Service unit combinations MSB, MS series

Festo Kernprogramm

Löst 80% Ihrer Automatisierungsaufgaben

Weltweit: Schnell verfügbar, auch langfristig

Gewohnt gut: Immer in Festo Qualität
Schnell zum Ziel: Einfache Auswahl

Das Festo Kernprogramm ist eine Vorauswahl der wichtigsten Funktionen und Produkte – Teil unseres gesamten Produktportfolios. Im Kernprogramm finden Sie das

Im Kernprogramm finden Sie das beste Preis-Leistungs-Verhältnis für Ihre Automatisierung.

Service unit components of the MS series

Solutions for every application

With its large product range, highly effective components and a wide choice of functions, the Festo MS series offers a complete concept for compressed air preparation. It is suitable for simple standard applications as well as for application-specific solutions with very high quality requirements. Available as individual components, pre-assem-

bled combinations ex-stock, application-specific combinations or complete turnkey solutions. The five sizes of the MS series achieve maximum flow rates with minimum space requirements.

Freely combinable functional modules

Pressure regulators, on/off and softstart valves with safety function, filters, pressure and flow sensors, dryers, sensors and lubricators can be assembled into a suitable solution for every task. Thanks to the modular structure the components can be combined as required. The simple connection system saves time because there is no need to disassemble the entire combination when replacing individual modules.

Many of the components are also UL and ATEX certified.

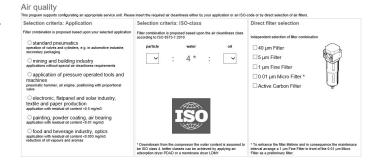

CAD models and configurator

Convenient tools for planning and selecting application-specific individual devices and combinations. The product configurator can be used to configure customised solutions quickly and to transfer the order data without any hassle.

Engineering tools

Selection tool for choosing the right service unit combination without oversizing, and with the right air purity class:

Integrated sensors

Pressure and flow sensors

Safety functions

Soft-start/quick exhaust valves MS6-SV/MS9-SV

Saving energy

Service unit combinations MSE6

Intelligent mix of sizes

- Reliable compressed air preparation and system supply
- Integrated or stand-alone
- Easy to connect with M8/M12 plug

- Fast and reliable exhausting of systems up to Performance Level e, certified to EN ISO 13849-1
- Integrated soft-start function

- Fully automatic monitoring and regulation of compressed air supply
- Compressed air automatically shut off in stand-by mode
- Detection and notification of leakages
- Condition monitoring of relevant process data

- Optimum flow rate with a size that is up to 18% smaller
- Excellent energy efficiency
- Cost-optimised combinations save up to 30%!

| Size differences | | | | | | |
|--|---------|----------|------------------|------------------------|-----------------------------------|------------------------|
| Size | | MS2 | MS4 | MS6 | MS9 | MS12 |

| Connection sizes | | M5, QS-6 | G1/8, G1/4, G3/8 | G1/4, G3/8, G1/2, G3/4 | G1/2, G3/4, G1, G1 1/4, G1 1/2 | G1, G1 1/4, G1 1/2, G2 |
| Standard nominal flow rate qnN ¹⁾ | [l/min] | 350 | 1800 | 6500 | 20000 | 22000 |

¹⁾ Using pressure regulator MS-LR as an example

Note

Information

The next few pages provide a brief overview of the product range for the components of the MS series service units.

You can find detailed information and all the technical data in the documentation for the relevant service unit component.

Accessories such as connecting plates or mounting brackets can be ordered either via the configurator or separately.

Designing a service unit combination

The order of the individual service unit components within a combination is relevant for safety and functionality. The service unit components cannot be combined in any order in the flow direction. They are subject to restrictions and rules.

The configurator for the service unit combination MSB is a reliable and convenient way of combining the individual service unit components and ensures compliance with the applicable rules. As a result, you get a fully assembled unit, including UL or ATEX certification, if necessary.

When combining a unit from individually configured and ordered service unit components, the points on the right must be adhered to under all circumstances.

- Regulators MS-LFR/LR/LRP are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1
- A micro filter MS-LFM must be installed in the flow direction upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1
- A flow sensor SFAM cannot be installed directly downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- A soft-start/quick exhaust valve MS-SV must be the last service unit component in the flow direction

Configurable service unit combinations MSB

Overview

- 3 sizes:
 - MSB4 grid dimension 40 mm, MSB6 – grid dimension 62 mm, MSB9 – grid dimension 90 mm
- Threaded connections in the product housing or with connecting plates
- Type of mounting and flow direction can be optionally selected
- Can be configured in accordance with the ATEX directive for explosive atmospheres
- Food-safe (MSB4/MSB6)

www.festo.com

Configurator

The configurator enables complex service unit combinations to be configured step by step. It is divided into a basic configuration and the individual service unit configurations.

