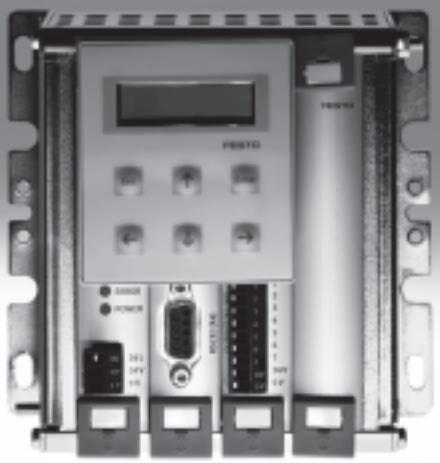
Axis controllers SPC200

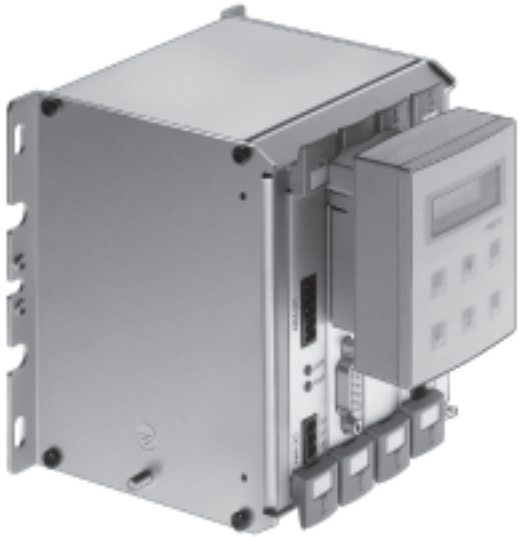
FESTO



Axis controllers SPC200

Key features

At a glance



SPC200 – the most unique positioning controller in the world for pneumatic and electrical positioning technology

Strength in variety
- 1 to 4 positioning axes
- 3 different pneumatic drive families
- Stepper motor axes
- Technology mix

Strength in modularity
- Two housing sizes
- 9 different plug-in cards
- Combinable as required

Multi-purpose
- Set selection for simple applications
- Start/stop operation for demanding automation tasks
- Up to 100 programs
- Subprogram technology
- Register operations and much more

