

## Standards-based cylinders DSBG, to ISO 15552

FESTO

## Key features

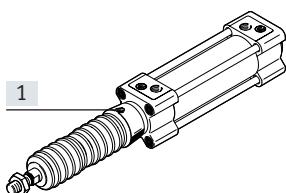

### At a glance

- Standards-based cylinders to ISO15552 (corresponds to the withdrawn standards ISO 6431, DIN ISO 6431, VDMA24562, NFE49003.1 and UNI 10290)

- Sturdy tie rod design
- Double-acting
- For contactless position sensing
- Available with protection against rotation
- EX4: for use in potentially explosive areas
- A wide range of accessories enables the cylinder to be installed virtually anywhere
- There is a choice of three types of cushioning:
  - P cushioning: elastic cushioning rings/plates at both ends
  - PPS cushioning: pneumatic cushioning, self-adjusting at both ends
  - PPV cushioning: pneumatic cushioning, adjustable at both ends
- The variants can be configured according to individual needs using a modular product system
- Excellent flexibility thanks to a wide range of variants

### DSBG....-P2 – with bellows kit DADB, to ISO 15552

The bellows protects the piston rod, the seal and the bearing from the effects of a wide range of media, which has a positive impact on the service life of these components.

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air for the kit must be ducted via a pressure compensation hole in the connection part [1].

The kit protects the piston rod, seal and bearing against a wide variety of media, for example:

- Dust
- Chippings
- Oil
- Grease
- Petrol

### Ordering the bellows kit

An extended piston rod is absolutely essential if a bellows kit is to be used.

The bellows kit can be ordered via the modular product system or as an accessory. The following must be noted in this case:

#### Ordering via the modular product system:

The bellows kit is supplied mounted on the bearing cap using feature P2. The required piston rod extension is automatically taken into consideration. This means that there is no need to specify a value for feature ...E.

#### Ordering as an accessory:

If the bellows kit is ordered as an accessory, the required value → page 39 must be entered for characteristic ...E in the modular product system.

### Position sensing/force control

With position transmitter SMAT, SDAT → page 43

Analogue position feedback possible

- Analogue output  
– 0 ... 10 V

With proportional-pressure regulator VPPM

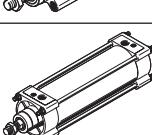

Stepless adjustment of the gripping force possible

- Setpoint value input
  - 0 ... 10 V
  - 4 ... 20 mA

### Variants from the modular product system

Symbol	Key features	Description
	Q	Square piston rod Protection against rotation. For position-oriented feeding
	L	Low friction <ul style="list-style-type: none"> <li>Break-away pressure: low</li> <li>Dynamic response: suitable for very fast movements, especially at low operating pressures</li> </ul> Application example: very dynamic movements with no standstill

