

- Shortest cycle times
- Compact design
- Simple planning, installation and commissioning
- Installation and adaptation concept

Handling modules HSP

Key features at a glance

Field of application

The handling module is a new generation of function modules for the automatic transfer, feed and removal of small parts in extremely confined spaces. This is achieved by means of a guided vertical and horizontal motion sequence. A backlash-free cross-guide

with recirculating ball bearing elements ensures high precision and good rigidity.

The combination of a semi-rotary drive and a slotted guide system produces a compact unit for a complete pick & place cycle.

Special features

- Compact design
- Extremely short cycle times
- Low cost
- Simple commissioning
- For working loads up to 1.6 kg
- Stroke adjustment along Y- and Z-axes
- Wait positions possible
- No planning costs

Three drive variants are available

	Pneumatic: HSP-...-AP, with swivel module DSM 	Electric: HSP-...-AE, with servo motor unit MTR-DCI-...-HM 	Without drive: HSP-...-AS, with drive shaft 
--	---	--	---

Advantages

	<ul style="list-style-type: none"> • Fast • Cost-effective • Ready to install • No system planning required • Simple commissioning 	<ul style="list-style-type: none"> • Freely positionable • Freely selectable speed • Smooth motion sequence • Ready to install • No system planning required • Simple commissioning using teach-in procedure 	<ul style="list-style-type: none"> • Compact • Universal compatibility • Variable drive interface • On request: Drive options in combination with servo motors MTR-AC

Handling modules HSP

Typical applications

HSP-...-AP, pneumatic

Linear transfer

- Fast feed and removal, e.g. for linear transfer or rotary indexing table

Belt-type part positioning

- Fast belt-type part positioning of small parts

HSP-...-AE, electric

Rotary indexing table

- Flexible pick & place unit with quality inspection of components and ejector for reject parts
- Handling of parts with different heights
- Handling at different speeds, e.g. for linear transfer or rotary indexing table

Rotary indexing table

- Adjustable wait position module directly above workpiece/workpiece carrier
- Insertion tasks at different speeds for delicate components

HSP-...-AS, without drive

Linear transfer

- Compact twin pick & place unit for linear transfer

Rotary indexing table, linear transfer

- Fast and flexible pick & place unit with servo motor MTR-AC
- Electrical variant using third-party motor

Handling modules HSP

Key features at a glance

FESTO

HSP-....-AP – pneumatic with swivel module DSM

- [1] Slotted guide plate
- [2] Adjustable stop
- [3] Shock absorber YSRW
- [4] Stop sleeve
- [5] Sensor rail
- [6] Pressure piece
- [7] Swivel module DSM
- [8] Swivel lever
- [9] Cable binder holder
- [10] Cross-guide

HSP-....-AS – without drive (rear side)

- [1] Back plate
- [2] Shaft with Woodruff key
- [3] Slotted guide plate
- [4] Ball bearings
- [5] Aluminium rail for alignment of slotted guide plates

Handling modules HSP

Key features at a glance

HSP-...-AE – electrical version with servo motor unit MTR-DCI-...-HM

The technology in detail

- [1] Proximity sensor cables are installed via profile slots in the side and back plate.

- [2] The pressure piece guarantees freedom from backlash and precision at the end positions and in the effective linear stroke along the Z-axis.

- [3] Cable binder holders facilitate the secure routing of tubing and cables.

- [4] The adjustable slotted guide plate permits precise stroke setting.

HSP-...-AP-SD-WL	2800	3600	8100

Repetition accuracy [mm]

To ensure low-vibration operation, the working load should be mounted as close as possible to the guide rail of the handling module.

Repetition accuracy is guaranteed by

mounting the working load (adapter plate, rotary drive and/or gripper, gripper finger, workpiece) within the mounting surface of the adapter kit HAPG.

Mounting surface of HAPG

Size	12	16	25
Repetition accuracy at end positions	± 0.01	± 0.01	± 0.02

Travel times t as a function of working load m

The travel time t is the time taken for the handling module to move from one end position to the other and back again.

The working load m is the load attached to the vertical guide rail (e.g. adapter, gripper, semi-rotary drive and workpiece).

— HSP-12-AP
- - HSP-16-AP
- · - HSP-25-AP

Cycle times [s]

The cycle time t_c comprises the travel time t and the dwell time t_e at the end positions.

$$t_c = t + t_e$$

The value must not fall below the minimum cycle time.

