

Servo drives CMMT-ST, for extra-low voltage

FESTO

Key features

At a glance

- Space-saving servo drive for operating stepper motors and brushless direct current motors
- Extremely economical for positioning tasks and motion solutions with low power requirements up to 300 W
- Primary voltage from 24 ... 48 V DC
- Motor current up to 8 A (peak 10 A)
- 50% more compact than the smallest CMMT-AS
- Options for point-to-point and interpolating motion and for precise positioning
- Bus protocols
- Direct fieldbus integration to major controller manufacturers
- Auto-tuning supports simple commissioning of rotary and linear movements, using mechanical systems from Festo and third-party suppliers
- Integrated safety functions:
 - Safe torque off (STO) up to SIL3/Cat. 3 PL e
 - Safe stop 1 time controlled (SS1-t) when using a suitable external safety relay unit and suitable circuitry for the servo drive
- Can be easily combined with the servo drive CMMT-AS and axis mechanisms from Festo

The technology in detail

- [1] Hole for mounting the servo drive on the control cabinet back wall
- [2] Housing
- [3] Standard mounting via H-rail clamp
- [4] Elongated hole for adjustment during mounting
- [5] Connections

Electric Motion Sizing

Configuring electromechanical drives

Create the optimum drive package quickly and reliably. Electric Motion Sizing calculates suitable combinations of electric axis, electric motor and servo drive using just a few application details. It provides all the relevant data including the bill of materials and documentation for your selected combination. This avoids design errors and results in significantly improved energy efficiency for the system. Through-connection to the Festo Automation Suite also makes commissioning easier for you.

Key features

Library in EPLAN

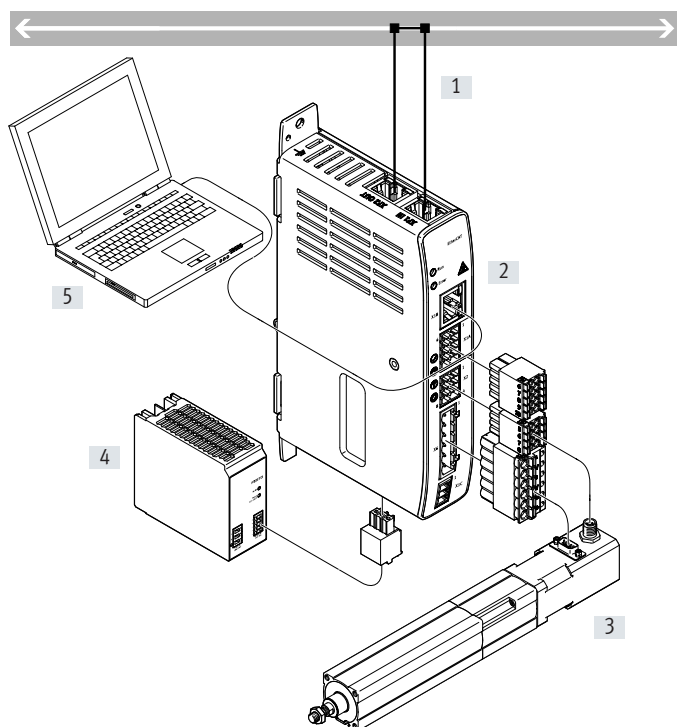

EPLAN macros for fast and reliable planning of electrical projects in combination with servo drives, motors and cables. This enables a high level of planning reliability and standardisation of documentation without the need to create symbols, graphics and master data.

Festo Automation Suite

- Parameterisation, programming and commissioning in a clear and user-friendly interface
- Optimum support for complex processes thanks to guided wizards (e.g. for commissioning, drive configuration, etc.)
- Fast access to the required documents and additional information
- Easy integration of electric drives in the controller programming

System overview

- [1] Bus/network
- [2] Servo drive CMMT-ST
- [3] Stepper motor or EC motor with drive
- [4] Power supply unit(s) for logic and load voltage (PELV)
- [5] PC with Ethernet connection for parameterisation

Type codes

001	Series	
CMMT	Motor controller	
002	Motor type	
ST	Stepper motor ST	
003	Nominal current	
C8	8 A	

004	Nominal input voltage	
1C	24 - 48 V DC	
005	Bus protocol/activation	
EC	EtherCAT®	
EP	EtherNet/IP	
PN	Profinet	
006	Safety function

General technical data

Type of mounting	Mounting plate, screwed in
	With H-rail
Display	LED green/yellow/red
Controller operating mode	Cascade controller
	P position controller
	PI speed controller
	PI current regulator for F or M
	Profile operation with record and direct mode
	Interpolating operation via fieldbus
	Synchronised operating modes
	Homing
	Set up mode
	Auto-tuning
	Open-loop operation
Operating mode	Field-oriented closed-loop control
	Position resolution 24 bit/rev.
	Sampling rate 20 kHz
	PWM with 20 kHz
	Real-time data acquisition
	2x input capture (x, v, F)
	2x output trigger (x, v, F)
	1x position encoder input
Adjustable current reduction	Via software
Protective function	I ² t monitoring
	Temperature monitoring
	Current monitoring
	Voltage failure detection
	Following error monitoring
	Software end-position detection
Mounting position	Free convection
	Vertical
Product weight [g]	350

Required derating

Mounting clearances may be required at output currents $> 4.6 \text{ A}$ to ensure the device reaches at least its specified service life. The mounting clearances required depend on the ambient temperature t and the output current I . Mounting clearances from 0 mm are possible when several servo drives CMMT-ST are combined. The following characteristic curves show the maximum permissible effective currents for the lateral mounting clearances 0 mm, 3 mm, 10 mm and 15 mm.
