FESTO

Sealing ring O/CRO

Sealing ring CRO for use in the chemicals and food processing industries

 Pressure
-0.95 ... +10 bar

Material:
Sealing ring O: Polyvinyl chloride
Sealing ring O-M3-B: Polyamide
Free of copper, PTFE and silicone

Sealing ring CRO:
Polyvinylidene fluoride

* Packaging unit quantity

Sealing material

Technical data

Sealing ring OL

with metal housing

- seals even with minimal tightening
- captive
- reusable
- suitable for use in hydraulic pressure range of up to 30 bar

 - Temperature range
-40 ... +100 °C

 - Pressure
-1 ... +30 bar

Material:
Free of copper, PTFE and silicone

Sealing material

Technical data

FESTO

Sealing ring OK with support ring

- Based on ISO 16030 standard
- Seals at room temperature when tightened by hand
- Captive design
- Compatible with the existing O and OL sealing rings

 Temperature range
-10 ... +60 °C

 Pressure
-0.95 ... +10 bar

Note on materials:
Free of copper and PTFE

1) Corrosion resistance class 2 according to Festo standard 940 070

Components requiring moderate corrosion resistance. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents.

Leak-testing spray ZL-0,4

to DIN EN 14291 (DIN 30657).

This spray has been developed especially for checking that there is no leakage in systems using compressed air or gas.

Material:

Free of copper, PTFE and silicone