## Key features

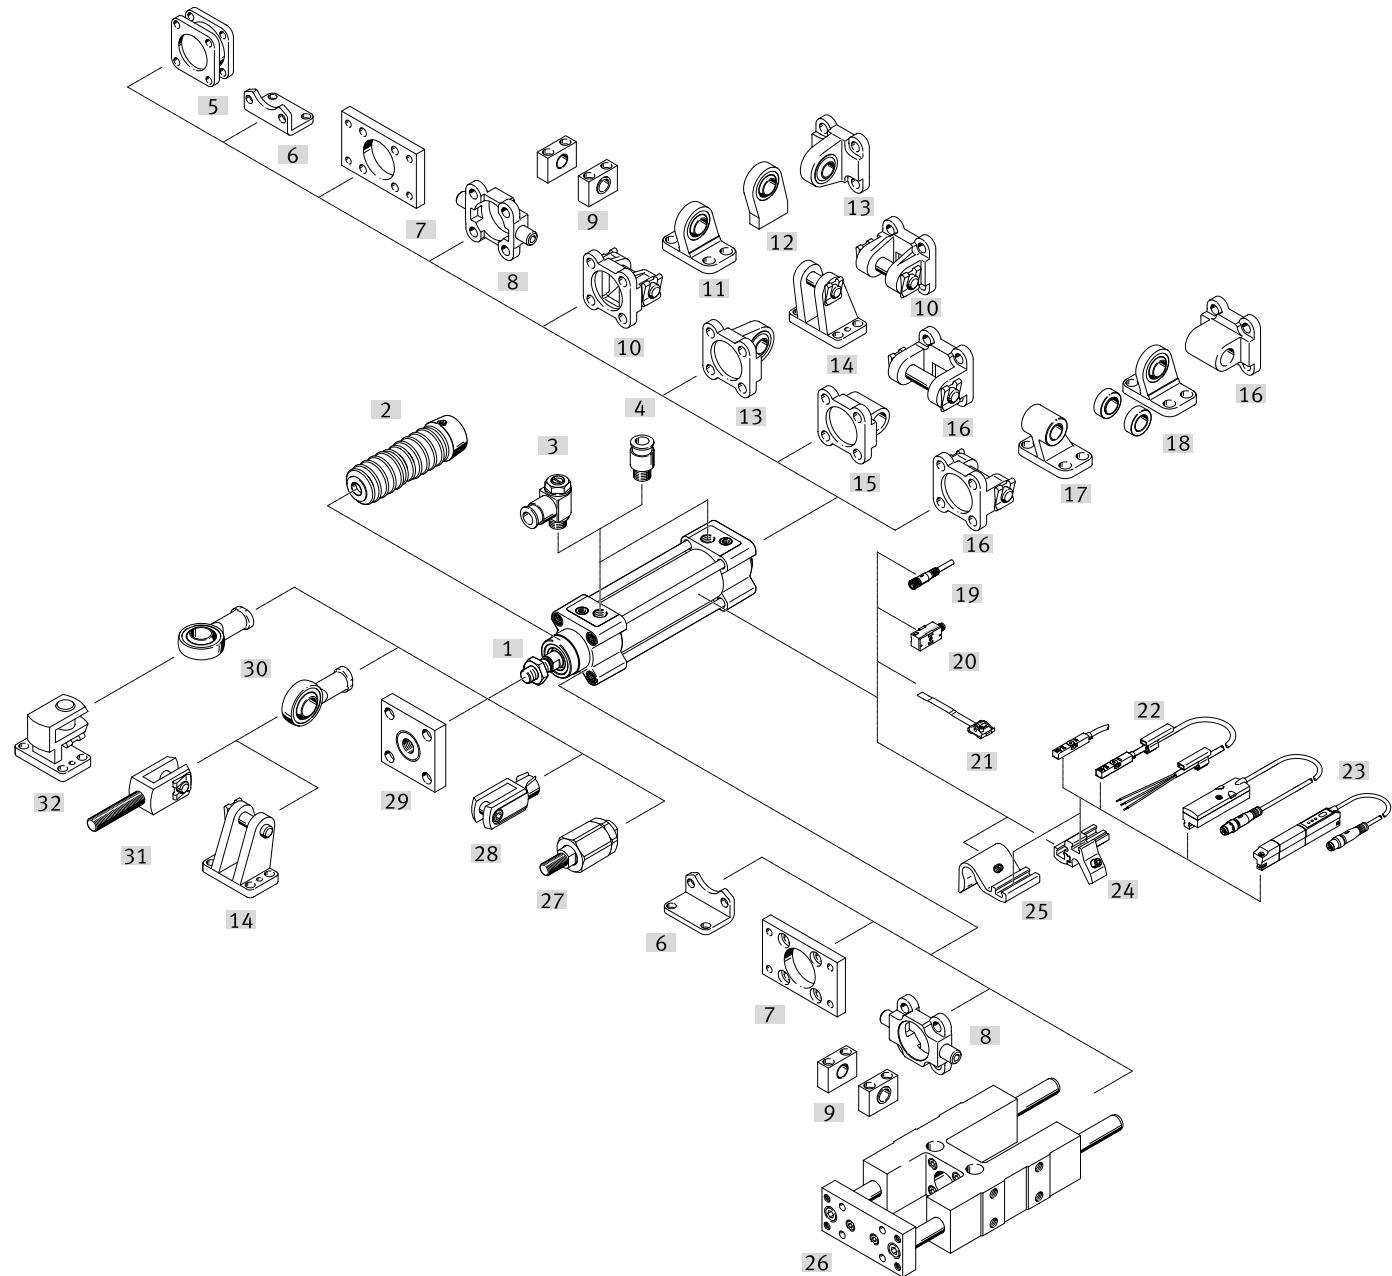

Variants from the modular product system		
Symbol	Key features	Description
	U Constant, slow movement	<ul style="list-style-type: none"> <li>• Break-away pressure: very low</li> <li>• Dynamic response: suitable for very slow, constant and stick-slip-free movements</li> </ul> <p>Application example: slow, constant feed motion</p>
	L1 Low friction for balancer applications	<ul style="list-style-type: none"> <li>• Break-away pressure: low</li> <li>• Dynamic response: suitable for slow movements with constant application of pressure at one end. System friction is independent of operating pressure</li> </ul> <p>Application example: balancing of a mass (balancer, belt tensioner with constant feed motion)</p>
	T Through piston rod	For working at both ends with the same force in the forward and return stroke, for attaching external stops
	F Female thread on the piston rod	–
	R3 High corrosion protection	All external cylinder surfaces comply with corrosion resistance class 3 to Festo standard 940 070. The piston rod is made from corrosion- and acid-resistant steel
	T1 Heat-resistant seals	Temperature range 0 ... +120 °C
	T3 Low temperature	Temperature range -40 ... +80 °C
	T4 Heat-resistant seals	Temperature range 0 ... +150 °C
	A2 Wiper variant	Hard wiper: The cylinder has a hard-chromium plated piston rod and a hard scraper, which protects against dry, dusty and viscous media