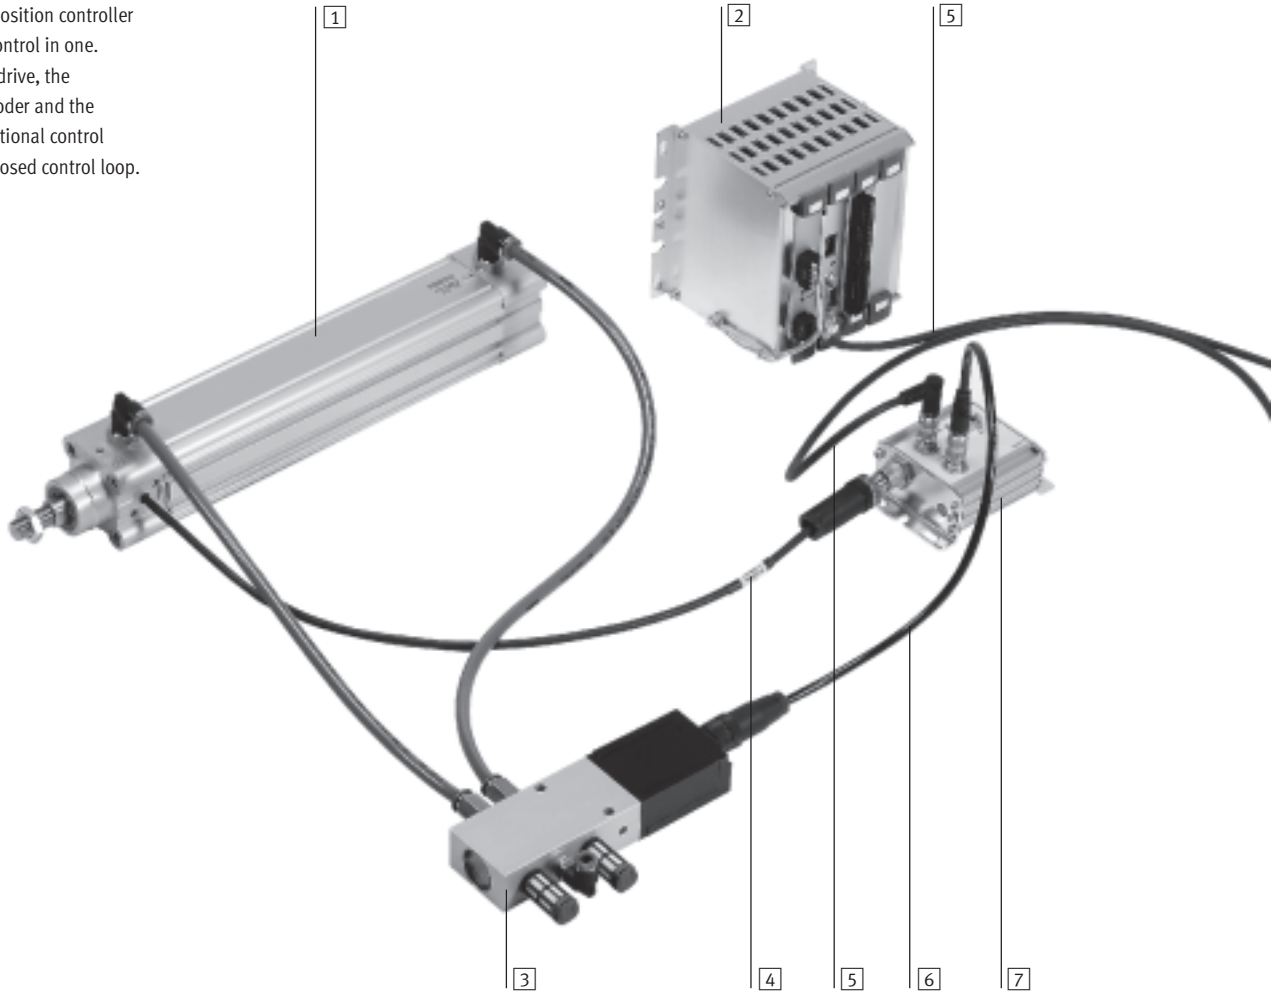
Strength in flexibility
- Digital inputs/outputs
- Analogue inputs
- Profibus, DeviceNet, Interbus
- CPV valve terminals for pneumatic switching functions

Strength in installation
- One axis string controls
- 2 pneumatic axes
- CPV valve terminals can be connected directly to the axis string
- Pre-assembled cables
- Plugs fit only in the correct sockets

Software WINPISA
- Project archiving
- Simple commissioning
- User-friendly programming
- Comprehensive diagnostics with graphics functions

In combination with the drive DNCI

The SPC200 is a position controller and positioning control in one. Together with the drive, the displacement encoder and the proportional directional control valve, it forms a closed control loop.



Individual components	
Type	Brief description
1 DNCI-...	The pneumatic drive, in this case DNCI with integrated displacement encoder, generates the movement. It is controlled by the SPC200.
2 SPC200-...	The axis controller with operating unit, in this case designed for a pneumatic drive, is an open and closed loop controller in one.
3 MPYE-...	The proportional directional control valve is the final control element in the control loop and controls the movement of the drive in accordance with the specification of the closed loop controller in the SPC200.
4 –	Connecting cable that connects the displacement encoder with the axis interface. The cable is permanently attached to the drive.
5 KSPC-AIF-...	Connecting cable that connects the controller SPC200 with the axis interface.
6 KMPYE-AIF-...	Connecting cable that connects the proportional directional control valve with the axis interface.
7 SPC-AIF-...	The axis interface forwards the measured values from the displacement encoder to the closed loop controller in the SPC200 and the control signal from the closed loop controller to the proportional directional control valve.