The technical parameters for the entire service unit combination are defined using the key features of the basic configuration. The service unit compon-

ents are defined by both the configuration and the general technical conditions

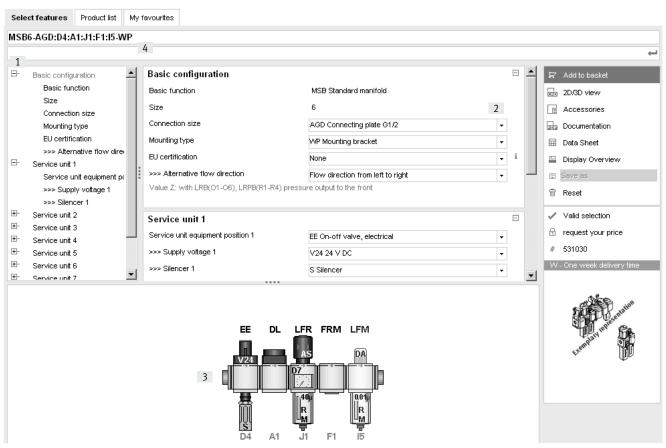

You can navigate through your configuration using the menu [1]. All the key features available for selection can be found in drop-down lists [2]. Missing or incomplete information is indicated by an exclamation mark. Features

shown against a grey background cannot be selected in the chosen configuration → "Conditions and excluded features" table.

If you select a feature shown against a grey background, a red font will indicate that the configuration is incorrect. A dynamic graphic [3] and the order code [4] (\rightarrow type codes) are created in

accordance with your current configuration.

Service unit combination MSB6

Information

General

The adjacent columns and the complete product range of service unit components MS series → page 3 provide a brief overview of the service unit components that are available in a specific size.

The clarification of the short code for a service unit component that is transferred to the order can be found from page 13 for size MSB4/MSB6 and from page 43 for MSB9.

You can find detailed information and all the technical data in the documentation for the relevant service unit component. Enter the short code of the service unit component (e.g. MS6-EE) in the search window of the product catalogue and select the documentation.

- 🖢 - Note

Individual devices with selected key features are available for the configurable service unit combinations

→ Overview lists.

Additional key feature options can be selected via the configurable individual device.

- Flow sensor SFAM-90

Notes on individual service unit components and their key features

MS-LFR and MS-LF:

 Grade of filtration with key feature E (40 μm) or C (5 μm)

MS-LRB/LRPB:

 Pressure output is at the rear, the pressure output is at the front if key feature Z (alternative flow direction) is selected

MS-LFM:

- Grade of filtration with key feature B (1 μm) or A (0.01 μm)
- Filter contamination sensor with key feature DA is a visual differential pressure display with red/green range
- Filter contamination sensor with key feature DP is an electric filter contamination indicator with switching output

MS-EE and MS-DE:

- The supply voltage with key feature 10V24 is permissible only to a max. operating pressure of 10 bar.
- With the supply voltages with key feature V24/V110/V230 the solenoid actuator has a non-detenting/ detenting manual override, with feature 10V24 just a non-detenting manual override

MS-LDM1:

• Flow cartridge with key feature P05, P10 only for MSB4; with key feature P20, P30, P40 only for MSB6

Conditions and exclusions of key features

Note

If a service unit combination is configured with ISO thread, the individual devices also have ISO thread (e.g. the outlets of the branching module MS-FRM), individual devices with integrated MS pressure gauge (e.g. the pressure regulator MS-LR) have a display scale in [bar].

If you configure a service unit combination with NPT thread, the other pneumatic connections have NPT threads and integrated MS pressure gauges with the display unit [psi]. In addition to the conditions and exclusions mentioned here, you can also obtain information by selecting the information button next to some of the selection lists in the configurator.

General rules

- Selection of minimum 2 to maximum 10 service unit components
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1
- A micro filter MS-LFM must be installed in the flow direction upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1
- Mounting bracket for large wall clearance WPB must be selected if the combination includes the softstart/quick exhaust valve MS-SV-E or the block-mountable regulator MS-LRB without angled outlet block
- Regulators MS-LFR/LR/LRP are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration

Rules specific to the service unit component

MS-LFM:

 Only a manual condensate drain can be used with MS4-LFM with plastic bowl

MS-DL:

 No filter MS-LFR/LF/LFM with fully automatic condensate drain downstream of MS4-DL

SFAM:

- Connection size of the service unit combination with SFAM-62 must be at least G1/2, with SFAM-90 at least G3/4
- A SFAM cannot be installed immediately downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- SFAM-90 only in flow direction from left to right

MS-SV-D/E:

• Must be the last service unit component in the flow direction

UL certification

Certified by UL as a component for the market in USA and Canada for a standard environment. Can be selected with code UL1 in the order section "UL certification".

