

Spindle axes ELGD-BS

FESTO

Key features

At a glance

ELGD-BS (standard design)

- Profile with a square cross section and sturdy drive elements for high feed forces

ELGD-BS-WD (wide design)

- Reduced profile height offers smaller installation dimensions for handling systems and applications that do not require such high feed forces
- 30% lighter, while rigidity and guide load capacity are still similar to the axis in standard design

Innovative guide technology

- Excellent rigidity and load capacity of the guide for higher loads in the same installation space
- Less vibration and smoother slide movement protect sensitive workpieces
- High speeds ensure short cycle times and a very long service life minimises downtime

Powerful drive elements

- High feed forces and acceleration for shorter process times
- Long service life and increased reliability reduce TCO

Innovative stainless steel cover strip solution

- Abrasion-free and clean surface protects workpieces from particles
- Minimised number of particles for use in cleanrooms
- Reduced ingress of dirt for use in harsh ambient conditions

Optional:

- Extended or additional slide for higher axial and lateral torques and higher loads

Sealing air connection:

- Air is exchanged between the interior of the cylinder and the environment via the sealing air connection. This prevents negative pressure or excess pressure from building up inside the cylinder.
- Application of slight negative pressure prevents the emission of particles
- Application of slight excess pressure prevents the ingress of particles

Engineering tools

More information → [electric-motion-sizing](#)

Save time with smart engineering tools for the optimal solution. Our goal is to increase your productivity. Our engineering tools play an integral part in this. They help you size your system correctly, tap into unimagined productivity reserves and generate additional productivity along the entire value chain. In every phase of your project, from the initial contact to the modernisation of your machine, you will come across a number of different tools which will be of use to you.

Electric Motion Sizing

- Create the optimum drive package quickly and reliably. Electric Motion Sizing calculates suitable combinations of electric axis, electric motor and servo drive using just a few application details. It provides all the relevant data including the bill of materials and documentation for your selected combination. This avoids design errors and results in significantly improved energy efficiency for the system. A seamless connection to the Festo Automation Suite also makes commissioning easier for you.

Icons

More information → [elgd-bs](#)

The icons shown in this document are also available online. There, precise values can be displayed.

Key features

Drive system

[BS] Ball screw

- For applications requiring precision
- Extremely reliable and long service life
- For high loads

Stroke reserve

- The stroke reserve is a safety distance from the mechanical end position and is not used in normal operation.
- The sum of the stroke length and 2x stroke reserve must not exceed the maximum working stroke.

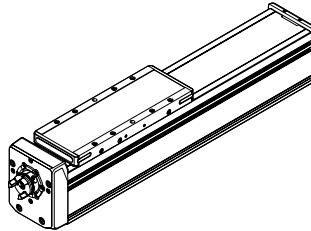

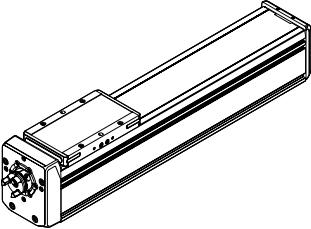

Spindle pitch

- The spindle pitch describes the distance travelled by the spindle nut per revolution of the spindle in millimetres.
- Thanks to the different spindle pitches, it is possible to choose the smallest possible motor for the required speed and feed force.

Slide design

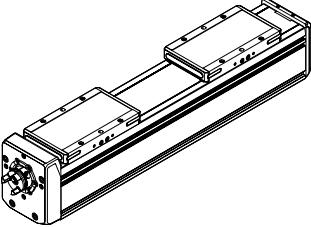

[] Standard

[L] Long

Additional slide

[ZR] Right

- The additional slide is currently only available on the right (the side away from the motor)
- The additional slide is always a standard slide

Lubrication

[] Standard

[GN] Lubrication nipple

With lifetime lubrication. Lubrication nipple not included in delivery.

