

### Key features

#### At a glance

Several gripping benefits are combined in a single model:

- Gripping parts with undefined positions and shapes
- Form-fitting gripping of products with different geometries

#### The technology in detail

# • Form-fitting gripping with suction cup effect

• Gentle gripping of delicate products of varying sizes

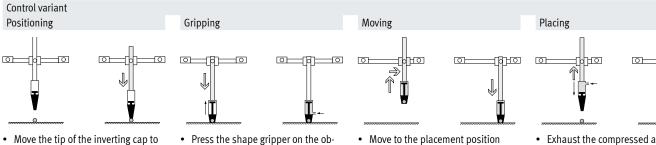

#### Sensor technology:

 Position sensing possible with position transmitters and proximity sensors

#### Applications:

- Human-robot collaboration thanks to gripper without edges
- Unpacking of boxes as well as separation and positioning of parts
- Picking parts and magazining

- [1] Direct mounting via through-hole suitable for DIN ISO 9409-1-50-4-M6 (industrial robots mechanical interfaces)
- [2] Compressed air supply port for retracting
- [3] Compressed air supply port for advancing
- [4] Compressed air supply port for inverting cap
- [5] T-slot for mounting the sensors (both sides)
- [6] Bayonet lock
- [7] Inverting cap
- [8] Piston rod
- [9] Releasing ring for replacing the inverting cap

- Move the tip of the inverting cap to the object to be gripped
- The inverting cap is supplied with 0.07 ... 0.1 bar via a pressure regulator
- The drive is exhausted
- Press the shape gripper on the object to be gripped until the inverting cap is retracted
- Pressurise the compressed air supply port for retracting in order to hold the object in place

- Exhaust the compressed air supply port for retracting
- The object to be gripped is released
- Move the shape gripper away from the object
- If the shape gripper does not release the object it has gripped, the compressed air supply port for advancing will have to be pressurised

# - 🏺 - Note

The gripper variant with robot connection DHEF-...-RA1 makes it possible to integrate the gripper into the robot control system directly and easily. A software plug-in is provided for this purpose.

## Key features

#### Fast and intuitive integration on a robot arm

The gripper with robot connection DHEF-...-RA1 enables fast integration on a light-weight robot.

In order to mount the gripper on the robot arm, the necessary accessories are included in the kit, in addition to the gripper itself.

The plug-in is a simple means for integrating the gripper directly into the program sequence of the robot control system ( $\rightarrow$  page 6).

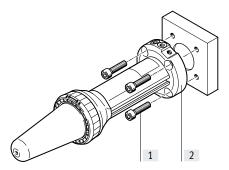

- Note

The gripper with robot connection DHEF-...-RA1 is only compatible with the following robots:

- Universal Robots UR3/UR5/UR10: from software version PolyScope CB 3.8.0
- Universal Robots UR3e/UR5e/UR10e/UR16e: from software version PolyScope SW 5.2.0

If the feature DHEF-...-RA1 is used, the delivery includes all the connection components in addition to the gripper:

- Proximity sensors
- Valve and pressure regulator
- Connecting cables
- Tubing for connecting the gripper
- QS fittings and silencers
- Velcro strip for fixing the connecting cables and tubing in place
- Mounting screws
- USB memory stick for software plug-in
