### Variants

P Flexible cushioning pads on each side      FW With hollow flanged shaft

# Semi-rotary actuators DSR/DSRL - Inch Series

Features

## Description

In these semi-rotary actuators, the force is directly transmitted to the drive shaft via a rotary vane. The rotation angle is infinitely adjustable.

The adjustable stop system is separate from the rotary vane so that any forces which occur are absorbed by the stop blocks. The impacts are cushioned at the end positions by built-in flexible pads.

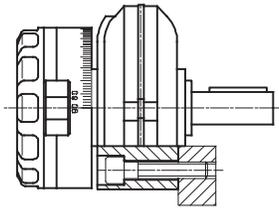

**DSRL-...-FW**  
This design with hollow flanged shaft permits the passage of liquid or

gaseous media, or even tubing or wiring. The force is transmitted directly and backlash-free via a splined shaft.

## Mounting options

Without mounting attachments

Direct mounting

With mounting attachments

For DSR

Foot mounting HSR-...-FW

Flange mounting FSR

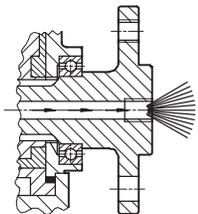

For DSRL

Foot mounting HSR-...-FW

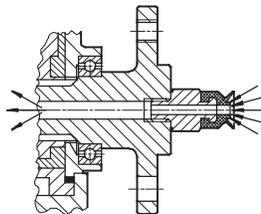

## Sample applications with hollow flanged shaft in DSRL

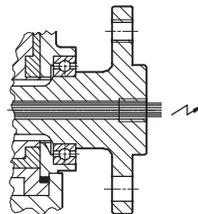

Air blast

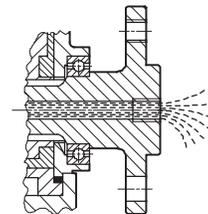

Vacuum

Electrical lines

Water, coolant, oil, glue, etc.

# Semi-rotary actuators DSR/DSRL - Inch Series

Technical data

## Max. permissible mass moment of inertia

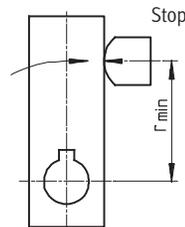

Mass moment of inertia  $m$  as a function of rotation time  $S$  and rotation angle

### Assembly instructions:

If the listed maximum permissible mass moment of inertia is exceeded, external stops must be attached. Please note: the stop must not be less than the minimum radius to the drive shaft ( $r_{min}$ ). The stop force must not exceed the maximum force.

Due to the flexibility of the internal stops, a precise end position can only be achieved using external stops.

| ∅ [in] | Stop radius $r_{min}$ [in] | Maximum force [lbf] |
|--------|----------------------------|---------------------|
| 3/8    | 0.5                        | 13.5                |
| 1/2    | 0.6                        | 20.2                |
| 5/8    | 0.7                        | 36.0                |
| 1      | 0.8                        | 71.9                |
| 1-1/4  | 1.1                        | 107.9               |
| 1-5/8  | 1.6                        | 146.1               |

### Note

When throttling the semi-rotary drives to rotating speeds under 180°/s, the drives must be operated at a pressure

of at least 90 psi. A constant speed fluctuation of ±30% is to be expected. The flutters and the

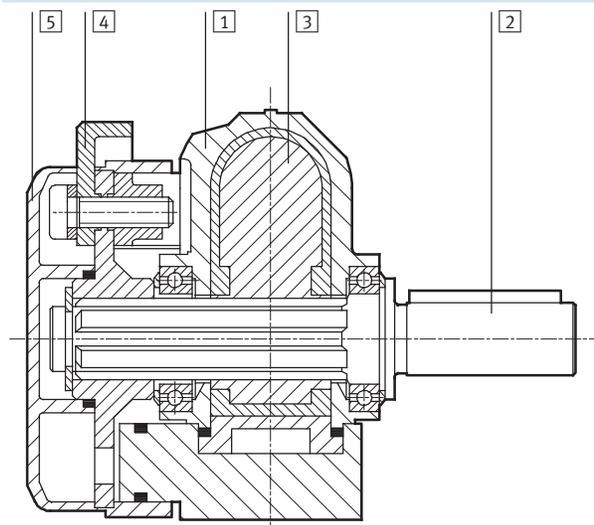

rotating times shown in the diagrams can only be improved by using flow control valves.

DSR

**Note**

The rotation angle in both directions is 90°, and it is pressure-dependent. The cushioning angle on each side is approx. 1.6° maximum, at 117.6 psi.

After the rotation process, the kinetic energy is converted by cushioning, the drive shaft rotates back by a corresponding angle.

The stops must not be removed as the rotary vane is not suitable for end-position limiting. The cover cap is equipped with an angle scale for adjusting.

When attaching additional components to the drive shaft, the maximum permissible tightening torque of the bolt at D4 must not be exceeded.

# Product Range and Company Overview

## A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

**Custom Automation Components**  
Complete custom engineered solutions

**Custom Control Cabinets**  
Comprehensive engineering support and on-site services

**Complete Systems**  
Shipment, stocking and storage services

## The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

**Electromechanical**  
Electromechanical actuators, motors, controllers & drives

**Pneumatics**  
Pneumatic linear and rotary actuators, valves, and air supply

**PLCs and I/O Devices**  
PLC's, operator interfaces, sensors and I/O devices

### Supporting Advanced Automation... As No One Else Can!

Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

### Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.