- The lubrication adapters enable the guide to be permanently lubricated using semi- or fully automatic relubrication devices
- The adapters are suitable for oils and greases

Slide	Wrought aluminium alloy
Cover strip	High-alloy stainless steel
Guide	Steel
Profile	Anodised wrought aluminium alloy
Note on materials	RoHS-compliant
LABS (PWIS) conformity	VDMA24364 zone III

Datasheet

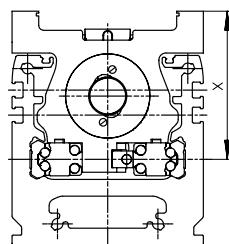

Load values

The indicated forces and torques refer to the centre of the guide. The point of application of force is the point where the centre of the guide and the longitudinal centre of the slide intersect. The appropriate size is selected using the following three steps:

1. Check the maximum permissible values (must not be exceeded)
2. Calculate the load comparison factor
3. Determine the service life

Distance from the slide surface to the centre of the guide

Distance from the slide surface to the centre of the guide

Size	60	80
Dimension x [mm]	60	62

1. Check the maximum permissible values

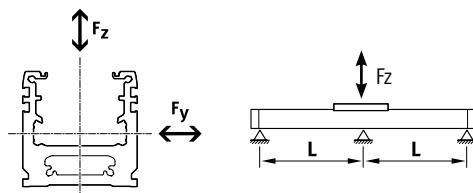

Max. permissible forces and torques for the overall axis (strength limits)

Size	60	80	L	L
Slide design				
Max. force Fy, overall axis [N]	930	1650	2291	4581
Max. force Fz, overall axis [N]	1300	2750	2500	4000
Max. torque Mx, overall axis [Nm]	36	65	95	160
Max. torque My, overall axis [Nm]	15	85	42	335
Max. torque Mz, overall axis. [Nm]	15	45	42	275

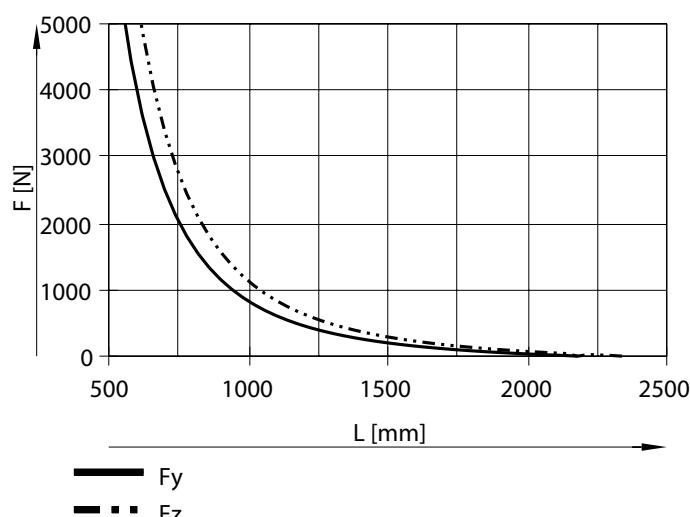

Maximum permissible support spacing L as a function of force F

The axis may need to be supported in order to limit deflection in the case of long strokes.

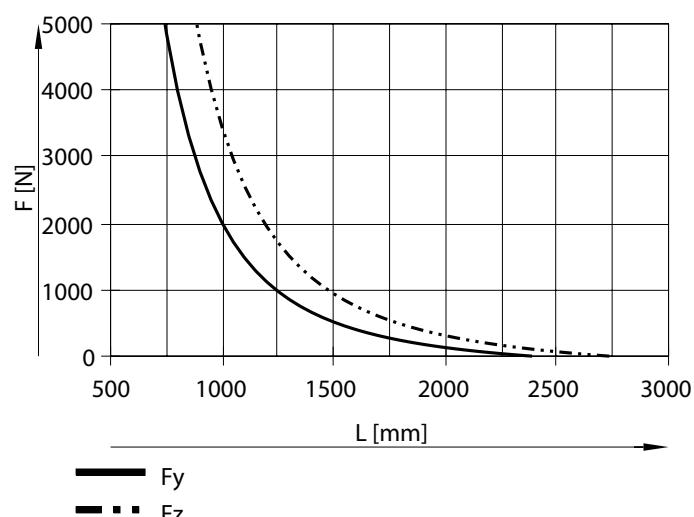

The following graphs can be used to determine the maximum permissible support spacing L as a function of force F acting on the axis. The deflection is $f = 0.5 \text{ mm}$.