Axis controllers SPC200

Product range overview

Individual components for SPC200			
	Type	**Brief description**	**➔ Page/Internet**
Basic units			
	SPC200-CPU-4	Basic unit with 4 card locations	6
	SPC200-CPU-6	Basic unit with 6 card locations	6
Plug-in cards			
	SPC200-BP	Blanking plate	7
	SPC200-PWR-AIF	Power supply unit and axis interface connection	10
	SPC200-MMI-DIAG	Diagnostics and control unit connection	11
	SPC200-DIO	Digital inputs/outputs (10I/8O)	12
	SPC200-2AI-U	Analogue setpoint specification, 2 channels, 0 ... 10 V	14
	SPC200-SCU-AIF	Sub-controller for 3rd and 4th pneumatic axes	15
	SPC200-COM-PDP	Profibus-DP interface	16
	SPC200-COM-DN2	DeviceNet interface	18
Control unit			
	SPC200-MMI-1	Control unit for commissioning, programming and diagnostics. Not all functions of the axis controller SPC200 are supported. Please use WinPISA for commissioning.	28

Connector modules for SPC200			
	Type	**Brief description**	**➔ Page/Internet**
Axis interface			
	SPC-AIF-POT SPC-AIF-POT-LWG	For analogue displacement encoder (potentiometer)	20
	SPC-AIF-MTS	– For digital displacement encoder Temposonics/AIF – For linear drive DGPI...-...-AIF	20
	SPC-AIF-INC	For standard cylinder DNCI	22
	SPC-AIF-MTS-2	For linear drive DGCI	24
Power supply module			
	SPC-AIF-SUP-24V	Additional power supply for the load voltage at the axis interface for cable lengths over 16 m	26

1) One free card location, therefore expandable with max. one card. This must be ordered separately.
Other configurations can be produced from the individual components
2) Optional

Axis controllers SPC200

Technical data

Axis controller basic unit
SPC200-CPU-4
SPC200-CPU-6

Function
Basic unit for 4 or 6 function cards, contains closed loop position controller for 2 pneumatic axes and universal positioning control for 4 axes

General technical data				
				SPC200
Power supply				➔10 (SPC200-PWR-AIF)
Current consumption		SPC200-CPU-4/6 incl. SPC200-PWR-AIF	[mA]	Typically 100
Processor type				Digital signal processor
Operating system				Festo OS 4.6x[1]
Controller sampling time			[ms]	Typically 1.5
Control cycle			[ms]	Typically 2
Memory		Available for programs and data	[KB]	20
Data backup				Flash memory
		Backup cycles		> 100 000
No. of positioning axes		Total		4
		Pneumatic		Max. 4
		Stepper motor		Max. 3
No. of inputs/outputs		Local		Max. 40 inputs, 32 outputs[2]
		Per AIF string		Max. 16 inputs and 16 outputs[3]
		Via fieldbus		Max. 64 inputs and 64 outputs
No. of start programs				2[4]
No. of position registers				100 per axis
Operating modes	Set selection	No. of motion sets		Max. 32 via local I/O per start program Max. 1,000 via fieldbus interface per start program
		Control signals		ENABLE, READY, STOP, RESET, RECBIT1..5, CLK_A/B, RC_A/B, ACK_A/B
	Start/stop	No. of programs		Max. 100
		Control signals		ENABLE, READY, START/RESET, STOP, MC_A/B, SYNC_IA/B,SYNC_OA/B
		Programming		NC programming to DIN 66025
		Instruction classes		Positioning instructions I/O instructions Register instructions Sequence instructions
		No. of NC sets		Max. 2,000
		No. of NC sets per program		Max. 1,000
		Nesting depth for subprograms		Max. 4

1) Status: April 2003
2) Less the used control signals of the first card
3) Either as 1 input device and 1 output device of the CP fieldbus modules or 1 input/output module SPC-FIO ...
4) At least 1 start program must be active

Axis controllers SPC200

Technical data

General technical data			
			SPC200
CE marking symbol (see conformity declaration)			As per EU EMC directive
Vibrations/shock	Vibrations		Tested to DIN/IEC 68, parts 2-6, severity level 1
	Shock		Tested to DIN/IEC 68, parts 2-27, severity level 2
Ambient conditions	Temperature range	[°C]	–5 ... +50
	Protection class		IP20[5)]
	Relative air humidity		95% non-condensing
Weight	SPC200-CPU-4	[kg]	0.675
	SPC200-CPU-6	[kg]	0.85

5) With fully equipped basic unit

New

Communication modules for connecting to a fieldbus, like Profibus or DeviceNet, facilitate reading and writing all registers of the axis controller SPC200.

