

★/**☆** Festo core product range

Covers 80% of your automation tasks

Worldwide:

Always in stock

Superb: Festo quality at an attractive price Easy: Reduces procurement and storing complexity ★ Generally ready for shipping ex works in 24 hours Held in stock in 13 service centres worldwide More than 2200 product

☆ Generally ready for shipping ex works in 5 days Assembled for you in 4 service centres worldwide Up to 6 x 10¹² variants per product series

MS series service unit components

Key features

MS series service unit components

Solutions for every application

With its large product range, highly functional components and a wide choice of services, the MS series from Festo offers a complete concept for compressed air preparation. Suitable for simple standard applications as well as application-specific solutions to the highest quality standards.

Available as individual components, pre-assembled combinations ex-stock, application-specific combinations or complete turnkey solutions. The five sizes in the MS series achieve maximum flow rates with minimum space requirements.

Freely combinable function modules

Pressure regulators, on/off and softstart valves with safety function, filter, pressure and flow sensors, dryers, sensors and lubricators. All these allow a suitable solution to be assembled for every task. Their modular structure means that the components

are freely combinable. A simple connection system saves time when replacing individual modules without dismantling the entire combination. What's more, many of the components are certified to UL and ATEX.

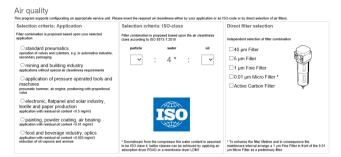

CAD models and configurator

Convenient aids for planning and selecting application-specific individual devices and combinations. The product configurator lets you configure customised solutions quickly and transfer the order data with no hassle.

Engineering tools

Selection tool for choosing the right service unit without oversizing, and with the right air quality class:

Integrated sensors Pressure and flow sensors

Safety functions Soft-start/quick exhaust valves

MS6-SV/MS9-SV

Service units MSE6

Intelligent mix of sizes

- · Reliable compressed air preparation and supply for systems
- Integrable or stand-alone
- · Easy to connect with M8/M12 plug

- · Fast and reliable exhausting of systems up to Performance Level e, certified to EN ISO 13849-1
- Integrated soft-start function

- · Fully automatic monitoring and regulation of compressed air supply
- · Automatic shut-off of the compressed air in stand-by mode
- · Detection and notification of leakages
- · Condition monitoring of relevant process data

- Optimum flow rate with up to 18% smaller size
- · Excellent energy efficiency
- · Cost-optimised combinations save up to 30%!

Size differences						
Size		MS2	MS4	MS6	MS9	MS12
Grid dimension	[mm]	25	40	62	90	124
Port sizes		M5, QS-6	G ¹ / ₈ , G ¹ / ₄ , G ³ / ₈	G ¹ / ₄ , G ³ / ₈ , G ¹ / ₂ , G ³ / ₄	G ¹ / ₂ , G ³ / ₄ , G1, G1 ¹ / ₄ , G1 ¹ / ₂	G1, G1 ¹ / ₄ , G1 ¹ / ₂ , G2
Standard nominal flow rate $qnN^{1)}$	[l/min]	350	1800	6500	20000	22000

¹⁾ Using pressure regulator MS-LR as an example

MS series service unit components

Key features

Note

Information

The next few pages provide a brief overview of the complete product range for the MS series service unit components.

You can find detailed information and all of the technical data in the documentation for the corresponding service unit component.

Accessories such as connection plates or mounting brackets can be ordered either via the configurator or separately.

Structure of a service unit

The order of the individual components within a service unit is relevant for safety and functionality. It is not possible to assemble the service unit components in any order in the flow direction. There are restrictions and rules.

The configurator for service unit MSB is a reliable and convenient way of arranging individual service unit components. This ensures that the applicable rules are complied with. As a result, you get a completely assembled combination with UL or ATEX certification if you need it. When arranging a combination of individually configured and ordered service unit components, the points on the right must be adhered to under all circumstances.

