

Valve series VOFC

FESTO

Characteristics

General

- The valves of series VOFC are special 3/2-way and 5/2-way valves for process automation and applications in chemical and petrochemical installations, where they are frequently used as pilot valves for butterfly valves and actuators. Their sturdy design and high resistance to corrosion make these valves suitable for outdoor use under harsh ambient conditions.
- With the flange pattern to NAMUR, the solenoid valves are particularly suitable for quarter turn actuators.
- The integrated spring chamber re-breather function protects quarter-turn actuators with spring return (single-acting cylinders and actuators) against contaminated ambient air and weather conditions such as rain.
- With German Technical Control Board (TÜV) report up to SIL3

Function, design

- 3/2-way or 5/2-way, single or double solenoid, depending on the type
- Pilot-actuated piston spool and poppet valves

Sturdy

- The surface of the valve housing is Ematal-coated. This treatment involves converting the aluminium surface into a very hard aluminium oxide layer with titanium oxide deposits, which makes the valves extremely resistant to wear and abrasion and gives them first-class sliding qualities. This provides optimum protection against atmospheric and chemical influences. You can find information on the media resistance of the product at
→ www.festo.com.

Flexible functionality

- Changeover between internal and external pilot air via automatic OR valve
- Suitable for vacuum

Economical

- Connection pattern to NAMUR for direct mounting on the actuator and G and NPT threaded connections in a valve housing

Ordering data – Product options

Configurable product

This product and all its product options can be ordered using the configurator.

The configurator can be found under Products on the DVD or at

Valve functions		
Circuit symbol	Type code	Description
The circuit symbol shows a 5/2-way double solenoid valve. It has two solenoid coils at the top, labeled 14 and 12. The valve has five ports: 4 (top left), 2 (top right), 5 (bottom left), 1 (bottom center), and 3 (bottom right). The symbol indicates that the valve is electrically piloted, non-reversible, has an internal pilot air supply, and does not have a manual override (MO).	VOFC-L-B52-G14-... VOFC-L-B52-N14-...	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • Without manual override (MO)
The circuit symbol is similar to the first one, but it includes a manual override (MO) feature, represented by a small square symbol on the right side of the valve body.	VOFC-L-B52-H-G14-... (MO non-detenting) VOFC-L-B52-H-N14-... (MO non-detenting)	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • With manual override (MO)
The circuit symbol is similar to the first one, but it includes a NAMUR connection feature, represented by a small square symbol on the right side of the valve body.	VOFC-L-B52-FG14-... VOFC-L-B52-FN14-...	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • With NAMUR connection • Without manual override (MO)
The circuit symbol is similar to the first one, but it includes both a manual override (MO) and a NAMUR connection feature, represented by small square symbols on the right side of the valve body.	VOFC-L-B52-H-FG14-... (MO non-detenting)	5/2-way double solenoid valve • Electrically piloted • Non-reversible • Internal pilot air supply • With NAMUR connection • With manual override (MO)

Operating medium: Compressed air to ISO 8573-1:2010 [7:--:-]
Operating pressure: 0 ... 12 bar
Pilot air supply: internal/external
Mounting position: any
Mounting: via through-hole
Degree of protection: IP65 (when installed)

Function:
Flow control for supply air and/or exhaust air for an actuator with NAMUR interface for valves VOFC/VOFD

- [1] Actuator
- [2] Valve
- [3] Working ports for G1/4 and 1/4 NPT valves

1) Corrosion resistance class CRC 4 to Festo standard FN 940070

Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. Such applications may need to be safeguarded by special tests (→ also FN 940082), using appropriate media.

Accessories

Throttle plate for double-acting actuators

Throttle plate material: Ematal-coated aluminium

Seals material: NBR

Contains paint-wetting impairment substances, RoHS-compliant

Operating medium: Compressed air to ISO 8573-1:2010 [7:-:-]

Operating pressure: 0 ... 12 bar

Pilot air supply: internal/
external

Mounting position: any

Mounting: via through-hole

Degree of protection: IP65 (when installed)

Function:
2-duct exhaust air flow control for an actuator with NAMUR interface