	A3 Wiper variant	Unlubricated operation: Cleaning processes degrease the piston rod. A special piston rod seal designed for unlubricated operation permits a longer service life compared to the standard seal.
	A6 Wiper variant	Metal scraper: The cylinder has a hard-chromium plated piston rod and metal scraper, which scrapes off hard particles (e.g. welding spatter) sticking to the piston rod. For use in welding systems, for example
	...E Extended piston rod	1 ... 500 mm
	...L Extended piston rod thread	1 ... 70 mm
	...S Shortened piston rod thread	1 ... 44 mm
	M... Piston rod thread	Piston rod thread version: M16/M16x1.5/M20/M20x1.5/M24/M27
	...V Swivel mounting position	<ul style="list-style-type: none"> <li>• Swivel mounting, position freely selectable</li> <li>• Position can be moved at any time</li> </ul>
	Thread length of spacer bolts: ...LB2 On the bearing cap ...LB3 On the end cap	<ul style="list-style-type: none"> <li>• Variable thread length: 20 ... 140 mm</li> <li>• Optionally on the bearing or end cap</li> </ul>

## Product range overview

## Datasheet

### Max. transverse force $F_q$ as a function of stroke length $l$

Horizontal installation

Vertical installation

- Ø 32
- - - Ø 40
- - - - Ø 50/63
- - - - - Ø 80/100
- - - - - - Ø 125

**Note**

No transverse loads are permitted in combination with characteristic DSBG-...-L1.

### Permissible torsional backlash for variant Q – with protection against rotation

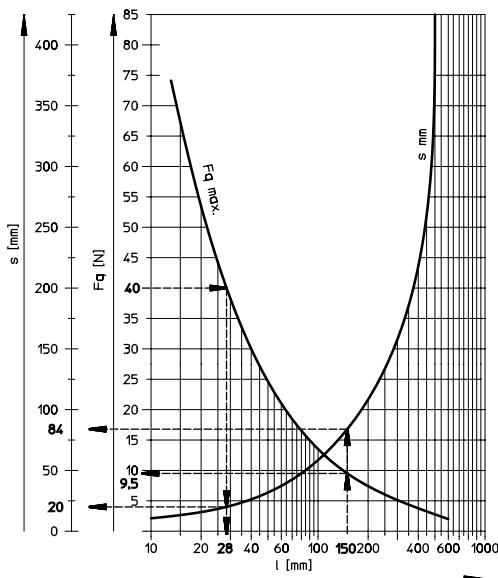

Piston Ø	32	40	50	63	80	100
Torsional backlash [°]	±0.65	±0.6	±0.45	±0.45	±0.45	±0.45

