Key features

At a glance

- Economical push-in fittings for pneumatic applications with a temperature range up to 60°C and a pressure range up to 8 bar.
- Tubing O.D. of 4, 6, 8, 10 and 12 mm with connecting threads M3, M5, M7, G1/8, G1/4, R1/8 and R1/4.

For manufacturing lithium-ion batteries

Recommended for production facilities for manufacturing lithium-ion batteries. Metals with copper, zinc or nickel as the main constituent are excluded from use. Exceptions are nickel in steels, chemically nickel-plated surfaces, printed circuit boards, cables, electrical plug connectors and coils.

The fittings for manufacturing lithium-ion batteries are identified by an "e" on the releasing ring.

Which fitting fits which thread?

Metric thread

- Threads are comparable with G threads and are fitted as cylindrical metric threads
- Sealing is guaranteed via an O-ring.

R thread based on JIS B0203 and compatible with pressure-tight media to EN 10226.

- Self-sealing thread
- Sealing via coated threads
- No additional sealing surface required
- Smaller installation dimensions since there is no need for an offset for the sealing surface
- Can be reused up to 3 times.

- Note

If R male threads are combined with G female threads, leakages can occur if the G female thread was not manufactured cleanly or if it is not within permissible tolerances. In this case additional sealing, e.g. using sealing band, is required.

Key features

Attaching/detaching tubing	
Attaching	Detaching
The prerequisite for ensuring that the inside seal is securely held and protected against damage is that the tube is cut into straight lengths and deburred. 1) Insert tubing as far as the stop. It is important to ensure that the tubing is inserted into the inner seal. Depending on the tolerance between the tubing and the seal, the contact of the tubing with the seal may be wrongly interpreted as the stop. 2) Check that the tubing connection is secure by pulling gently on the tube.	1) The tubing can be easily detached by pressing and holding down the releasing ring. Remove the tubing carefully from the fitting. 2) Before re-using the tubing, remove the damaged part by cutting it off.

Type codes

001	Series

Technical data

General technical data

Pneumatic connection 1	Male thread							For tubing O.D.				
	M3	M5	M7	G1/8	G1/4	R1/8	R1/4	4 mm	6 mm	8 mm	10 mm	12 mm
Design	Push-pull principle											
Mounting position	Any											
Type of seal on the screwed trunnion	Sealing ring					Coating		—				
Nominal tightening torque	0.3	0.8	2	7	9	—		—				
Tolerance for nominal tightening torque	± 5%			± 20%		—		—				

Operating and environmental conditions

Operating pressure for entire temperature range	–0.095 ... 0.8 MPa											
	–0.95 ... 8 bar											
	–13.775 ... 116 psi											
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]											
Note on the operating/pilot medium	Operation with lubricated medium possible											
Suitable for the production of lithium-ion batteries	Metals with more than 1% by mass of copper, zinc or nickel are excluded from use. Exceptions are nickel in steel, chemically nickel-plated surfaces, printed circuit boards, cables, electrical plug connectors and coils.											
Cleanroom class	Class 4 to ISO 14644-1											
PWIS conformity	VDMA24364 zone III											
Ambient temperature	–5 ... 60 °C											
Corrosion resistance class CRC ¹⁾	1 - Low corrosion stress											
Variants	Metals with copper, zinc or nickel as the main constituent are excluded from use. Exceptions are nickel in steel, chemically nickel-plated surfaces, printed circuit boards, cables, electrical plug connectors and coils.											

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, or parts which are covered in the application (e.g. drive trunnions).

Materials

Pneumatic connection 1	Male thread							For tubing O.D.				
	M3	M5	M7	G1/8	G1/4	R1/8	R1/4	4 mm	6 mm	8 mm	10 mm	12 mm
Releasing ring colour	Blue											
Housing material	PBT, high-alloy stainless steel			High-alloy stainless steel		PBT, high-alloy stainless steel		PBT				
Threaded seal material	NBR, high-alloy stainless steel			Aluminium, TPEE		PTFE		–				
Releasing ring material	POM											
Tubing seal material	NBR											
Tube retaining claw material	High-alloy stainless steel											
Note on materials	RoHS-compliant
