Control Block CPX-CMXX

FESTO

Control Block CPX-CMXX

Key Features

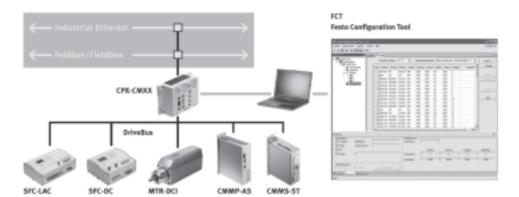

FESTO

Co-ordinated movement of multiple electrical axes

The Control Block CPX-CMXX is an intelligent module in the CPX terminal for controlling electric drive units from Festo.

Both individual axis movements and co-ordinated movements can be controlled via CAN bus. Cartesian kinematic systems are supported. With just a small number of control signals from a higher-order controller or a control unit in the CPX terminal, the control block co-ordinates the entire motion sequence.

Two axes groups with max. four axes per group can be controlled.

Advantages for users

Simple, yet efficient

CPX-CMXX provides a PLC-compatible interface for multi-dimensional axis control within the CPX system. This is achieved physically via various fieldbus nodes for easy adaptation to the general control technology.

Convenient

- The control block does not have to be programmed, but instead receives the sequence via parameterisation or teach-in.
- Easy application configuration with the Festo Configuration Tool (FCT).
- There are 1024 position sets available per axes group.
- Operating function in the FCT for commissioning without connection to the controller.
- Preliminary test of the application is possible without controller.

Flexible

Different operating modes guarantee universal use of the control block.

- Record Select mode: the user can simply select the record number of the position set and the control block takes care of the motion sequence.
- Direct mode: with the higher-order controller, position values, speed and acceleration are assigned to the individual axes and loaded in a selected position set. The position set is executed as in Record Select mode.

Optimised

Co-ordinated movement in conjunction with the CPX-CMXX means:

- Synchronous movement: the values for movement of the axes are calculated so that the axes reach their destination simultaneously.
- Linking: position sets can be executed in sequence without an additional start signal.

Control Block CPX-CMXX

Technical Data

The Control Block CPX-CMXX is an intelligent module in the CPX terminal for controlling electric drive units. Individual axis and simple multi-axis applications can easily be implemented. Programming is not necessary.

Configuration, parameterisation and

Configuration, parameterisation and commissioning of the application is easily achieved with the Festo Configuration Tool (FCT).

- Configuration of two axes groups with up to four axes each is possible
- There are 1024 position sets available per axes group
- Input or teach-in of positions in specified set structure
- Parameterisation via Ethernet
- Communication protocol: FHPP-MAX, Festo handling and positioning profile for multi-axis movements.
- Control of drive units via CANopen

FESTO

General Technical Data					
Protocol		FHPP-Max			
Maximum address volume for inputs [byte]		16			
Maximum address volume for outputs [byte]		16			
LED displays (bus-specific)		RUN: Program is executed			
		STOP: Program is stopped			
		ERR: Error in the program execution			
		TP: Status of Ethernet connection			
LED displays (product-specific)		M: Modify, parameterisation			
		PS: Electronic supply, sensor supply			
Device-specific diagnostics		Diagnostic memory			
		Channel and module-oriented diagnostics			
		Undervoltage/short circuit of modules			
Parameterisation		System parameters			
Operating elements		Rotary switch for RUN/STOP			
Configuration support		Festo Configuration Tool (FCT)			
Additional functions		System status can be displayed using process data			
		Additional diagnostic interface for FCT			
Supported kinematic system		2-axis gantries (X-Z / Y-Z / X-Y)			
		3-axis gantries (X-Y-Z)			
Total number of axes		8			
Distribution of axes		2 groups with max. 4 axes			
Nominal operating voltage	[V DC]	24			
Operating voltage range	[V DC]	18 30			
Power failure bridging	[ms]	10			
Intrinsic current consumption	[mA]	Typ. 85			
at nominal operating voltage					
Protection class to EN 60529		IP65/IP67			
Dimensions W x L x H [mm]		50 x 107 x 55			
(including interlinking block)					
Product weight [g]		155			
Materials					
Housing		Reinforced polyamide, polycarbonate			
Note on materials		RoHS-compliant

Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation ComponentsComplete custom engineered solutions

Custom Control CabinetsComprehensive engineering support and on-site services

Complete SystemsShipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

ElectromechanicalElectromechanical actuators, motors, controllers & drives

PneumaticsPneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