## Datasheet

### Max. transverse force $F_q$ as a function of stroke length $l$ and lever arm $s$

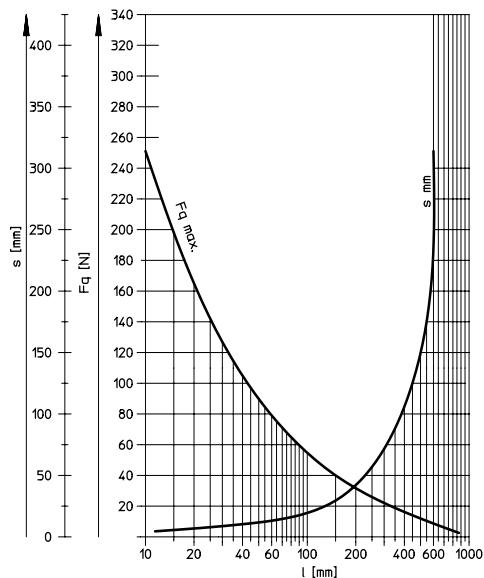

Q – With protection against rotation  
 Ø 32

Max. torque = 800 Nmm/max. stroke = 300 mm

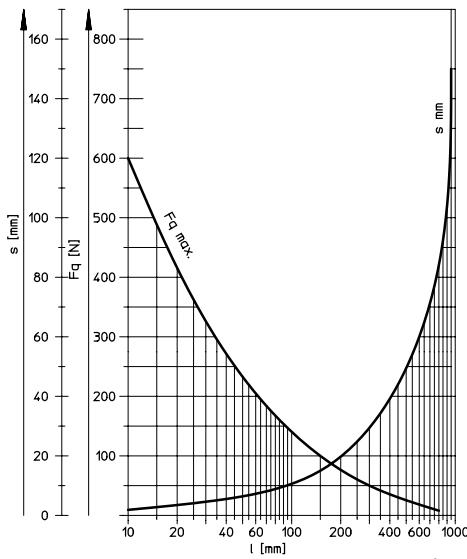

Ø 40

Max. torque = 1100 Nmm/max. stroke = 400 mm

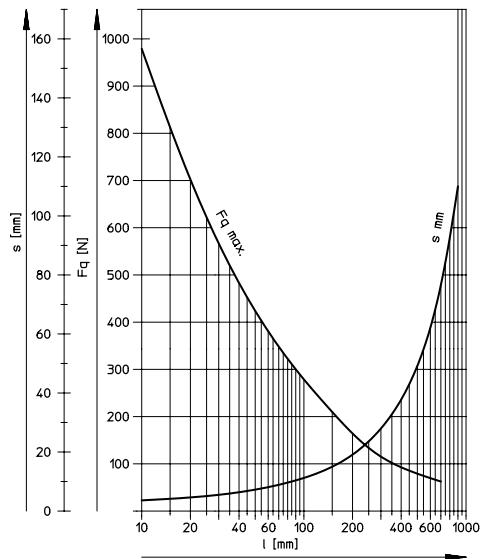

Ø 50/63

Max. torque = 1500 Nmm/max. stroke = 500 mm

Ø 80/100

Max. torque = 3000 Nmm/max. stroke = 600 mm

## Datasheet

### Examples for piston diameter 32 mm

#### Example 1:

Stroke length l = 150 mm

Result: permissible

Lateral force F<sub>q</sub> = 9.5 N

Lever arm s = 84 mm

#### Example 2:

Lateral force F<sub>q</sub> = 40°N

Result: permissible

Stroke length l = 28 mm

