

Pressure sensors SPAU

Pressure sensors SPAU

Key features

FESTO

At a glance

Product description

The pressure sensor SPAU is suitable for monitoring compressed air and non-corrosive gases. The variant with display offers the option of reading the pressure and set values on-site. The pressure value is transmitted to the connected control system as a switching signal, as an analogue signal or via IO-Link®.

The pressure sensor without display transmits the pressure value to the connected control system as an analogue signal. Display of the pressure and parameterisation of the sensor are provided centrally, e.g. via a display that is part of a machine control system. The pressure sensor can be parameterised using IO-Link® as a tamper-proof pressure switch without display with up to two switching outputs.

Areas of application

- Network monitoring (pressure present)
- Regulator monitoring (pressure in the setpoint range)
- Vacuum (part picked up)
- Leak test (pressure drop over time)
- Object detection (back pressure present)

Product benefits

An assembly concept with short assembly times that is easy to implement in all installation situations. Female/male thread or push-in fitting QS – the perfect pneumatic adapter for every application.

Mounting:

- Threaded mounting
- H-rail mounting
- Front panel mounting
- Mounting bracket
- Wall mounting
- Adapter for MS4, MS6

Electronic system:

- Maximum versatility and reduced warehousing thanks to switchable electrical outputs (PNP/NPN/N/C/N/O contact and current/voltage output)

Pressure sensors SPAU

Key features

Operation

Monitoring and setting of a pressure threshold, a pressure range or a pressure difference, using a teach-in function or by entering values.

Variants with display:

- Pressure indicator, pressure switching outputs and readout of analogue value from a device can be set on-site
- Quick commissioning of the pressure sensor thanks to straightforward menu navigation
- Display colour blue/red as visual feedback about the pressure of the medium
- Min./max. value memory for monitoring compressed air (display of rapid pressure peaks that are not visible to the human eye)
- Adjustable filter evens out the sensor signal generated by pressure peaks
- Scaling the analogue output to increase the signal dynamics
- Choice of pressure units: bar, MPa, PSI and more
- Offset compensation possible
- ECO function "Switch off display" available
- Optional security code can be freely chosen (4-digit code)
- All settings that have been carried out on one sensor (master) can be transferred (replication) to other, identical sensors (device). This significantly shortens the commissioning time

Variants without display:

- Analogue value output and pressure switching outputs proportional to the pressure
- Switching output behaviour can be set on the machine display using IO-Link®
- Other functions can be set using IO-Link®

Variants with IO-Link®:

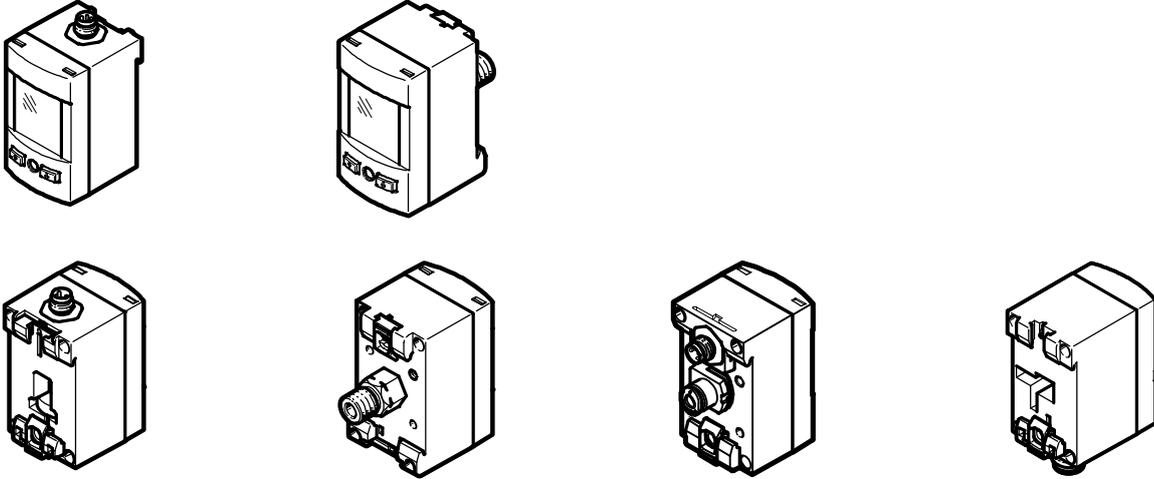

- With and without display
- Serial communication integrated using IO-Link® 1.1
- Analogue process value is provided digitally
- The sensor can be parameterised and maintained remotely at control level using an IO-Link® master
- Automatic parameterisation following a sensor change means there is no need to repeat parameterisation and sensor settings after changing the sensor

