### Angle grippers HGWC

### **Angle grippers HGWC**

Key features

#### **FESTO**

#### At a glance

#### General information

The compact and cost-optimised angle gripper consists of a two-part mirrorsymmetrical housing made of die-cast zinc. The force generated by the linear motion of the piston is translated into the gripper jaw movement via a pneumatic piston, which acts directly on the gripper jaws installed in the

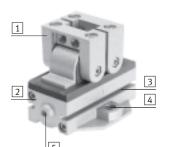

housing by means of a moment compensator in accordance with the rack and pinion principle. To ensure a lowbacklash plain-bearing guide for the gripper jaws, appropriate guide elements are fitted in the housing and pretensioned by means of socket head

- Double-acting gripper
- Internal fixed flow control, does away with the need for external flow control in 90% of applications
- High force with minimal volume
- Suitable for external and internal gripping
- Opening angle of 30°, 80°
- Wide range of options for mounting on drives
- Repetition accuracy of 0.05 mm
- Slot for proximity sensor SME/SMT-10

Sizing software for gripper selection

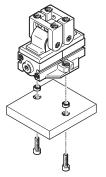

→ www.festo.com

#### Details

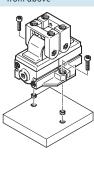

- 1 Gripper jaw
- 2 Housing based on half-shell principle
- Slot for proximity sensor, for sensing the piston position
- Mounting option
- Supply port

#### Mounting option from underneath

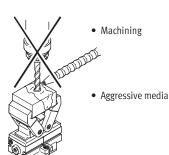

#### from above

Note

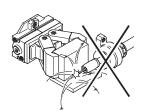

Angle grippers are not designed for the following sample applications:

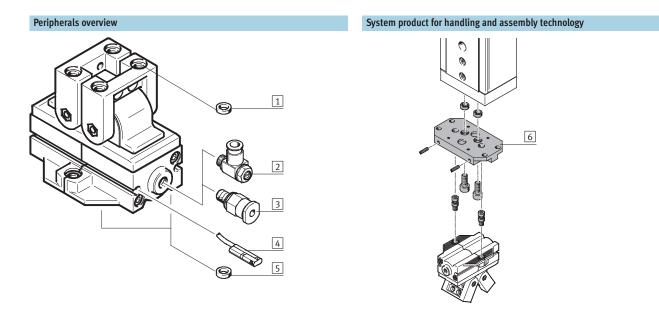

• Grinding dust

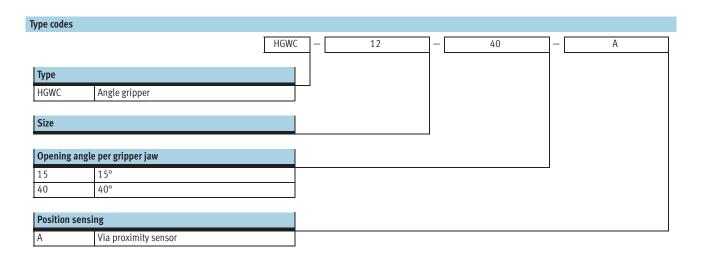

· Welding spatter

### **Angle grippers HGWC**Peripherals overview and type codes

Acces	Accessories							
	Туре	Brief description	→ Page/Internet					
1	Centring sleeve	For centring when attaching gripper fingers	10					
	ZBH	• 4 included in the scope of delivery of the gripper						
2	One-way flow control valve	For regulating speed	grla					
	GRLA							
3	Push-in fitting	For connecting compressed air tubing with standard O.D.	quick star					
	QS							
4	Proximity sensor	For sensing the piston position	10					
	SME/SMT-10							
5	Centring sleeve	For centring when attaching to a drive or plate	10					
	ZBH	• 2 included in the scope of delivery of the gripper						
6	_	Drive/gripper connections	adapter kit					

# Angle grippers HGWC Technical data

**FESTO** 

Function Double-acting HGWC-...-A

General technical data	General technical data							
Size		12	16	20				
Design		Rack and pinion						
		Force-guided motion sequence						
Mode of operation		Double-acting						
Gripper function		Angle						
Number of gripper jaws		2						
Max. opening angle	[°]	30,80	30,80					
Pneumatic connection		M5						
Repetition accuracy <sup>1)</sup>	[mm]	≤ 0.05						
Max. interchangeability	[mm]	≤ 0.2						
Max. gripper jaw backlash <sup>2)</sup>	[mm]	≤ 0.1						
Max. gripper jaw angular backlash <sup>3)</sup>	[°]	≤ 0.5						
Max. operating frequency	[Hz]	≤ 4						
Rotational symmetry	[mm]	≤∅0.2						
Position sensing		Via proximity sensor						
Type of mounting	unting Via female thread and centring sleeve							
Mounting position		Any						
Product weight	[g]	200	350	700				

- $1) \quad \text{End-position drift under constant operating conditions with } 100 \text{ consecutive strokes in the direction of movement of the gripper jaws}$
- Perpendicular to the direction of motion of the gripper jaws
   Pretensioned, backlash-free ball bearing guide

Operating and environmental conditions							
Operating pressure	[bar]	2 8					
Operating medium		Filtered compressed air, lubricated or unlubricated					
Ambient temperature <sup>1)</sup>	[°C]	+5 +60					
Corrosion resistance class CRC <sup>2)</sup>		2					