Size 60

Size 80

Datasheet

2. Calculate the load comparison factor

- Note

For a guide system to have a service life of 5000 km, the load comparison factor must have a value of $f_v \leq 1$, based on the maximum permissible forces and torques for a service life of 5000 km.

This formula can be used to calculate a guide value.

The engineering software "Electric Motion Sizing" is available for more precise calculations → www.festo.com/x/electric-motion-sizing

If the axis is subjected to two or more of the indicated forces and torques at the same time, the following equation must be satisfied in addition to the indicated maximum loads:

Calculating the load comparison factor:

$$f_v = \frac{|F_{y1}|}{F_{y2}} + \frac{|F_{z1}|}{F_{z2}} + \frac{|M_{x1}|}{M_{x2}} + \frac{|M_{y1}|}{M_{y2}} + \frac{|M_{z1}|}{M_{z2}} \leq 1$$

F_1/M_1 = values occurring in the application

F_2 = permissible values at 5000 km from the graph "support spacing over load"

M_2 = maximum permissible values (see table)

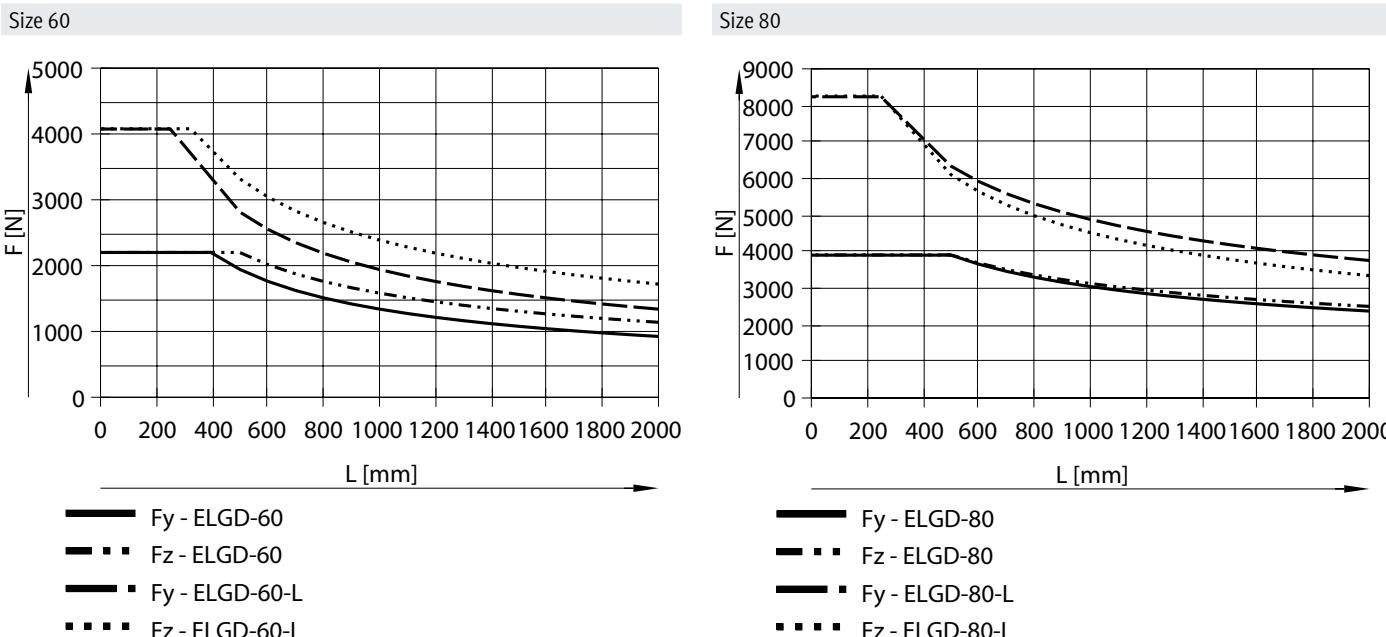

Max. permissible torques for the guide calculation with reference service life

Size	60	80	
Slide design	L		L
Reference service life [km]	5000		
Max. torque Mx [Nm]	37	65	95
Max. torque My [Nm]	15	141	42
Max. torque Mz [Nm]	15	139	42

Maximum permissible support spacing L as a function of force F

Depending on how firmly the axis is supported, the maximum permissible forces vary due to the design of the guide system.

If the axis is used as a cantilever or in yoke operation, the values for a support spacing of 2000 mm can be selected.

Datasheet

3. Determine the service life

The service life of the guide depends on the load. To be able to provide an indication of the service life of the guide, the graph below plots the load comparison factor f_v against the service life l .

Load comparison factor f_v as a function of service life l

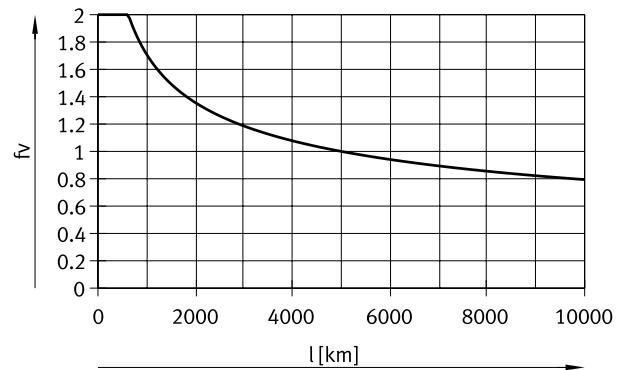

Example:

A user wants to move an x kg load. Using the formula (→ page 8) gives a value of 1.3 for the load comparison factor f_v . According to the graph, the guide would have a service life of approx. 2500 km. Reducing the acceleration reduces the M_z and M_y values. A load comparison factor f_v of 1 now gives a service life of 5000 km.

Note:

If the application has been calculated using "Electric Motion Sizing", the average guide comparison index represents the workload of the guide. (100% average guide comparison index corresponds to $f_v = 1$). With this value, the service life can be estimated using the service life graph

These values are only theoretical. You must consult your local Festo contact for a load comparison factor f_v greater than 1.3.

Comparison of the characteristic load values for 100 km with dynamic forces and torques of recirculating ball bearing guides

The characteristic load values of the bearing guides are standardised to ISO and JIS using dynamic and static forces and torques. These forces and torques are based on an expected service life of the guide system of 100 km to ISO or 50 km to JIS.

As the characteristic load values are dependent on the service life, the maximum permissible forces and torques for a 5000 km service life cannot be compared with the dynamic forces and torques of bearing guides to ISO/JIS.

To make it easier to compare the guide capacity of linear axes ELGD with bearing guides, the table below lists the theoretically permissible forces and torques for a calculated service life of 100 km. This corresponds to the dynamic forces and torques to ISO.