- Operating pressure/pressure regulation range max. 10 bar
- Supply voltage with on/off valve MS-EE or soft-start valve MS-DE max. 24 V DC

ATEX certification

A configured service unit consisting of mechanical service unit components can be used in zones 1 and 2 of explosive gas atmospheres and in zones 21 and 22 of explosive dust atmospheres. The following service unit components are approved and can be selected using the code EX4 in the order section "EU certification":

- Filter regulator MS4/6/9-LFR
- Pressure regulator MS4/6/9-LR
- Pressure regulator for manifold assembly MS4/6-LRB

- Precision pressure regulator MS6-IRP
- Precision pressure regulator for manifold assembly MS6-LRPB
- Filter MS4/6/9-LF
- Fine and micro filter MS4/6/9-LFM
- Activated carbon filter MS4/6/9-LFX
- Water separator MS6/9-LWS
- Lubricator MS4/6-LOE
- On/off valve, manual MS4/6-EM1, MS9-EM
- Soft-start valve, pneumatic MS4/6-DL
- Membrane air dryer MS4/6-LDM1
- Branching module MS4/6/9-FRM

A configured service unit combination consisting of mechanical and electric service unit components can be used in zone 2 of explosive gas atmospheres and in zone 22 of explosive dust atmospheres. In this case, code EX2 must be selected in the order section "EU certification". The following electric service unit components are approved in addition to the mechanical service unit components:

• On/off valve, electric MS4/6/9-EE

- Soft-start valve, electric MS4/6-DE
- Flow sensor SFAM
- Supplied with special accessories, e.g. mounting brackets, module connectors, connecting plates with earthing screws
- Only connecting plates with G thread can be used
- Lubricated operation not permissible
- On/off valve MS-EE or soft-start valve MS-DE only with 24 V supply voltage

| J116 | MS-LFR-D6-E-U-V-A4-AS | Filter regulator, piloted, 40 μm, metal bowl, fully automatic condensate drain, adapter for EN pressure gauge 1/4, can be locked using accessories, 0.3 7 bar |
| J117 | MS-LFR-D6-C-U-M-A4-AS | Filter regulator, piloted, 5 µm, metal bowl, manual condensate drain, adapter for EN pressure gauge 1/4, can be locked using accessories, 0.3 7 bar |
| J118 | MS-LFR-D6-C-U-V-A4-AS | Filter regulator, piloted, 5 μm, metal bowl, fully automatic condensate drain, adapter for EN pressure gauge 1/4, can be locked using accessories, 0.3 7 bar |

|-----------|-------------------------------------|--|
| Code | Туре | Description |
| Filter re | gulator MS-LFR | |
| J122 | MS-LFR-D6-E-U-M-AG-MPA-AS | Filter regulator, piloted, 40 µm, metal bowl, manual condensate drain, integrated pressure gauge with MPa scale, can be locked using accessories, 0.03 0.7 MPa |
| J123 | MS-LFR-D6-E-U-V-AG-MPA-AS | Filter regulator, piloted, 40 µm, metal bowl, fully automatic condensate drain, integrated pressure gauge with MPa scale, can be locked using accessories 0.03 0.7 MPa |
| Δctivate | d carbon filter MS-LFX | |
| L2 | MS-LFX-U | Activated carbon filter with metal bowl |
| | | |
| M2 | or MS-LOE (not with EU EX2/EX4 cer | Lubricator with metal bowl |
| IVIZ | IMI2-FOE-0 | Lubricator with metal bowl |
| Pressure | e regulator MS-LR | |
| N1 | MS-LR-D5-DI-AS | Pressure regulator, lockable, directly controlled, (MS pressure gauge with pressure gauge scale in bar or PSI) 0.3 4 bar |
| N2 | MS-LR-D6-DI-AS | Pressure regulator, lockable, directly controlled, (MS pressure gauge with pressure gauge scale in bar or PSI) 0.3 7 bar |
| N7 | MS-LR-D5-DI-KD-AS | Pressure regulator, lockable, directly controlled, rotary knob underneath (MS pressure gauge with pressure gauge scale in bar or PSI) 0.3 4 bar |
| N8 | MS-LR-D6-DI-KD-AS | Pressure regulator, lockable, directly controlled, rotary knob underneath (MS pressure gauge with pressure gauge scale in bar or PSI) 0.3 7 bar |
| N35 | MS-LR-D5-AS | Pressure regulator, lockable, piloted, (MS pressure gauge with pressure gauge scale in bar or PSI) 0.3 4 bar |
| N36 | MS-LR-D6-AS | Pressure regulator, lockable, piloted, (MS pressure gauge with pressure gauge scale in bar or PSI) 0.3 7 bar |
| N37 | MS-LR-D7-AS | Pressure regulator, lockable, piloted, (MS pressure gauge with pressure gauge scale in bar or PSI) 0.5 12 bar |
| N53 | MS-LR-D5-RG-AS | Pressure regulator, integrated pressure gauge with red/green scale, can be unlocked with accessories 0.3 4 bar |
| N54 | MS-LR-D6-RG-AS | Pressure regulator, integrated pressure gauge with red/green scale, can be locked using accessories 0.3 7 bar |
| N55 | MS-LR-D7-RG-AS | Pressure regulator, integrated pressure gauge with red/green scale, can be locked using accessories 0.5 12 bar |
| N56 | MS-LR-D5-A4-AS | Pressure regulator, adapter for EN pressure gauge 1/4, can be locked using accessories 0.3 4 bar |
| N57 | MS-LR-D6-A4-AS | Pressure regulator, adapter for EN pressure gauge 1/4, can be locked using accessories 0.3 7 bar |
| N58 | MS-LR-D7-A4-AS | Pressure regulator, adapter for EN pressure gauge 1/4, can be locked using accessories 0.5 12 bar |
| N61 | MS-LR-D6-AG-MPA-AS | Pressure regulator, integrated pressure gauge with MPa scale, can be locked using accessories 0.03 0.7 MPa |
| N70 | MS-LR-PE10-VS | Precision pressure regulator, electrically actuated (pilot control using proportional pressure regulator with LED display, 7-segment) 010 V |
| N71 | MS-LR-Pl10-VS | 0.01 1 MPa Precision pressure regulator, electrically actuated (pilot control using proportional pressure regulator with LED display, 7-segment) 420 mA 0.01 1 MPa |