Reading the actual position and writing a digital position setpoint.

9	SPC200-PB	Blanking plate	7

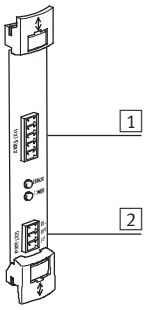
Power supply
SPC200-PWR-AIF

Function
Power supply and connection of the first axis string

General technical data				
				SPC200-PWR-AIF
Current consumption	Plug-in card		[mA]	See basic unit
Power supply unit (PWR)	Supply		[V DC]	24 –5/+25%
	Residual ripple		[%]	2
	Power failure buffering for logic supply (pin 2)		[ms]	10
	Current consumption	Load, pin 1	[A]	Max. 5.0
		Logic, pin 2	[A]	Max. 4.0
Feature	–			2 pneumatic axes
Axis connection	Digital inputs		[max]	16 function inputs[1)]
	Digital outputs		[max]	16 function outputs[1)]
Electrical connections	Power supply unit			3-pin terminal strip
	Axis connection			5-pin terminal strip
CE marking symbol (see conformity declaration)				As per EU EMC directive
Weight			[g]	82
Mounting location ➔ 9				1

1) Either as 1 input module and 1 output module of the CP modules or 1 input/output module SPC-FIO-...

Pin allocation



[1] Terminal strip on cable type KSPC-AIF-WD-... pre-assembled
[2] 3-pin terminal strip included in the scope of delivery. Connection cross section max. 1.5 mm²

Connecting cable ➔ 29, no. [1]

Note

The valves at the axis interfaces and the outputs of the CP modules are supplied via the 24 V load supply. They can therefore be switched off independently of the logic supply in an emergency stop situation.

[1] AXES (X1)	
Pin	Function
1	CAN-LOW (brown)
2	CAN-HIGH (white)
3	24 V (yellow)

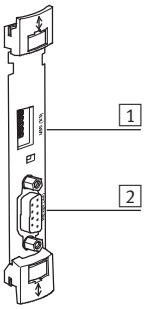
Serial interface
SPC200-MMI-DIAG

Function
Serial interface for diagnostics and programming, connection of the control unit MMI-1

General technical data			
			SPC200-MMI-DIAG
Current consumption	Plug-in card	[mA]	Typically 50[1]
Serial interface	Version		RS 232 C
	Electrical isolation		Yes
	Baud rate	[baud]	9,600; 19,200; 38,400; 57,600; 115,200[2]
	Data	[bit]	8
	Stop bit	[bit]	1
	Parity		Even parity
	Protocol		No handshake
MMI interface	Version		Similar to RS 232 C
	Electrical isolation		No
Electrical connections	Serial interface		9-pin SUB-D, female
	MMI-1		5 double-pin row
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	68
Mounting location ➔ 9			2

1) With control unit SPC200-MMI-1
2) The baud rate is 9,600 baud after each POWER ON

Pin allocation



1 Interface for control unit SPC200-MMI-1
2 Serial interface

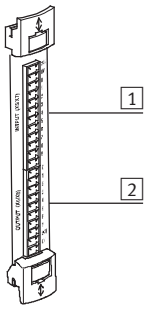
Digital I/O module
SPC200-DIO

Function
Digital input/output card (local I/O)

General technical data			
			SPC200-DIO
Current consumption	Plug-in card	[mA]	Typically 50
Digital inputs	Number		10
	Sensor supply	[A]	0.5[1]
	Current consumption	[mA]	8 (at 24 V DC/"logic 1")
	Fuse protection for sensor supply		Electronic short-circuit protection
	Delay	[ms]	5
Digital outputs	Number		8
	Supply	[V DC]	24 ±25%[2]
	Max. current-carrying capacity per output	[mA]	250
	Fuse protection for outputs		Electronic, all outputs
	Max. tripping current	[A]	2
	Response time	[ms]	1.5
Version	Inputs/outputs		To IEC 61131-2, positive logic (PNP)
Electrical isolation	Inputs/outputs		No/yes
Electrical connections	Inputs		12-pin terminal strip
	Outputs		10-pin terminal strip
Weight		[g]	62
Mounting location ➔ 9			From 3 upwards

