX terminals that enable programming with CODESYS to IEC 61131-3.

Programming in a global language

CODESYS provided by Festo offers a convenient user interface with the following functions:
- Integrated module libraries
- Library Manager for integrating further libraries
- Visualisation editor

- Simulation mode
- Integrated project documentation
- Debugging functions for fault finding
- Configuration and parameterisation of the controller using the control configuration

Basic functions

The CODESYS controllers offer the following basic functions:
- Programming with CODESYS to IEC 61131-3
- Communication via Ethernet (Modbus/TCP, EasyIP, TCP/IP)
- Process visualisation using operator unit CDPX or OPC server

- Communication via fieldbus in combination with a fieldbus node in the CPX terminal
- Diagnostics and quick commissioning of CPX modules via handheld CPX-FMT

CPX-CEC-C1 offers
- All basic functions
- CANopen master for controlling up to 127 CANopen stations. Electric axes can be controlled in point-to-point mode

CPX-CEC offers
- All basic functions
- RS232 interface for operating external devices

-§- Note

When using external devices, data communication must be programmed by the user.

Bus connection

The CODESYS controllers are remote controllers that can be connected to a higher-order PLC via the fieldbus nodes of the CPX terminal or via Ethernet, for example:
- PROFINET
- EtherNet/IP
- EtherCAT
- PROFIBUS
- DeviceNet

Operating modes
- Stand-alone
- Remote controller on the fieldbus
- Remote controller on Ethernet

System expansion

CANopen connects CPX-CEC with valve terminals and electric drive controllers from Festo:
- CPX, CPV
- CMMP-AS, CMMS-ST, etc.
- AS-Interface gateway

Ethernet connects CPX-CEC with additional controllers and operator units from Festo:
- CDPX
- Camera SBO…-Q

System expansion (examples)

CPX-CEC/CPX-CEC as a stand-alone or remote controller

CPX-CEC-C1 as a CANopen fieldbus master

Control blocks CPX-CEC
Key features

Advantages for users

Increased performance

Improved cycle times – more connectable actuators. Compatibility with almost all control systems on the market is ensured via the CPX terminal.

The extensive CODESYS function library provides diagnostics and condition monitoring options.

Reduced costs

For standardised pre-processing: reduces installation costs as an intelligent remote I/O terminal to IP65/IP67 directly at the machine.

CPX-CEC is ideally adapted to CPX and motion applications with up to 31 axes.

Simple, yet efficient: decentralised structures

The modular I/O system with up to 512 I/Os and CAN master functionality (CPX-CEC) offers complete flexibility, whether for open-loop or closed-loop

control. Stand-alone for low-cost automation of manual workstations, for example, or remote control with pre-processing.
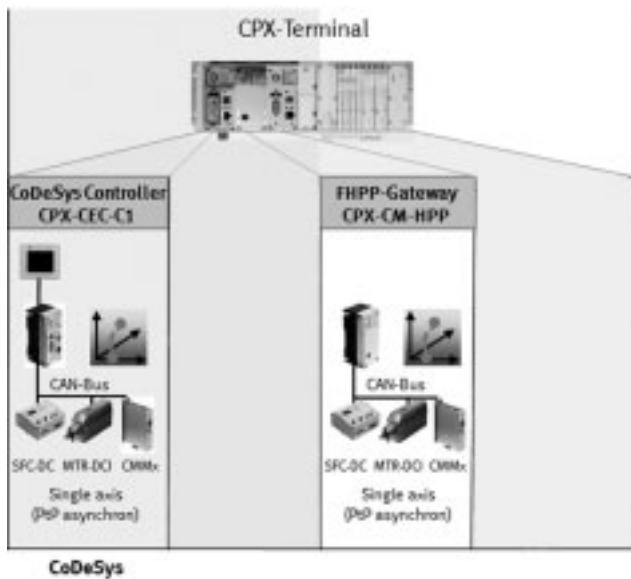

The only one in the world to IP65

The fully integrated automation platform for standard, proportional and servopneumatic, sensor and motion control to IP65.

Included: simple commissioning.

Classification of CPX-CEC in the portfolio for multi-axis controllers for electric drive technology