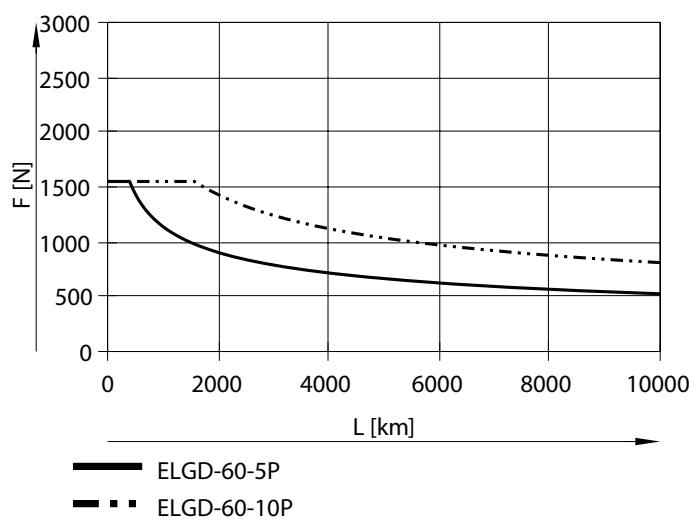

These 100 km values have been calculated mathematically and are only to be used for comparing with dynamic forces and torques to ISO. The drives must not be loaded with these characteristic values as this could damage the axes.

Max. permissible forces and torques for a theoretical service life of 100 km (from a guide perspective only)					
Size	60		80		L

Size	60	80
ly [mm ⁴]	0.509 x 10 ⁶	1.213 x 10 ⁶
lz [mm ⁴]	0.686 x 10 ⁶	2.052 x 10 ⁶

