Key features

FESTO

Cable qualitys

The sensor cables can be configured using the modular system. You can choose from qualitys that are suited to

standard, drag chain or robot applications.

Standard application

- Standard applications are characterised by fixed cable installation or low to average mechanical loads.

Drag chain application

- High mechanical loads occur in drag chain applications, particularly when very small radii are required.

Robot application

- High mechanical loads, which are primarily caused by torsion, occur in robot applications.