Size	12	16	25
Min. cycle time	0.6	0.8	1.0

Example for HSP-12-AP

Step 1:

The following values are assumed:

Working load m = 0.15 kg

Dwell time t_e = 2 x 50 ms

(50 ms per end position)

Step 2:

The travel time can be determined from the graph:

$t = 400$ ms

Step 3:

This gives us a cycle time:
 $t_c = 400$ ms + 100 ms = 500 ms

Step 4:

The table gives us a min. cycle time of 600 ms. This means that the movement has to be controlled.

Data sheet

Stroke adjustment

Y stroke:

- Once the HSP has been mounted, the Y strokes of the pick and place position can be set independently of each other.

Z stroke:

- Differences in height, for example between a rotary indexing table and a transfer system, can be compensated after mounting.

Y-axis (horizontal)

Z-axis (vertical)

Procedure:

- 1 Loosen the screws
- 2 Adjust the slotted guide plate using the adjustment screw (the slotted guide plate must always make contact with the guide rail)
- 3 Tighten the screws

Procedure:

- 1 Loosen the lock nut
- 2 Set the desired Z stroke using the set screw
- 3 Tighten the lock nut

Wait position module

Application and mode of operation

Figure 1:

Figure 2:

Circuit diagram for HSP with wait position module

- - Note

When used in combination with the wait position module, the handling module HSP must be actuated using a 5/3-way valve (normally pressurised). The actuating cylinder is actuated using a 5/2-way valve. The actuating cylinder may only be used for "pulling" applications.

- [1] The handling module HSP is at the right-hand end position. The actuating cylinder is extended in its initial position.
- [2] The 5/3-way valve is reset once the handling module reaches the left-hand end position. (Figure 1)
- [3] During retraction, the actuating

- cylinder pulls the handling module upwards to its wait position. The operating area is then free. (Figure 2)
- [4] From the wait position, the handling module can move either to the initial position or to the other end position.

Size	HSP-12	HSP-16	HSP-25
Max. Z stroke of wait position module	15	25	25

Simple solution for your application

Advantages of handling module HSP-...-AE – Installation and commissioning

- Handling module is supplied with motor already attached.
- Less wiring required thanks to integration of controller concept.
- Motor with gear unit, controller and power electronics are all fitted in one housing. This means that only one unit has to be taken into consideration when planning the system.
- Only one voltage supply of 24 V is required for commissioning.
- Commissioning via:
 - control panel on handling module
 - PC using FESTO Configuration Tool (FCT) software

Installation and commissioning

Step 1: Mount the handling module

- Wide choice of mounting options

→ 1 / 7.2-24

Step 2: Mechanically adjust the end positions

- End positions of strokes along Y- and Z-axes can be adjusted independently of each other

→ 1 / 7.2-22

Step 3: Connect the 24 V voltage supply

- Plug and work:
Connect voltage –
HSP is ready for operation

→ 1 / 7.2-25

Step 4: Parameterisation either via control panel on motor or using FCT software

Control panel on motor

- Clearly arranged LCD display
- All data is entered and saved using 4 keys:
 - menu key
 - arrow keys for changing parameter values or traversing records
 - key for confirming the entered actions

FCT software – Festo Configuration Tool

- All the drives in a system can be managed and archived in the common project
- Project and data management for all supported device types
- Simple to use thanks to graphically supported parameter entry
- Universal mode of operation for all drives
- Working offline at your desk or online at the machine

Handling modules HSP, electric

Data sheet

Step 5: Selection of predefined motion sequences (HSP mode) via the control panel or using the FCT software

HSP mode 1

- Precise travel to the mechanical end position

HSP mode 2

- Additional adjustable wait position module directly above workpiece/workpiece carrier
- Handling of parts with different heights
- Insertion procedures at different speeds

HSP mode 3

- Additional ejector station for reject parts or quality inspection
- Precise travel to end position with setup position

HSP mode 4

- Insertion procedures with defined force
- Continued travel from wait position with adjustable torque

HSP mode 5

- Insertion procedures with defined force and additional intermediate position
- Continued travel from wait position with adjustable torque

Step 6: Fine adjustment

- Adjustment of preset positions, speeds and torques
- Addition of new traversing records (where necessary)
