

Solenoid/pneumatic valves, Tiger 2000

FESTO

Key features

General

- A complete and comprehensive range with 5/2-way and 5/3-way valves
- Poppet valve for monostable functions or piston spool for more complex versions with air spring and 5/3-way valves
- With flow-optimised internal functions for higher flow rates with the same width
- Pneumatic connections G1/8, G1/4, G3/8
- Diverse and flexible, side and front mounting
- Pneumatic or electrical actuation
- Versatile electrical connection technology with F or V solenoid coil with low power consumption, can also be used with valve terminals
- Functional and timeless design, enclosed front housing

Solenoid coils

F solenoid coils

Voltage:	Power consumption:		
• 12 to 230 V DC	• 4.1 to 5.5 W DC	• For all MFH valves	• Solenoid coil can be easily exchanged later
• 12 to 240 V AC (50 to 60 Hz)	• 3.85 to 9 VA AC	• Selected types conform to the ATEX Directive for potentially explosive atmospheres	• Solenoid coil not included in scope of delivery

V solenoid coils			
Voltage:	Power consumption:	• For all MVH valves	• Solenoid coil included in scope of delivery
• 24 V DC	• 2.5 W	• Low heating	

Manifold assembly

With manifold rail PAL With manifold block PRS

The valves Tiger 2000 (without an ATEX category) can be mounted on manifold rails PAL with a common supply port or on manifold blocks PRS with a common supply port and common exhausts.

The manifold rail and manifold block have 2 to 10 valve positions.

Note

Valves for potentially explosive atmospheres (ATEX category) are not suitable for mounting on manifold rails PAL or manifold blocks PRS.

Max. negative test pulse with 1 signal	[μs]	3700

Operating and environmental conditions				
Pneumatic connection		G1/8	G1/4	G3/8
Operating medium		Compressed air to ISO 8573-1:2010 [7:4:4]		
Pilot medium		Compressed air to ISO 8573-1:2010 [7:4:4]		
Note on the operating/pilot medium		Lubricated operation possible (in which case lubricated operation will always be required)		
Operating pressure	[MPa]	–0.9 ... 1		
	[bar]	–0.9 ... 10		
Pilot pressure	[MPa]	0.2 ... 1		–
	[bar]	2 ... 10		–
Storage temperature	[°C]	–40 ... +60		
Ambient temperature	[°C]	–10 ... +60		
Temperature of medium	[°C]	–10 ... +60		
Corrosion resistance class CRC ¹⁾		1		

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).