- Regulators MS-LFR/LR/LRP/LRE are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1
- A micro filter MS-LFM must be installed upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1 in the flow direction
- A flow sensor SFAM cannot be installed directly downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- A soft-start/quick exhaust valve MS-SV must be the last service unit component in the flow direction

Key feature

Configurable service unit combinations MSB

Overview

- 3 sizes:
- MSB4 grid dimension 40 mm MSB6 – grid dimension 62 mm MSB9 – grid dimension 90 mm
- Threaded connections in the product housing or with connecting plates
- Type of mounting and flow direction can be optionally selected
- Can be configured in accordance with the ATEX directive for explosive atmospheres
- Food safe (MSB4/MSB6)

Configurator

The configurator enables step-by-step configuration of complex service unit combinations. It is divided into a basic configuration and the individual service unit configurations.

The technical parameters for the entire service unit combination are defined

using the features of the basic configuration. All service unit configurations define the service unit along with the general technical conditions.

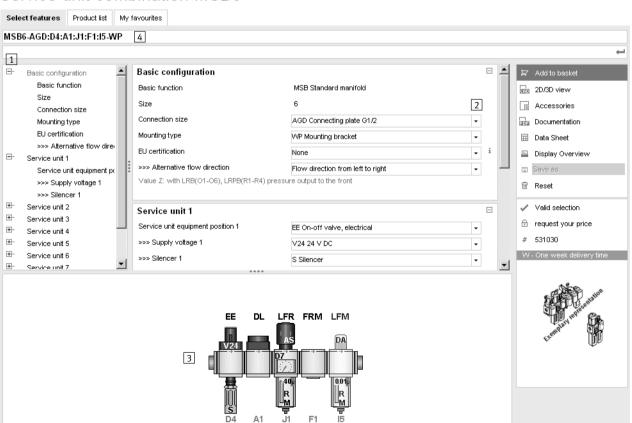

You can navigate through your configuration using the structure 1. All of the features available for selection are

stored in drop-down lists 2. Missing or incomplete information is indicated by an exclamation mark. Features shown against a grey background cannot be selected in the selected configuration → table "Conditions and exclusion of features".

If you select a feature shown against a grey background, red font will indicate that the configuration is incorrect. A dynamic graphic ③ and the order code ④ (→ type codes) are created in accordance with your current configuration.

Service unit combination MSB6

Key feature

FESTO

Information

General

The adjacent columns and the product range overview (→ 3) provide a brief overview of the available service units of a specific size.

You can find the breakdown of the service unit short code transferred in the order code for the size

MSB4/MSB6 from page 12 onwards and for the size MSB9 from page 31 onwards.

You can find detailed information and all of the technical data in the documentation for the corresponding service unit. To do so, enter the code for the service unit (e.g. MS6-EE) in the search window in the product catalogue and select Documentation.

Note

Individual devices with selected features are available for the configurable service unit combinations

→ Overview lists.

Further feature options can be selected via the configurable individual device.

Not available in all markets.

- Flow sensor SFAM-90

Notes on individual service units and their features

MS-LFR and MS-LF:

Grade of filtration with feature E
 (40 μm) or C (5 μm)

MS-LFM:

- Grade of filtration with feature B
 (1 μm) or A (0.01 μm)
- Filter contamination sensor with feature DA is an optical differential pressure indicator with red-green range
- Filter contamination sensor with feature DP is an electric filter contamination indicator with switching output

MS-LRB/LRPB:

 Pressure output is to the rear, the pressure output is to the front if the feature Z (alternative flow direction) is selected

MS-EE and MS-DE:

- The supply voltage with feature 10V24 is only permissible up to an operating voltage of max. 10 bar
- With the supply voltages with feature V24/V110/V230 the solenoid head has a non-detenting/detenting manual override, with feature 10V24 just a non-detenting manual override

MS-LDM1:

 Flow cartridge with feature P05, P10 only for MSB4; with feature P20, P30, P40 only for MSB6

Festo core product range

- ★ Generally ready for shipping ex works in 24 hours
- ☆ Generally ready for shipping ex works in 5 days

Key feature

Conditions and exclusions of features

Note

If a service unit combination is configured with ISO thread then the individual devices also have ISO thread (e.g. the outlets of the branching module MS-FRM), individual devices with integrated MS pressure gauge (e.g. the pressure regulator MS-LR) have a display scale in [bar].