<sup>1)</sup> Note operating range of proximity sensors

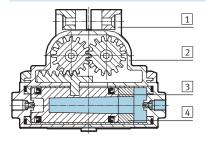

Corrosion resistance class 2 according to Festo standard 940 070 Components subject to moderate corrosion stress. Externally visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment or media such as coolants or lubricating agents

**FESTO** 

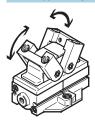

#### Materials

#### Sectional view

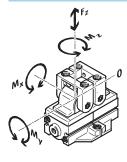

Angl	Angle gripper						
1	1 Gripper jaw Die-cast zinc, painted						
2	2 Housing Die-cast zinc, painted						
3	Piston	Polyamide					
4	Distance sleeve	Polyurethane					
-	Seals	Polyurethane, nitrile rubber					
-	Note on materials	Free of copper, PTFE and silicone					
		RoHS-compliant					

#### Total gripping torque at 6 bar

Size		12	16	20
Opening	[Ncm]	22	72	144
Closing	[Ncm]	22	72	144

#### Static characteristic load values at the gripper jaws

The indicated permissible forces and torques apply to a single gripper jaw. The indicated values include the lever arm, additional applied loads caused by the workpiece or external gripper

fingers, as well as forces which occur during movement.

The zero co-ordinate line (gripper jaw guide) must be taken into consideration for the calculation of torques.

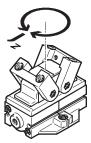

Size		12	16	20
Max. permissible force F <sub>z</sub>	[N]	40	60	80
Max. permissible torque M <sub>x</sub>	[Nm]	2.5	4	8
Max. permissible torque M <sub>y</sub>	[Nm]	0.6	1	1.9
Max. permissible torque M <sub>z</sub>	[Nm]	2	3.2	6.7

# Angle grippers HGWC Technical data

**FESTO** 

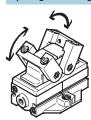

#### Mass moment of inertia

Mass moment of inertia  $[kgm^2x10^{-4}]$ of the angle gripper in relation to the central axis with no load.

Size		12	16	20
HGWCA	$[kgm^2x10^{-4}]$	0.52	1.35	4.31

#### Opening and closing times [ms] at 6 bar

The indicated opening and closing times [ms] have been measured at room temperature and an operating pressure of 6 bar with vertically mounted gripper and without additional gripper fingers.

The grippers must be throttled for greater applied loads. Opening and closing times must then be adjusted accordingly.

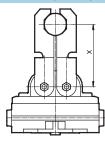

Size		12-15	12-40	16-15	16-40	20-15	20-40	
Without external gripper fingers								
HGWCA	Opening	50	70	50	85	50	90	
	Closing	35	50	35	70	35	75	

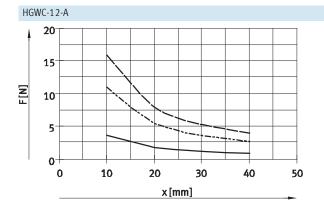

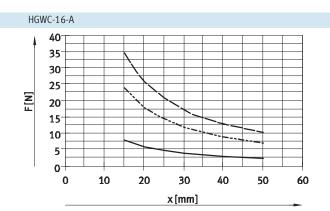

**FESTO** 

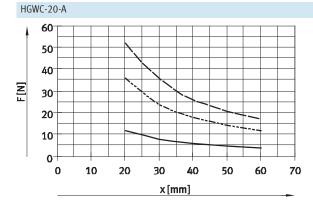

#### Gripping force $F_{\text{Grip}}$ per gripper jaw as a function of operating pressure and lever arm $\boldsymbol{x}$

Gripping forces as a function of the operating pressure and the lever arm can be determined for the size using the following graph.

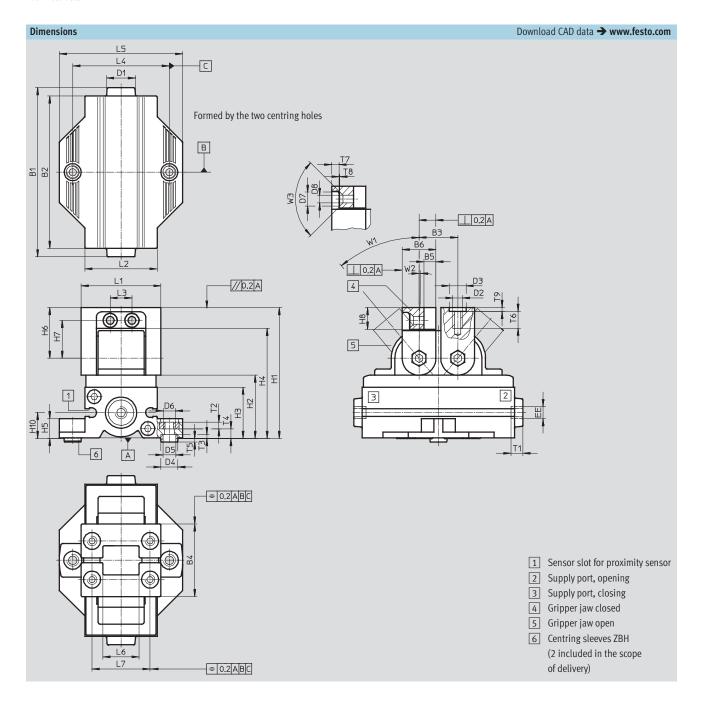

3 bar --- 6 bar -- 8 bar