Lever arm s = 20 mm

#### Example 3:

Stroke length l = 150 mm

Lever arm s = 100 mm

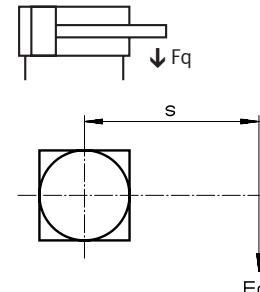

$$F_q = \frac{M}{s} = \frac{800 \text{ Nmm}}{100 \text{ mm}}$$

M = max. torque

s = lever arm

Result: permissible

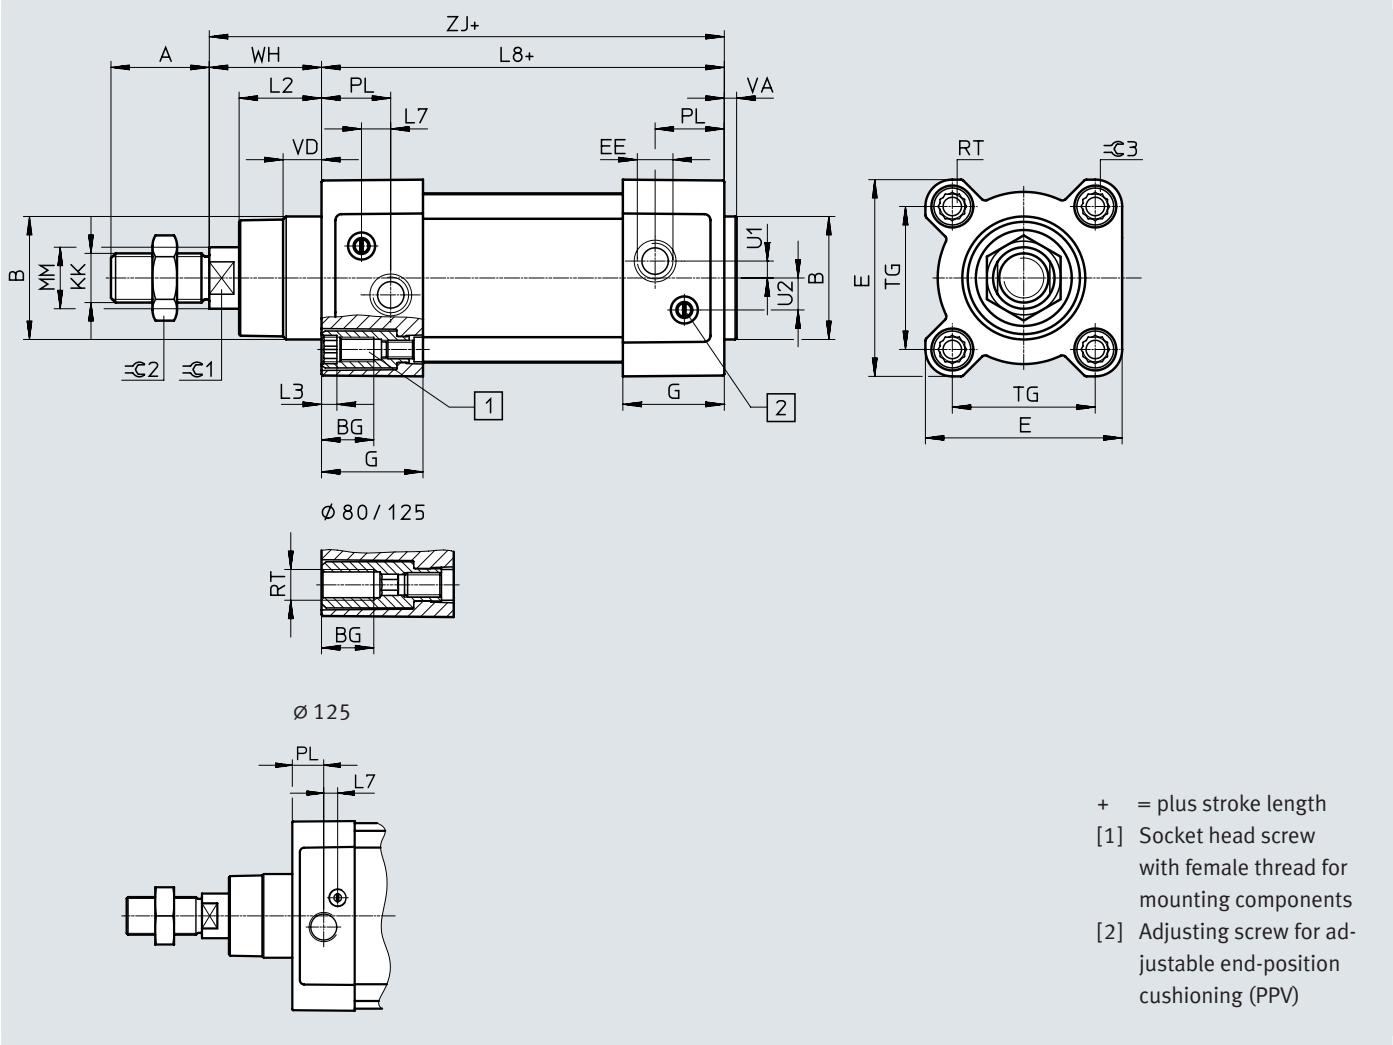

$$F_q = 8 \text{ N} < F_{q\max} = 9.5 \text{ N}$$

1) Threads with a smaller nominal diameter than in the basic version can generally not withstand such high loads. If necessary, the screw connection must be engineered.

## Datasheet

### Dimensions – Variants

Q – With protection against rotation

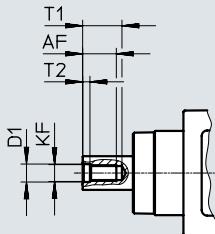

#### Note

In combination with variant T, the piston rod is protected against rotation at one end.