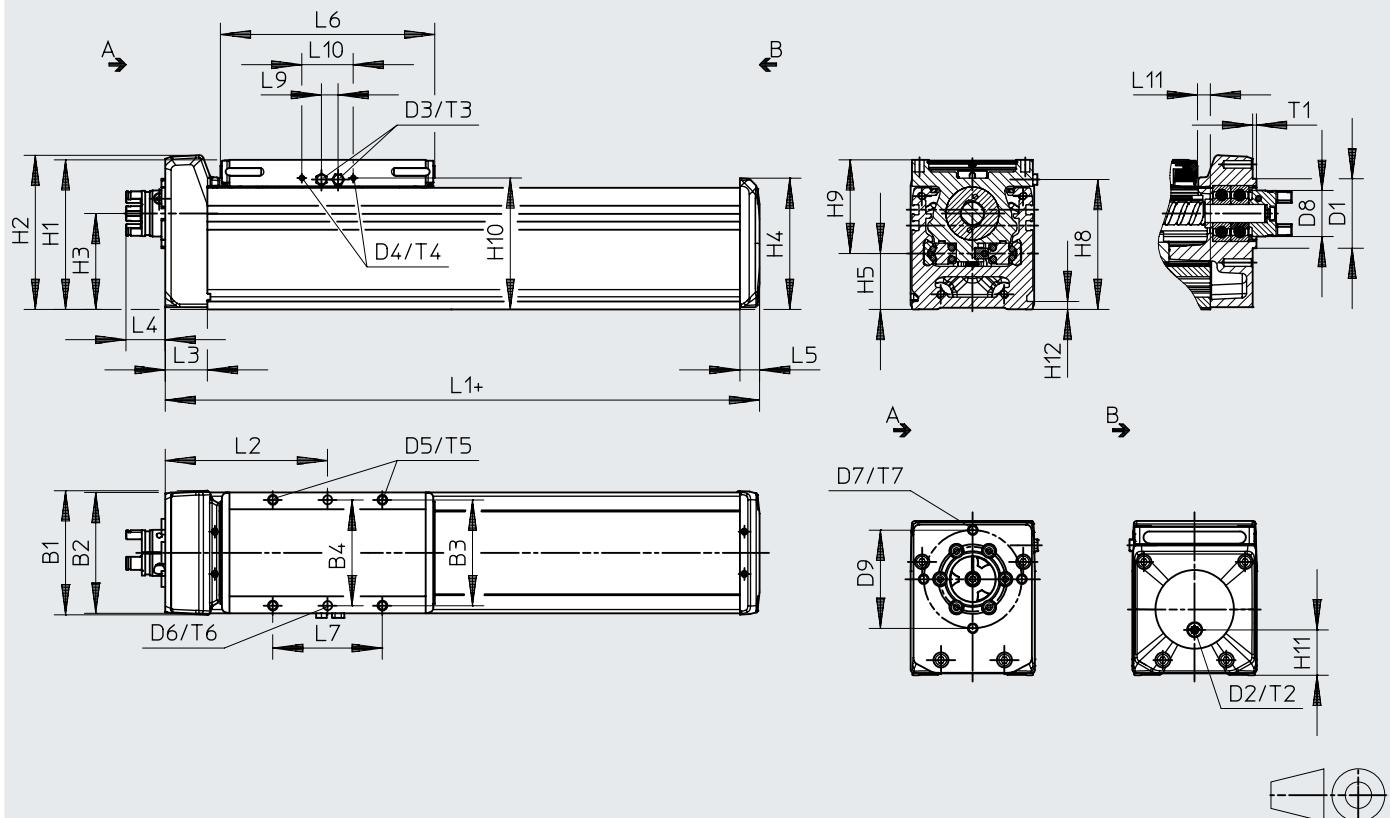

Recommended deflection limits

To avoid impairing the functionality of the axes, we recommend that the following deflection limits are observed. Greater deformation can result in increased friction, greater wear and reduced service life.

Size	Dynamic deflection (moving load)	Static deflection (stationary load)
60, 80	0.05% of the axis length, max. 0.5 mm	0.1% of the axis length

Peripherals overview

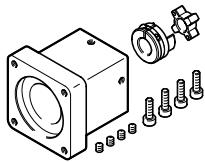

Peripherals overview

Accessories			→ Page/Internet
Type	Description		
[1] Spindle axis ELGD-BS	Electric drive		elgd-bs
[2] Profile mounting EAHF-E24-...-D...	For axis/axis mounting with adapter plate	26	
[3] Proximity switch, T-slot SIES-8M	Inductive proximity switch, for T-slot	27	
[4] Slot cover ABPS	For protection against contamination	27	
[5] Clip SMBK	For mounting the proximity switch cable in the slot	27	
[6] Profile mounting EAHF-E24-...-S	For mounting the axis on the side of the profile	26	
[7] Profile mounting EAHF-E24-...	For mounting the axis on the side of the profile	26	
[8] Sensor bracket EAPM-E24-SHO	For mounting third-party sensors on the axis	27	
[9] Sensor OMRON	Third-party sensor OMRON, EE-SX674 series	–	
[10] Sensor bracket EAPM-E24-SHE	For mounting the inductive proximity switches SIEN-M8 (round design) on the axis	26	
