

# Shock absorber retainer DAYP-E21-90

Part number: 8067062

FESTO

## Data sheet

| Feature                        | Value                            |
|--------------------------------|----------------------------------|
| Size                           | 90                               |
| Mounting position              | optional                         |
| Corrosion resistance class CRC | 2 - Moderate corrosion stress    |
| LABS (PWIS) conformity         | VDMA24364-B2-L                   |
| Ambient temperature            | -10 °C...60 °C                   |
| Product weight                 | 1552 g                           |
| Type of mounting               | With through-hole                |
| Note on materials              | RoHS-compliant                   |
| Material stops                 | Anodised wrought aluminium alloy |
| Material retaining bracket     | Anodised wrought aluminium alloy |
