

Proportional-pressure regulators VEAA

FESTO

Key features

Innovative

- Silent operation
- Very low power consumption
- High precision
- Integrated piezo technology

Versatile

- In-line valves
- Sub-base valves
- Simple electrical and pneumatic interfaces
- Choice of different setpoint specifications
 - Current input
 - Voltage input

Reliable

- Integrated pressure sensor with separate output
- Diagnostics:
 - Operating voltage: over- and undervoltage
 - Setpoint value: falling below and exceeding
- Consistent pressure regulation performance with long-term stability

Easy to install

- Mounting the in-line valve via three thought-holes at the side
- H-rail mounting
- Attaching the in-line valve to the mounting plate
- Mounting the sub-base valve using the sub-base

Key features

In-line valve

- [1] Power LED (green), fault LED (red)
- [2] Electrical connection, M8 plug
- [3] Port 2, working air
- [4] Port 1, compressed air
- [5] Port 3, exhaust air
- [6] Through-holes for mounting the valve

Sub-base valve

- [1] Power LED (green), fault LED (red)
- [2] Electrical connection, M8 plug
- [3] Through-holes for mounting the valve on the sub-base
- [4] Port 2, working air
- [5] Port 3, exhaust air
- [6] Port 1, compressed air

Key features

Mounting the valve manifold assembly

H-rail mounting

The H-rail mounting [1] can be used to mount the manifold rail [2] on H-rails in accordance with EN 60715.

To do this, the manifold rail with the H-rail mounting attached is mounted on the H-rail [3] and latched in place.

Wall mounting

Through-holes for wall mounting are located on the manifold rail.

1) Supply pressure 1 should always be 1 bar greater than the maximum regulated output pressure.

2) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

	4	+ Actual value

Function

An integrated pressure sensor records the pressure at the working port and compares this value with the setpoint value.

The pressure is automatically readjusted in the event of deviations.
