Datasheet

Function

- - Flow rate
1000 ... 6500 l/min
- - Temperature range
-10 ... +60°C
- - Operating pressure
3 ... 16 bar

The duration of the pressure build-up is set using the restrictor attached to the valve cap.

The outlet pressure p₂ rises slowly in accordance with the restrictor setting. The main seat opens when the switch-through pressure is reached.

- Pneumatically actuated soft-start valve for slowly pressurising and venting pneumatic systems (for use with on/off valves HE and HEE)
- The drives move slowly and reliably into the initial position

- Sudden and erratic movements are avoided
- Main seat opening at approx. 50% of input pressure
- Adjustable switching time delay