Accessories – Ordering data

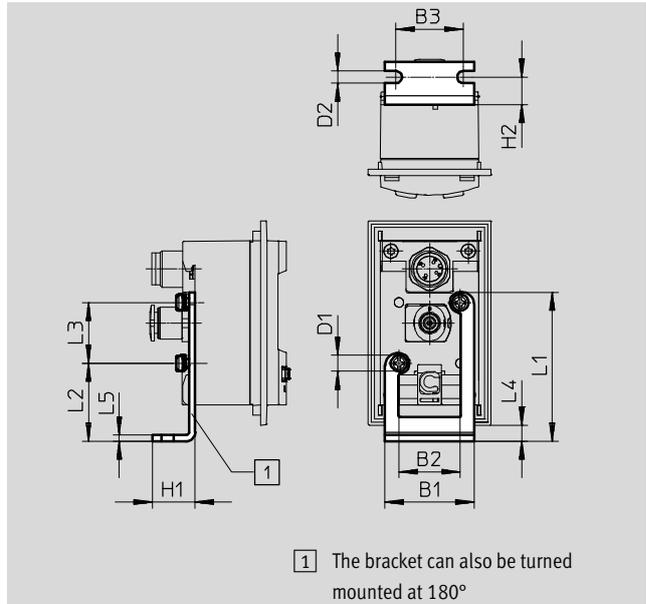

Mounting bracket SAMH-PU-A

Type of mounting: via through-hole and screw

Material: high-alloy stainless steel

Note on materials: RoHS-compliant

Only for variants with pneumatic connection and rear outlet direction

Ordering data															
Type	B1	B2	B3	D1	D2	H1	H2	L1	L2	L3	L4	L5	CRC ¹⁾	Part no.	Type
SAMH-PU-A	29	20	22	M3x8	4	14	9	49	25.6	20	8.6	2	2	8003354	SAMH-PU-A

1) Corrosion resistance class 2 to Festo standard 940070
Components subject to moderate corrosion stress. External visible parts with primarily decorative surface requirements which are in direct contact with the surrounding industrial environment or media such as coolants or lubricating agents.

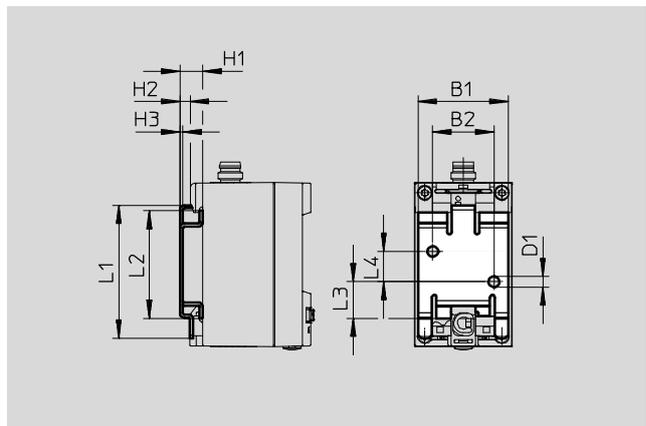

Wall mounting SAMH-PU-W

Type of mounting: with through-hole

Material: high-alloy stainless steel

Note on materials: RoHS-compliant

Only for variants with pneumatic connection and outlet direction underneath

Dimensions and ordering data													
Type	B1	B2	D1	H1	H2	H3	L1	L2	L3	L4	CRC ¹⁾	Part no.	Type

1) Corrosion resistance class 2 to Festo standard 940070
Components subject to moderate corrosion stress. External visible parts with primarily decorative surface requirements which are in direct contact with the surrounding industrial environment or media such as coolants or lubricating agents.

Pressure sensors SPAU

Accessories – Ordering data

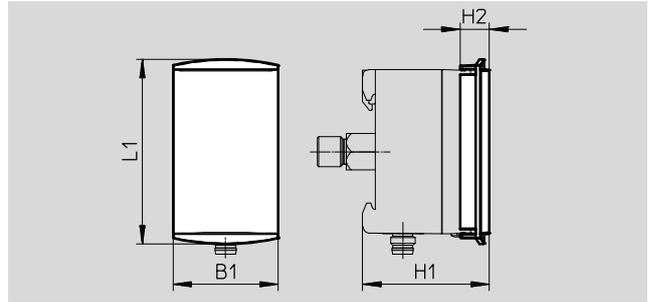

Safety guard SACC-PU-G
to protect the display and operating components

Material: PA

Note on materials:
RoHS-compliant

Only for variants with display

Dimensions and ordering data							
Type		B1	H1	H2	L1	CRC	Part no. Type
SACC-PU-G	SPAU- ... R-T- ...	34.5	41.6	9.6	60.8	2	8003353 SACC-PU-G

	SPAU- ... R-W- ... -FD-L- ...		49.6				

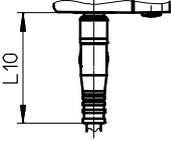

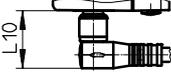

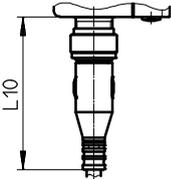

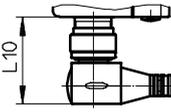

Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation may occur. External visible parts with primarily decorative requirements for the surface and which are in direct contact with the ambient atmosphere typical for industrial applications.