If you configure a service unit combination with NPT thread, the other pneumatic connections are equipped with NPT threads and integrated MS pressure gauges with the display unit [psi].

In addition to the conditions and exclusions mentioned here, you can also obtain information by selecting the information button beside some of the selection lists in the configurator.

General rules

- Selection of at least 2 to at most 10 service units
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1
- A micro filter MS-LFM must be installed upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1 in the flow direction
- Mounting bracket for large wall gap WPB must be chosen if the combination contains the electric pressure regulator MS-LRE, the soft-start and exhaust valve MS-SV-E or the lockable regulator MS-LRB without angled outlet block
- Regulators MS-LFR/LRP/LRE are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration

Service unit-specific rules

MS-LFM:

 Only manual condensate drain permissible with MS4-LFM with plastic bowl

MS-DL:

 No filter MS-LFR/LF/LFM with fully automatic condensate drain downstream of MS4-DL

SFAM:

- Connection size of the service unit combination must be at least G½ for SFAM-62 and at least G¾ for SFAM-90
- An SFAM cannot be installed directly downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- SFAM-90 only in flow direction from left to right

MS-SV-D/E:

 Must be the last service unit in the flow direction

Key features

ATEX certification

A configured service unit combination consisting of mechanical service units can be used in zones 1 and 2 of explosive gas atmospheres and in zones 21 and 22 of explosive dust atmospheres. The following service units are approved and can be selected using the code EX4 in the order section "EU certification":

- Filter regulator MS4/6/9-LFR
- Pressure regulator MS4/6/9-LR
- Pressure regulator for manifold assembly MS4/6-LRB
- Precision pressure regulator MS6-LRP
- Precision pressure regulator for manifold assembly MS6-LRPB

- Filter MS4/6/9-LF
- Fine and micro filter MS4/6/9-LFM
- Activated carbon filter MS4/6/9-LFX
- Water separator MS6/9-LWS
- Lubricator MS4/6-LOE
- Manual on-off valve MS4/6-EM1, MS9-EM
- Pneumatic soft-start valve MS4/6-DL
- Membrane air dryer MS4/6-LDM1
- Branching module MS4/6/9-FRM

A configured service unit combination consisting of mechanical and electric service units can be used in zone 2 of explosive gas atmospheres and in zone 22 of explosive dust atmospheres. In this case, the code EX2 must be selected in the order section "EU certification". The following electric service units are approved in addition to the mechanical service units:

- Electric on-off valve MS4/6/9-EE
- Electric soft-start valve MS4/6-DE
- Flow sensor SFAM

- Supplied with special accessories, e.g. mounting brackets, module connectors, connecting plates with earthing screws
- Only connecting plates with G thread possible
- Lubricated operation not permissible
- On-off valve MS-EE or soft-start valve MS-DE only with 24 V supply voltage

