Festo LX for Industry GASL

FESTO

Characteristics

At a glance

Festo LX is a cloud-based learning portal. It therefore doesn't need to be installed locally and you always have access to the latest updates to functions and training content.

The Festo Learning Experience (LX) for Industry is our all-in-one platform solution for digital learning. It provides access to all content, features and the AI-supported authoring tool, offering the perfect learning experience in your business.

Festo LX for Industry offers a wide range of learning content on many technical education and training topics for your workforce. The content ranges from technical basics to current trends in the industry, from factory automation and fluid technology, IIoT and Industry 4.0 to electrical engineering, process automation, renewable energies and STEM.

The different course formats promote the combination of digital learning and practical application. In addition to eLab courses for hardware-related practical learning with Festo Didactic learning systems, there are completely independent eLearning courses, evaluations to check learning success and assessing the knowledge acquired as well as various learning videos.

With the integrated LX Creator AI, it is easy to create new learning content and to adapt existing learning content.

Festo LX also provides access to circuits and simulations. Teachers can create and edit circuits and students can simulate them.

FluidSIM in Festo LX works on any device with a modern web browser, eliminating the need to switch between different programs and devices.

Festo LX is a comprehensive and user-friendly platform for circuit simulations and includes convenient license management.

The benefits of a Festo LX for Industry subscription:
- Access to the course database with lots of technical learning content
- Search function and filter options to find the right learning content
- Easily customise courses and create your own learning content
- Mobile learning on different devices
- Managing learning systems and devices
- Managing and organising groups and learners
- Evaluation options for checking learning success
- Interactive and multimedia courses that are fun

Area of application

Festo LX is a cloud-based learning portal. It therefore doesn't need to be installed locally and you always have access to the latest updates to functions and training content.

A permanent internet connection and a standard web browser (e.g. Google Chrome, Microsoft Edge, Mozilla Firefox) are required for Festo LX.

Licence term

Once purchased, the Festo LX subscription is activated for one year and is automatically extended for a further year at the end of the year. The subscription can be terminated with one month's notice to the end of the term in the Festo App World account.

Number of licences

Festo LX is available as a subscription solution for an unlimited number of registered users, while the number of simultaneously active users can be freely selected.
