

Modular controllers CECX

FESTO

Modular controllers CECX

Key features

FESTO

At a glance

Versatile

The controller is functionally designed as a master and motion controller. It is a powerful control unit that can simultaneously execute both comprehensive PLC functions and multi-axis movements with interpolation.

Controlling electric axes

Simple commissioning, programming and servicing:
With the SoftMotion module, the CoDeSys software offers a powerful programming environment

for controlling all electric axes with CANopen fieldbus connection. Additionally available: module libraries, configuration tools and drivers.

Reliable

It is certified to CE, UL/CSA, produced based on global experience in front end automation and uses standard hardware and CoDeSys standard software.

Economical

The modular structure offers the right solutions for all requirements. It has a high component density, is easy to

use and can be mounted on H-rails. It is fully compatible with all products from Festo and other manufacturers.

Flexible

Programming to the IEC 61131-3 standard means the CECX is flexible and open for all types of control tasks. Numerous communication modules

(PROFIBUS, CANopen, Ethernet) guarantee compatibility with other systems.

Product features

- Two product versions
 - Modular master controller with CoDeSys
 - Motion controller with CoDeSys and SoftMotion
- Easy configuration
- Automatic module detection
- Search function for finding controllers in the network
- DHCP-compatible
- Automatic transfer of the communication settings to the project

Module selection

CPU unit

- Power PC 400 MHz
- Ethernet interface
- CAN-Bus interface
- RS 485 interface
- USB interface
- Compact Flash card as removable storage
- Slots for optional modules

Optional modules

The controller CECX-X can be extended with the following optional modules:

- Ethernet interface
- CAN interface
- RS 232 serial interface
- RS 485-A/422-A serial interface

Input/output modules

- Digital modules
- Analogue modules for current and voltage
- Temperature input modules
- Encoder counter modules

Communication modules

- PROFIBUS master DP-V1
- PROFIBUS slave DP-V0
- PROFIBUS slave DP-V1
- 2x RS 232 serial interface

Actuating electric axes from Festo via CANopen interface

- Motor controllers CMMP-AS for servo motors
- Motor controller CMMS-ST for stepper motors
- Motor controllers SFC-DC and SFC-LAC

Technical data

Controller CECX-X-C1

Modular master controller
with CoDeSys

The controller is the central module in the modular control unit. It provides the resources for executing the application software.

Controller CECX-X-M1

Motion controller with CoDeSys
and SoftMotion

The controller has three plug-in slots for optional modules to effect the following connections for interfaces:

- CAN bus interface
- Ethernet electrical interface
- RS 232 serial interface

The controller is equipped with the optional module for the Ethernet electrical interface by default.

Modular controllers CECX

Technical data

FESTO

Input module, analogue

CECX-E-4E-T-P1

There are 4 temperature inputs available for the temperature sensor PT 100.

The following function is available:

- 2-wire and 4-wire connection

Input module, analogue

CECX-E-6E-T-P2

There are 6 temperature inputs available for the thermoelement type J, K and L.

The following function is available:

- Internal and external cold junction compensation

General technical data

	CECX-E-4E-T-P1	CECX-E-6E-T-P2
Electrical connection technology for I/O	Socket strip, grid 5.08 mm –	Gold contacts
Power consumption at 5 V [W]	0.3	0.6
Power consumption at 24 V [W]	2.5	1.6
Resistance to shock	EN 60068-2-27 EA 15 g, 11 ms (half sine)	
Resistance to vibration	EN 60068-2-6-FC 5 ... 9 Hz, 3.5 mm 9 ... 150 Hz, 1g

Encoder interface

CECX-C-2G2

The following functions are available:

- Displacement measurement:
incremental/decremental counter
(displacement measurement) using
A and B track, 1-way, 2-way, 4-way
evaluation, 32-bit resolution
- Pulse counter on track A, 32-bit
resolution
- Pulse counter on track A with direc-
tion evaluation for track B, 32-bit
resolution
- Speed measurement by means of
sampling with internal time basis

- Shaft encoder monitoring using
zero-track information
- Counter reading latch function
via an external latch input
- Counter reading latch function
via zero pulse
- Sensor rupture monitoring
for tracks A, B and zero

Encoder interface

CECX-C-2G1

The following function is available:

- Power/receive status display
- Binary/grey signal range

General technical data

	CECX-C-2G2	CECX-C-2G1