UL certification

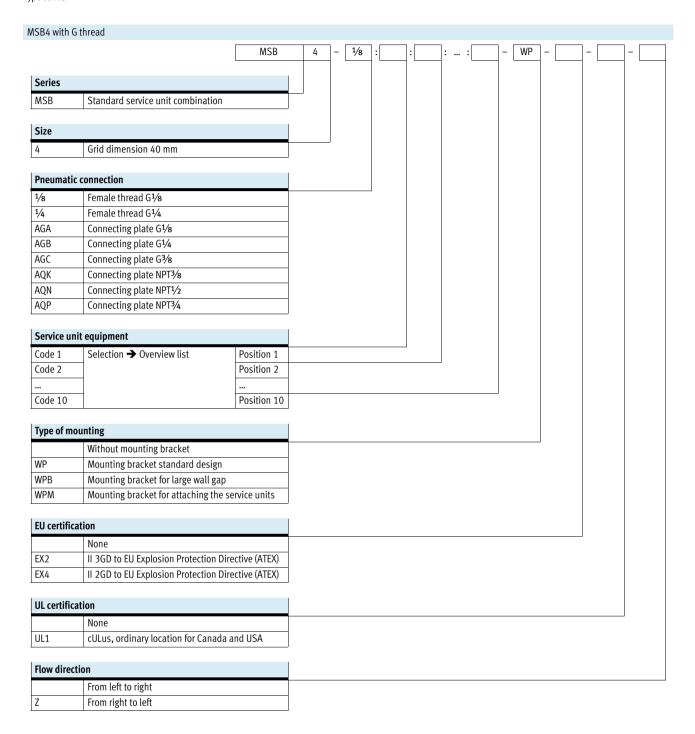

Component certified by UL for the market in the USA and Canada for normal environments. To be selected using the code UL1 in the order section "UL certification",

- Operating pressure/pressure regulation range max. 10 bar
- Supply voltage for on-off valve MS-EE or soft-start valve MS-DE max. 24 V DC

Pressur	re regulator MS-LR	
N1	MS-LR-D5-DI-AG-AS	Pressure regulation range 0.3 4 bar, directly actuated diaphragm regulator, integrated MS pressure gauge with outer scale in bar and inner scale in psi, standard rotary knob with detent, lockable with accessories
N2	MS-LR-D6-DI-AG-AS	Pressure regulation range 0.3 7 bar, directly actuated diaphragm regulator, integrated MS pressure gauge with outer scale in bar and inner scale in psi, standard rotary knob with detent, lockable with accessories
N7	MS-LR-D5-DI-AG-KD-AS	Pressure regulation range 0.3 4 bar, directly actuated diaphragm regulator, integrated MS pressure gauge with outer scale in bar and inner scale in psi, rotary knob underneath, standard rotary knob with detent, lockable with accessories
N8	MS-LR-D6-DI-AG-KD-AS	Pressure regulation range 0.3 7 bar, directly actuated diaphragm regulator, integrated MS pressure gauge with outer scale in bar and inner scale in psi, rotary knob underneath, standard rotary knob with detent, lockable with accessories