[11] Proximity switch, M8 SIEN-M8	Inductive proximity switch, round design	27	
[12] Switch lug EAPM-E24-SLS	For sensing the slide position via inductive proximity switch SIES-8M or for optical sensors (Omron) with sensor bracket EAPM-E24-SHO	26	
[13] Switch lug EAPM-E24-SLE	For sensing the slide position via inductive proximity switch SIEN-M8 (round design) and sensor bracket EAPM-E24-SHE	26	
[14] Motor EMMT	Motors and kits specially matched to the axis Detailed information: www.festo.com/catalogue/eamm Engineering tool: www.festo.com/x/electric-motion-sizing		emmt
[15] Parallel kit EAMM	For parallel motor mounting		eamm-u
[16] Axial kit EAMM	For axial motor mounting		eamm-a

Accessories

Permissible axis/motor combinations for axial and parallel assembly kits

Below are the links where you can find all the information about:

- Axis/motor combinations
- Permissible external motors
- Technical data
- Dimensions

For axial assembly kits → Internet: [eamm-a](#)

For parallel assembly kits → Internet: [eamm-u](#)

Profile mounting EAHF-E24-...-P-S					
	Description	Material	Product weight	Part no.	Type
	For size 60, 80	Anodised wrought aluminium alloy	18 g	8197128	EAHF-E24-60-P-S

Profile mounting EAHF-E24-...-P					
	Description	Material	Product weight	Part no.	Type
	For size 60, 80	Anodised wrought aluminium alloy	71 g	8197132	EAHF-E24-60-P