Download CAD data → [www.festo.com](http://www.festo.com)

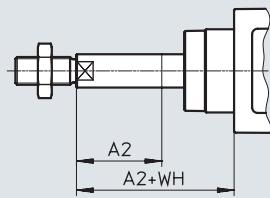

F – Female thread

#### Note

In combination with variant T, the piston rod has female threads at both ends.

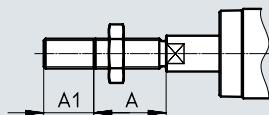

...E – Extended piston rod

#### Note

Piston rod extension at one end in combination with variant T.  
In combination with variants T and Q, the piston rod is extended only at the square piston rod.

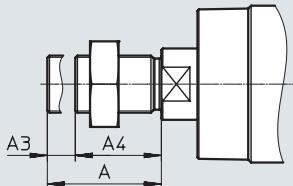

...L – Extended piston rod thread

#### Note

In combination with variant T, the piston rod thread is extended at both ends.

.....S – Shortened piston rod thread

#### Note

In combination with variant T, the piston rod thread is shortened at both ends.

Effective thread length:  $A_4 = A - A_3$

## Ordering data – Modular product system

Ordering table										
Size	32	40	50	63	80	100	125	Conditions	Code	Enter code
Protection against particles	Standard									
	Protective bellows on bearing cap				–	[8]	P2			
Wiper variant	None									
	Hard wiper							A2		
	For unlubricated operation							A3		
	Metal scraper							A6		
EU certification	None									
	II 2GD						[9]	EX4		
Swivel mounting position [mm]	Without									
	0 ... 2800							-...V		
Piston rod extension [mm]	Without									
	1 ... 500						[10]	-...E		
Extended piston rod thread [mm]	Without									
	1 ... 35	1 ... 70					[10]	-...L		
Shortened piston rod thread [mm]	Without									
	–	1 ... 30	1 ... 44					-...S		
Piston rod thread	Standard (→ 17)									
	–	M16				[11]	-M16			
		M16x1.5				[11]	-M16P			
		M20				[11]	-M20			
	–	M20x1.5				[11]	-M20P			
		M24				[11]	-M24			
		M27				[11]	-M27			
Thread length [mm] Spacer bolt	Without									
	–	On bearing cap				[11]	-...LB2			
		20 ... 140	24 ... 140							
	–	On the end cap				[11]	-...LB3			
		20 ... 140	24 ... 140							

[8] P2 Not with N3, A2, A3, A6, EX4  
Only for strokes 10 ... 500 mm

[9] EX4 Not with T1, T3, T4, P2, A3, A6, ...LB2, ...LB3

[10] ...E, ...L Only up to stroke of 2000 mm.

Not with N3

[11] M..., LB... Not with N3

### Note

The piston rod extension for the bellows is automatically taken into consideration when characteristic P2 is selected. This means that there is no need to specify a value for characteristic ...E.

### Note

If a thread smaller than the standard thread is selected for characteristic M... (piston rod thread), this may reduce the load capacity.

### Note

When feature ...E is selected in combination with feature P2, the part of the piston rod extension ...E is not covered by the protective bellows.

### Note

If feature M... is selected, the scope of delivery does not include the piston rod nut.

### Note

When feature P2 is selected in combination with feature T (through piston rod), the protective bellows is mounted at one end only.

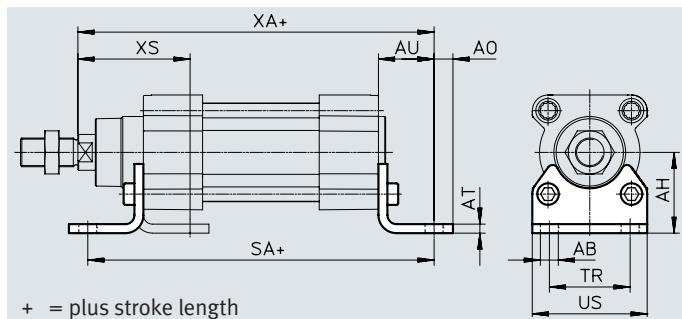

## Accessories

### Foot mounting HNC/CRHNC

Material:

HNC: Galvanised steel

CRHNC: High-alloy steel
