1) Fibre-reinforced

2) Values are determined using test boards. Values determined using tubing may vary.

+ Limited suitability (on request)

- Not suitable

Method of measurement

Flow-relevant bending radius Rd

The tube is bent in the direction of its own curve until the tubing outer diameter is flattened by 5%. Rd is then calculated mathematically. The flow rate is not reduced until Rd is reached.

Cross section flattened by bending the tube.

d = non-deformed tubing O.D.

d1 = deformed tubing O.D.

Technical data

Plastic tubing PU

Highly flexible fibre-reinforced plastic tubing distinguished by its great resistance to abrasion and to kinks.

General technical data

Туре	PU-9	PU-13
Pneumatic connection	For barbed connector internal diameter 9 mm with nut	For barbed connector internal diameter 13 mm with nut

Operating and environmental conditions

operating and entrementations