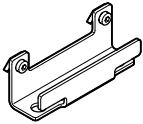

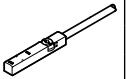

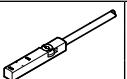

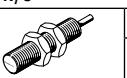

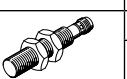

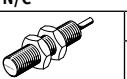

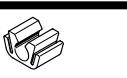

Profile mounting EAHF-E24-...-P-D...					
	Description	Material	Product weight	Part no.	Type
	ELGD-60 to ELGD-60	Anodised wrought aluminium alloy	87 g	8197131	EAHF-E24-60-P-D5
	ELGD-60 to ELGD-80		119 g	8197129	EAHF-E24-60-P-D4
	ELGD-80 to ELGD-100		133 g	8197130	EAHF-E24-60-P-D6

Switch lug EAPM-E24-...-SLS					
	Description	Material	Product weight	Part no.	Type
	For size 60, 80	Steel	32 g	8197117	EAPM-E24-60-SLS

Switch lug EAPM-E24-...-SLE					
	Description	Material	Product weight	Part no.	Type
	For size 60, 80	Steel	20 g	8197116	EAPM-E24-60-SLE

Sensor bracket EAPM-E24-...-SHE					
	Description	Material	Product weight	Part no.	Type
	For size 60, 80	Steel	103 g	8197123	EAPM-E24-60-SHE

Accessories

Sensor bracket EAPM-E24-...-SHO						
	Description	Material	Product weight	Part no.	Type	
	For size 60, 80	Steel	67 g	8197121	EAPM-E24-60-SHO	
Proximity switch for T-slot, inductive						
	Type of mounting	Switching output	Electrical connection	Cable length [m]	Part no.	Datasheets → Internet: sies
N/O						
	Inserted in the slot from above, flush with the cylinder profile	PNP	Cable, 3-wire	7.5	551386	SIES-8M-PS-24V-K-7.5-0E
			Plug M8 x 1, 3-pin	0.3	551387	SIES-8M-PS-24V-K-0.3-M8D
	NPN	Cable, 3-wire	7.5	551396	SIES-8M-NS-24V-K-7.5-0E	
			Plug M8 x 1, 3-pin	0.3	551397	SIES-8M-NS-24V-K-0.3-M8D
N/C						
	Inserted in the slot from above, flush with the cylinder profile	PNP	Cable, 3-wire	7.5	551391	SIES-8M-PO-24V-K-7.5-0E
			Plug M8 x 1, 3-pin	0.3	551392	SIES-8M-PO-24V-K-0.3-M8D
	NPN	Cable, 3-wire	7.5	551401	SIES-8M-NO-24V-K-7.5-0E	
			Plug M8 x 1, 3-pin	0.3	551402	SIES-8M-NO-24V-K-0.3-M8D
Proximity switch M8 (round design), inductive						
	Switching output	Electrical connection	Cable length [m]	Part no.	Type	Datasheets → Internet: sien
N/O						
	PNP	Cable, 3-wire	2.5	150386	SIEN-M8B-PS-K-L	
			2.5	150384	SIEN-M8B-NS-K-L	
	PNP	Plug M8 x 1, 3-pin	–	150387	SIEN-M8B-PS-S-L	
			–	150385	SIEN-M8B-NS-S-L	
N/C						
	PNP	Cable, 3-wire	2.5	150390	SIEN-M8B-PO-K-L	
			2.5	150388	SIEN-M8B-NO-K-L	
	PNP	Plug M8 x 1, 3-pin	–	150391	SIEN-M8B-PO-S-L	
			–	150389	SIEN-M8B-NO-S-L	
Slot cover ABP-5-S1						
	Description	Material	Pack size	Product weight	Part no.	Type
	For size 60, 80	ABS	2 every 0.5 m	13 g	563360	ABP-5-S1
Clip SMBK						
	Description	Pack size	Product weight	Part no.	Type	
	For size 60, 80	10	1g	534254	SMBK-8
