Position sensor SRBS

The position sensor is used for sensing the end positions.

Sensing is carried out magnetically and without contact. Two switching points are output.

Key features:

- Quick installation
- Simple and reliable operation using one button
- The end positions of the swivel angle are taught in at the touch of a button
- Only one connecting cable required
- Long service life thanks to sturdy and non-contacting position sensing

Technical data:

- Sensing range: 0 ... 270°
- Repetition accuracy: $\leq 1^\circ$
- 2 switching outputs (24 V)
- Switching output: PNP or NPN programmable
- Switching element function: N/O contact or N/C contact programmable