1) Via internal 24 V supply (pin 2 to PWR to plug-in card SPC200-PWR-AIF)
2) Supplied separately, note load data

Pin allocation



1 12-pin terminal strip included in the scope of delivery. Connection cross section max. 1.5 mm²

2 10-pin terminal strip included in the scope of delivery. Connection cross section max. 1.5 mm²

Note

Inputs and outputs on the first card are reserved for necessary functions such as start, stop, etc. Up to 7 inputs and 5 outputs are freely programmable.

On the other cards, all 10 inputs and 8 outputs are freely programmable. Up to 4 I/O cards can be inserted (in 6x rack).

1 Input (X5/X7)

Pin	Function	Start/stop operation	Set selection
1	24 V	Supply (for switch/sensor)	
2	0 V		
3	I0.0	Freely programmable	RECBIT1
4	I0.1	Freely programmable	RECBIT2
5	I0.2	Freely programmable	RECBIT3
6	I0.3	Freely programmable	RECBIT4
7	I0.4	Freely programmable	RECBIT5
8	I0.5	(SYNC_IN/B)[1]	CLK_B
9	I0.6	(SYNC_IN/B)[1]	CLK_A
10	I0.7	STOP	STOP
11	I0.8	START/RESET[2]	RESET[2]
12	I0.9	ENABLE	ENABLE

2 Output (X2)

Pin	Function	Start/stop operation	Set selection
1	Q0.0	Freely programmable	–
2	Q0.1	Freely programmable	–
3	Q0.2	Freely programmable	–
4	Q0.3	MC_B	RC_B
5	Q0.4	MC_A	RC_A
6	Q0.5	(SYNC_OUT/B)[1]	ACK_B
7	Q0.6	(SYNC_OUT/A)[1]	ACK_A
8	Q0.7	READY	READY
9	24 V	Supply (load supply for outputs)	
10	0 V		

1) Freely programmable, if not used
2) Reset (program reset) only in combination with 0 signal at stop input

Axis controllers SPC200

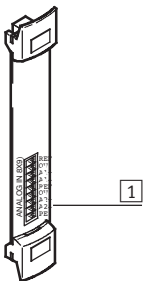
Technical data

Setpoint module
SPC200-2AI-U

Function
Analogue input card

General technical data			
			SPC200-2AI-U
Current consumption	Plug-in card	[mA]	Typically 10
Analogue inputs	Number		2
	Input voltage	[V DC]	0 ... 10
	Input filter, low pass	[Hz]	16
	Resolution	[bit]	12
	Non-linearity		3 LSB
	Max. amplification error	[%]	0.2
	Max. offset error	[mV]	1.5
	Absolute accuracy	[%]	< 0.3
	Input resistance	[kΩ]	> 200
Reference voltage		[V DC]	10
	Absolute accuracy	[%]	0.4
	Max. current	[mA]	8
Electrical connection			9-pin terminal strip
Weight		[g]	55
Mounting location ➔ 9			From 3 upwards

Pin allocation



1 9-pin terminal strip included in the scope of delivery.
Connection cross section max. 1.5 mm²

Note

Max. 2 plug-in cards can be used for position specifications for up to 4 axes.
The allocation of the channel to an axis is programmable.

Only one axis can be allocated to each channel.
Offset and scaling of the setpoint specifications are also separately programmable for each channel.