Code	ew list – Service units MS9 Type	Description
	re regulator MS-LR	
N35	MS-LR-D5-AG-AS	Pressure regulation range 0.3 4 bar, pilot actuated diaphragm regulator, integrated MS pressure gauge with outer
CCNI	M3-LK-D3-AG-A3	
N36	MS-LR-D6-AG-AS	scale in bar and inner scale in psi, standard rotary knob with detent, lockable with accessories Pressure regulation range 0.3 7 bar, pilot actuated diaphragm regulator, integrated MS pressure gauge with outer
OCN	MS-LK-D6-AG-AS	
Naz	MC ID D7 AC AC	scale in bar and inner scale in psi, standard rotary knob with detent, lockable with accessories
N37	MS-LR-D7-AG-AS	Pressure regulation range 0.5 12 bar, pilot actuated diaphragm regulator, integrated MS pressure gauge with oute scale in bar and inner scale in psi, standard rotary knob with detent, lockable with accessories
N53	MS-LR-D5-RG-AS	Pressure regulation range 0.3 4 bar, pilot actuated diaphragm regulator, integrated MS pressure gauge with red-
		green scale with outer scale in bar and inner scale in psi, standard rotary knob with detent, lockable with accessories
N54	MS-LR-D6-RG-AS	Pressure regulation range 0.3 7 bar, pilot actuated diaphragm regulator, integrated MS pressure gauge with red-
		green scale with outer scale in bar and inner scale in psi, standard rotary knob with detent, lockable with accessories
N55	MS-LR-D7-RG-AS	Pressure regulation range 0.5 12 bar, pilot actuated diaphragm regulator, integrated MS pressure gauge with
		red-green scale with outer scale in bar and inner scale in psi, standard rotary knob with detent, lockable with
		accessories
N56	MS-LR-D5-A4-AS	Pressure regulation range 0.3 4 bar, pilot actuated diaphragm regulator, adapter plate for EN pressure gauge 1/4
	ino zik by ////io	(without pressure gauge), standard rotary knob with detent, lockable with accessories
N57	MS-LR-D6-A4-AS	Pressure regulation range 0.3 7 bar, pilot actuated diaphragm regulator, adapter plate for EN pressure gauge 1/4
		(without pressure gauge), standard rotary knob with detent, lockable with accessories
N58	MS-LR-D7-A4-AS	Pressure regulation range 0.5 12 bar, pilot actuated diaphragm regulator, adapter plate for EN pressure gauge 1/4
		(without pressure gauge), standard rotary knob with detent, lockable with accessories
N61	MS-LR-D6-AG-MPA-AS	Pressure regulation range 0.3 7 bar, pilot actuated diaphragm regulator, integrated MS pressure gauge with outer
		scale in MPa, standard rotary knob with detent, lockable with accessories
U10	SFAM-5000L-M-2SV-M12	connection (plug M12x1, 5-pin) Flow measuring range 50 5,000 l/min, electrical output (2x PNP or NPN, 1 analogue output 0 10 V), electrical
		connection (plug M12x1, 5-pin)
U11	SFAM-10000L-M-2SA-M12	Flow measuring range 100 10,000 l/min, electrical output (2x PNP or NPN, 1 analogue output 4 20 mA),
		electrical connection (plug M12x1, 5-pin)
U12	SFAM-10000L-M-2SV-M12	Flow measuring range 100 10,000 l/min, electrical output (2x PNP or NPN, 1 analogue output 0 10 V), electrical
		connection (plug M12x1, 5-pin)
U13	SFAM-15000L-M-2SA-M12	Flow measuring range 150 15,000 l/min, electrical output (2x PNP or NPN, 1 analogue output 4 20 mA),
		electrical connection (plug M12x1, 5-pin)
U14	SFAM-15000L-M-2SV-M12	Flow measuring range 150 15,000 l/min, electrical output (2x PNP or NPN, 1 analogue output 0 10 V), electrical
		connection (plug M12x1, 5-pin)
C-tt -1		L
Soft-st V12	art/quick exhaust valve MS-SV (not MS-SV-C-V24-S-VS	Performance Level "c", supply voltage 24 V DC, operating pressure 3.5 16 bar, electrical connection to
VIZ	M3-3V-C-V24-3-V3	
V22	MS-SV-C-V24-S-AD7	EN 175301-803 (plug connector, type A), silencer, cover plate Performance Level "c", supply voltage 24 V DC, operating pressure 3.5 16 bar, electrical connection to
VZZ	M3-3V-C-V24-3-AD/	
		EN 175301-803 (plug connector, type A), silencer, pressure sensor with operational status indicator (plug M8,
V2.F	MC CV C 4 OV2 / D C VC	threshold value comparator, PNP, N/O contact)
V35	MS-SV-C-10V24P-S-VS	Performance Level "c", supply voltage 24 V DC, operating pressure 3.5 10 bar, electrical connection to
Vac	MS-SV-C-10V24P-S-AD7	IEC 61076-2-101 (plug connector M12x1, 4-pin to DESINA), silencer, cover plate Performance Level "c", supply voltage 24 V DC, operating pressure 3.5 10 bar, electrical connection to
V36	MO-24-7-104744-9-401	IEC 61076-2-101 (plug connector M12x1, 4-pin to DESINA), silencer, pressure sensor with operational status indic-
		ator (plug M8, threshold value comparator, PNP, N/O contact)
Water	separator MS-LWS	
W1	MS-LWS-U-V	Metal bowl, fully automatic condensate drain