CPX-CEC in the world of electric drive technology

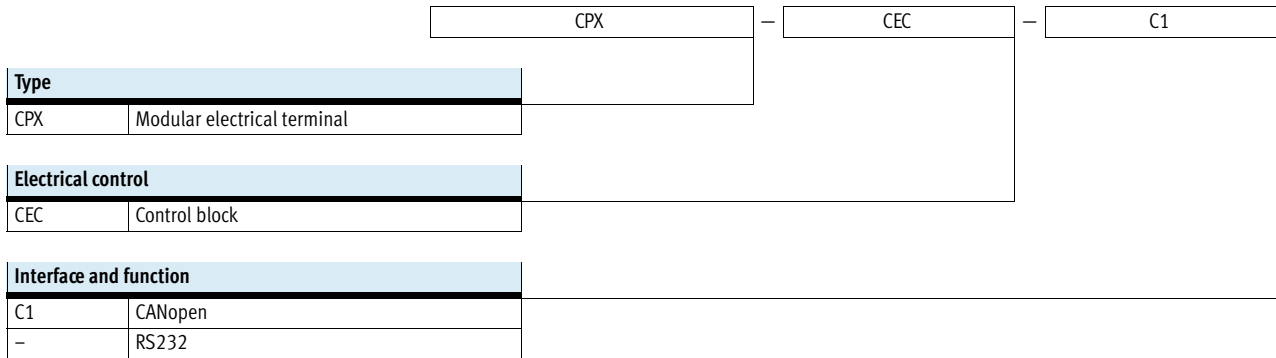

Embedded controller

CPX-CEC permits the flexible connection of valve actuators and electric drives on the terminal - programmable in CODESYS and can, if necessary, be directly installed at the machine to IP65. The ideal complement to the gateway module CPX-CM-HPP.

The CODESYS controller is a modern control system for CPX terminals that enables programming with CODESYS to IEC 61131-3.

The power supply to and communication with other modules takes place via the interlinking block.

In addition to network connections, LEDs are also provided for the bus status, operating status of the PLC and CPX peripherals information, as are switching elements and a diagnostic interface for CPX-FMT.

Application

Bus connection

The CPX-CEC is a remote controller that can be connected to a master PLC via the fieldbus nodes of the CPX terminal or via Ethernet. At the same time, it is possible to operate the CPX-CEC as a compact stand-alone controller directly on the machine.

Communication protocols

- Fieldbus via CPX bus nodes
- Modbus/TCP
- EasyIP

Operating modes

- Stand-alone
- Remote controller, fieldbus
- Remote controller, Ethernet

Setting options

The CPX-CEC has the following interfaces for monitoring, programming and commissioning:

- For the CPX-FMT
- Ethernet interface for IT applications
- Remote diagnostics

The operating mode and fieldbus protocol are set using the DIL switch on the CPX-CEC.

The integrated web server offers a convenient means of querying data saved in the CPX-CEC.

Features

- Easy actuation of valve terminal configurations with MPA, VTSA
- Diagnostics with flexible monitoring options for pressure, flow rate, cylinder operating time, air consumption

- Actuation of decentralised installation systems based on CPI actuation of applications in proportional pneumatics
- AS-Interface actuation via gateway

- Connection to all fieldbuses as a remote controller and for pre-processing
- Actuation of electric drives as individual axes via CANopen (CPX-CEC-C1)

- Early warnings and visualisation options
- Closed-loop pneumatic applications

Technical data

General technical data			
Protocol		CODESYS Level 2	
		EasyIP	
		Modbus TCP	
		TCP/IP	
Processing time		Approx. 200 µs/1 k instruction	
Programming software		CODESYS provided by Festo V2.3	
Programming language		To IEC 61131-3	
		Sequential function chart (SFC)	
		Instruction list (IL)	
		Function chart (FCH), additional continuous function chart (CFC)	
		Ladder diagram (LD)	
		Structured text (ST)	
Programming	Operating language	German, English	
	Support for file handling	Yes	
Device-specific diagnostics		Diagnostic memory	
		Channel and module-oriented diagnostics	
		Undervoltage/short circuit of modules	
LED displays	Bus-specific	TP:	Link/traffic
	Product-specific	RUN:	PLC status
		STOP:	PLC status
		ERR:	PLC runtime error
		PS:	Electronics supply, sensor supply
		PL:	Load supply
		SF:	System fault
		M:	Modify/forcing active
IP address setting		DHCP	
		Via CODESYS	
		Via MMI	
Function blocks		CPX diagnostic status, copy CPX diagnostic trace, read CPX module diagnostics, etc.	
Product weight	[g]	155	
Dimensions (incl. interlinking block) W x L x H	[mm]	50 x 107 x 55	

Materials	
Housing	Reinforced PA
	PC
Note on materials	RoHS-compliant

Operating and environmental conditions		
Ambient temperature	[°C]	−5 … +50
Storage temperature	[°C]	−20 … +70
Relative air humidity	[%]	95, non-condensing
Corrosion resistance class CRC[1]		2

1) Corrosion resistance class CRC 2 to Festo standard FN 940070
   Moderate corrosion stress. Indoor applications in which condensation may occur. External visible parts with primarily decorative requirements for the surface and which are in direct contact with the ambient atmosphere typical for industrial applications.

Electrical data

Nominal operating voltage		[V DC]	24
Load voltage	Nominal operating voltage	[V DC]	24
	With pneumatics type VTSA	[V DC]	21.6 … 26.4
	With pneumatics type MPA	[V DC]	18 … 30
	Without pneumatics	[V DC]	18 … 30
Power failure buffering		[ms]	10
Intrinsic current consumption at nominal operating voltage		[mA]	Typically 85
Degree of protection to EN 60529			IP65, IP67

Technical data

Type			CPX-CEC	CPX-CEC-C1
Additional functions			RS232 communication function	Motion functions for electric drives