1 Analogue IN (X9)	
Pin	Function
1	Reference voltage 10 V_{REF}
2	0 V
3	A1+; signal (+) for channel 1
4	A1–; signal (–) for channel 1
5	Reference voltage 10 V_{REF}
6	0 V
7	A2+; signal (+) for channel 2
8	A2–; signal (–) for channel 2
9	PE

		Part No.	Type
Plug-in card	Analogue setpoint specification, 2 channels, 0 ... 10 V	**170 177**	**SPC200-2AI-U**

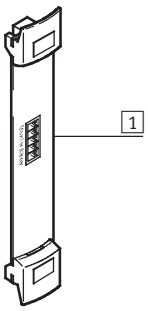
Sub-controller
SPC200-SCU-AIF

Function
Contains the position controllers for 2 further pneumatic axes and connection for the second axis string

General technical data			
			SPC200-SCU-AIF
Current consumption	Plug-in card	[mA]	Typically 100
Axis connection	2nd string		3rd and 4th pneumatic axes
	Digital inputs	[max]	16 function I/O[1)]
	Digital outputs	[max]	16 function I/O[1)]
Electrical connection	Axis connection		5-pin terminal strip
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	80
Mounting location ➔ 9			From 3 upwards

1) Either as 1 input module and 1 output module of the CP modules or 1 input/output module SPC-FIO-...

Pin allocation



[1] Terminal strip on cable type KSPC-AIF-1-WD-... pre-assembled

Connecting cable ➔ 29, no. [1]

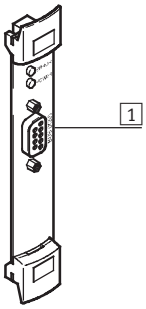
Profibus-DP interface
SPC200-COM-PDP

Function
Profibus interface of the SPC200 as slave to a Profibus network

General technical data				
				SPC200-COM-PDP
Current consumption	Plug-in card		[mA]	Typically 50
Profibus	Version			RS 485
	Electrical isolation			Yes
	Type of transmission			Serial asynchronous, half-duplex
	Protocols			Profibus-DP (standard slave), to DIN 19245, 1 – 4, EN 50170 Vol. 2
	Addressing range of the fieldbus interface			0 ... 125
	Max. address volume	Outputs	[Byte]	32
		Inputs	[Byte]	32
	Baud rate		[kBit/s]	9.6 – 12,000[1]
	Line length		[km]	23.8[2]
	Max. load capacity		[mA]	100[3]
Configuration support for the fieldbus interface				GSD file
Electrical connection	Profibus			9-pin SUB-D, female
CE marking symbol (see conformity declaration)				As per EU EMC directive
Weight			[g]	80
Mounting location ➔ 9				From 3 upwards[4]

1) Automatic baud rate detection
2) Line length dependent on baud rate and type of cable
3) Supply voltage positive (PV5), pin 6
4) When using the control unit MMI-1 as of location 4

Pin allocation



1 9-pin plug usable acc. to Profibus standard, type FBS-SUB-9-WS-PB-K
➔ Table below

New

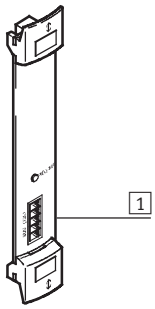
DeviceNet interface
SPC200-COM-DN2

Function
DeviceNet interface of the SPC200 as slave to a DeviceNet network.

General technical data			
			SPC200-COM-DN2
Current consumption	Plug-in card	[mA]	Typically 50
Power supply	Fieldbus	[V DC]	11 ... 30
DeviceNet bus	Version		– Physical layer (layer 1) to ISO/DIS 11898 – Standard highspeed to 1Mbit – Data Link layer (layer 2) to CAN specifications V2.0 – DeviceNet, Release 2.0
	Electrical isolation		Yes
	Protocols		– DeviceNet-IO – DeviceNet-Profil
	Addressing range of the fieldbus interface		0 ... 63
	Baud rate	[kBit/s]	125, 250, 500
Number of outputs	Set selection	[Byte]	2
	Start/Stop	[Byte]	2 ... 8
Number of inputs	Set selection	[Byte]	4
	Start/Stop	[Byte]	2 ... 8
Operation characteristic			Reading an writing inputs and outputs
			Reading and writing all program registers of the SPC200
			Read out the actual position
			Digital setpoint specification
LED display			Module and network status
Device-specific diagnosis			Via status bit
			Via WinPISA status display
Configuration support for the fieldbus interface			EDS file
Electrical connection	Open Style		5-pin terminal strip
CE marking symbol (see conformity declaration)			As per EU EMC directive
Weight		[g]	80
Mounting location ➔ 9			From 3 upwards

Pin allocation



1 5-pin terminal strip included in the scope of delivery.
Connection cross section max. 1.5 mm^2

New

The card SPC200-COM-DN2 facilitates the connection of the SPC200 to DeviceNet.
Position data can be read and written directly via Profibus (as of firmware release 4.9).