| Overvi | Overview list – Service unit components MS9 | | | |
|---------|---|---|--|--|
| Code | Туре | Description | | |
| Flow se | ensor SFAM (only in flow direction fr | om left to right) | | |
| U9 | SFAM-5000-M-2SA-M12 | Flow sensor, max. 5000 l/min, manifold assembly, 2x PNP or NPN, 1 analogue output 4 20 mA, M12 plug, A-coded | | |
| U10 | SFAM-5000-M-2SV-M12 | Flow sensor, max. 5000 l/min, manifold assembly, 2x PNP or NPN, 1 analogue output 0 10 V, M12 plug, A-coded | | |
| U11 | SFAM-10000-M-2SA-M12 | Flow sensor, max. 10000 l/min, manifold assembly, 2x PNP or NPN, 1 analogue output 4 20 mA, M12 plug, A-coded | | |
| U12 | SFAM-10000-M-2SV-M12 | Flow sensor, max. 10000 l/min, manifold assembly, 2x PNP or NPN, 1 analogue output 0 10 V, M12 plug, A-coded | | |
| U13 | SFAM-15000-M-2SA-M12 | Flow sensor, max. 15000 l/min, manifold assembly, 2x PNP or NPN, 1 analogue output 4 20 mA, M12 plug, A-coded | | |
| U14 | SFAM-15000-M-2SV-M12 | Flow sensor, max. 15000 l/min, manifold assembly, 2x PNP or NPN, 1 analogue output 0 10 V, M12 plug, A-coded | | |
| Soft-st | art/quick exhaust valve MS-SV (not | with EX2/EX4 EU certification) | | |
| V12 | MS-SV-C-V24-S | Soft-start/quick exhaust valve, Performance Level c, category 1, single channel, maximum attainable to EN ISO 13849-1, 24 V DC, with silencer | | |
| V22 | MS-SV-C-V24-S-AD7 | Soft-start/quick exhaust valve, Performance Level c, category 1, single channel, maximum attainable to EN ISO 13849-1, 24 V DC, with silencer, pressure sensor without display, M8 plug, PNP, 3-pin | | |
| V35 | MS-SV-C-10V24P-S | Soft-start/quick exhaust valve, Performance Level c, category 2, single channel with sensing, maximum attainable to ISO 13849-1, electrical 24V DC, M12 to IEC 61076-2-101, 10 bar, with silencer | | |
| V36 | MS-SV-C-10V24P-S-AD7 | Soft-start/quick exhaust valve, Performance Level c, category 2, single channel with sensing, maximum attainable to ISO 13849-1, electrical 24 V DC, M12 to IEC 61076-2-101, 10 bar, silencer, pressure sensor with operational status indicator, M8 plug, threshold value comparator, PNP, N/O contact | | |
| Water | separator MS-LWS | | | |
| W1 | MS-LWS-U-V | Water separator, metal bowl, fully automatic condensate drain | | |