Axis controllers SPC200

Technical data

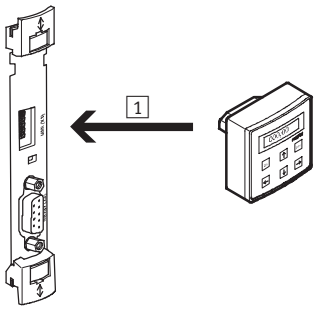
Control unit
SPC200-MMI-1

Not all functions of the axis controller SPC200 are supported. Please use WinPISA for commissioning.

General technical data			
			SPC200-MMI-1
Display			LCD display, 2 x 16 characters
Operation			Touch-sensitive keypad with 6 keys
Power supply		[V DC]	5[1]
Current consumption		[mA]	30[2]
Interface			[3]
Electrical isolation			No
Electrical connections	Interface		10-pin row
	Power supply		10-pin row
CE marking symbol (see conformity declaration)			As per EU EMC directive
Ambient conditions	Temperature range	[°C]	–5 ... +50
	Protection class to IEC 60529		IP20
Weight		[g]	90

1) Is supplied directly via the plug-in card SPC200-MMI-DIAG
2) Referred to 24 V supply of the SPC200-PVR card
3) Similar to RS 232

Pin allocation



1 Plug-in direct

6	Programming cable	3	straight	–	**151 915**	**KDI-PPA-3-BU9**

1) The total length of the lines must not exceed 30 m
2) Recommended where the total length of connecting cable is over 16 m
3) Must be connected at the last axis interface in the chain
(Contained in the controller package SPC200/P0X)

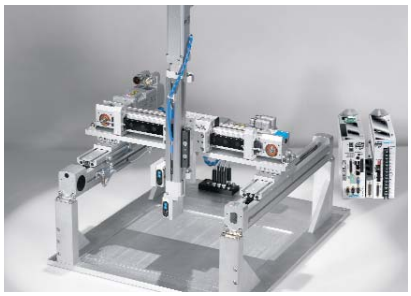
Product Range and Company Overview

A Complete Suite of Automation Services

Our experienced engineers provide complete support at every stage of your development process, including: conceptualization, analysis, engineering, design, assembly, documentation, validation, and production.

Custom Automation Components
Complete custom engineered solutions

Custom Control Cabinets
Comprehensive engineering support and on-site services



Complete Systems
Shipment, stocking and storage services

The Broadest Range of Automation Components

With a comprehensive line of more than 30,000 automation components, Festo is capable of solving the most complex automation requirements.

Electromechanical
Electromechanical actuators, motors, controllers & drives

Pneumatics
Pneumatic linear and rotary actuators, valves, and air supply

PLCs and I/O Devices
PLC's, operator interfaces, sensors and I/O devices

Supporting Advanced Automation... As No One Else Can!
Festo is a leading global manufacturer of pneumatic and electromechanical systems, components and controls for industrial automation, with more than 12,000 employees in 56 national headquarters serving more than 180 countries. For more than 80 years, Festo has continuously elevated the state of manufacturing with innovations and optimized motion control solutions that deliver higher performing, more profitable automated manufacturing and processing equipment. Our dedication to the advancement of automation extends beyond technology to the education and development of current and future automation and robotics designers with simulation tools, teaching programs, and on-site services.

Quality Assurance, ISO 9001 and ISO 14001 Certifications

Festo Corporation is committed to supply all Festo products and services that will meet or exceed our customers' requirements in product quality, delivery, customer service and satisfaction.

To meet this commitment, we strive to ensure a consistent, integrated, and systematic approach to management that will meet or exceed the requirements of the ISO 9001 standard for Quality Management and the ISO 14001 standard for Environmental Management.

Printed on recycled paper at New Horizon Graphic, Inc., FSC certified as an environmentally friendly printing plant.
