

## Proportional-pressure regulator VPPM

FESTO

## Characteristics

### At a glance

Innovative:

- Multi-sensor control (cascade control)
- Diagnostics
- Choice of control characteristics
- Temperature-compensated
- High dynamic response
- High repetition accuracy
- Modular system processing
- IO-Link® for direct connection to a higher-order IO-Link®/I-Port master

Flexible:

- Individual valves (inline valve)
- Sub-base valves (manifold/flanged valve)
- Various user interfaces: LED displays, LCD display, setting/selection buttons
- Choice of valves with different pressure ranges
- Pressure range can be modified at the valve
- Choice of different setpoint specifications: current input; voltage input

Operationally safe:

- Integrated pressure sensor with separate output
- Cable break monitoring
- Pressure is maintained if the controller fails

Easy to assemble:

- Manifold block (manifold)
- H-rail mounting
- Individually with mounting bracket
- QS fittings

Layout of a control loop (layout):

- The reference variable w (setpoint value e.g. 5 volts or 8 milliamperes) first acts on a comparator. The measuring equipment sends the value of the controlled variable x (actual value e.g. 3 bar) to the comparator as feedback variable r. The control element detects the control difference e and controls the final control element. The output of the final control element acts on the system. The control element thus attempts to compensate for the difference between the reference variable w and the controlled variable x by using the final control element.

Operating principle:

- This process runs continuously so changes in the reference variable are always detected. However, a system deviation will also occur if the reference variable is constant and the controlled variable changes. This happens when there is a change in the flow rate through the valve, caused by a switching operation, a cylinder movement or a load change. The disturbance variable z also causes a control difference, such as, for example, a pressure drop in the air supply. The disturbance variable z has an unintended effect on the controlled variable x. The controller always tries to re-adjust the controlled variable x to the reference variable w.

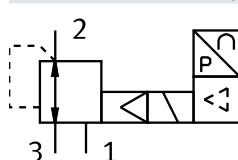

Multi-sensor control (cascade control) of the VPPM:

- Unlike conventional direct-acting control systems, in multi-sensor control several control loops are nested inside one another. The overall controlled system is thus divided into smaller sections that are easier to control for specific tasks.

### Valve function

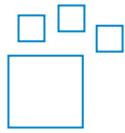

[3]

3-way proportional-pressure regulator, closed

## Characteristics

### Ordering data - modular system

Configurable product

This product and all its product options can be ordered online via the configurator.

### Diagrams

Further information → vppm

The diagrams shown in this document are also available online. These can be used to display precise values.

## Proportional-pressure regulator VPPM

### Type code

<b>001</b>	Series	<b>009</b>	Upper pressure value of control range
<b>VPPM</b>	Proportional pressure regulator, modular	<b>2H</b>	2 bar

## Individual valve VPPM-12L...

Accessories		→ Page/Internet
Type/order code	Description	
[1]	Proportional-pressure regulator with LED or LCD	Operator unit with LED or LCD
[2]	Proportional-pressure regulator with LED, with IO-Link®	Operator unit with LED, IO-Link®
[3]	Push-in fitting	For connecting tubing with standard O.D.
[4]	Connecting cable	—
[5]	Angled plug socket with cable	—
[6]	Plug socket with cable, straight	—
[7]	Retaining screws	—
[8]	Silencer	For mounting in exhaust ports

## Peripherals

Valve manifold assembly with VPPM-6F..., VPPM-8F...

Accessories	Type/order code	Description	→ Page/Internet
[1]	Manifold block VABM	-	43
[2]	Proportional-pressure regulator with LCD	Operator unit with LCD	-
[3]	Proportional-pressure regulator with LED	Operator unit with LED	-
[4]	Proportional-pressure regulator with LED, with IO-Link®	Operator unit with LED, IO-Link®	-
[5]	Connecting cable	-	44
[6]	Angled plug socket with cable	-	44

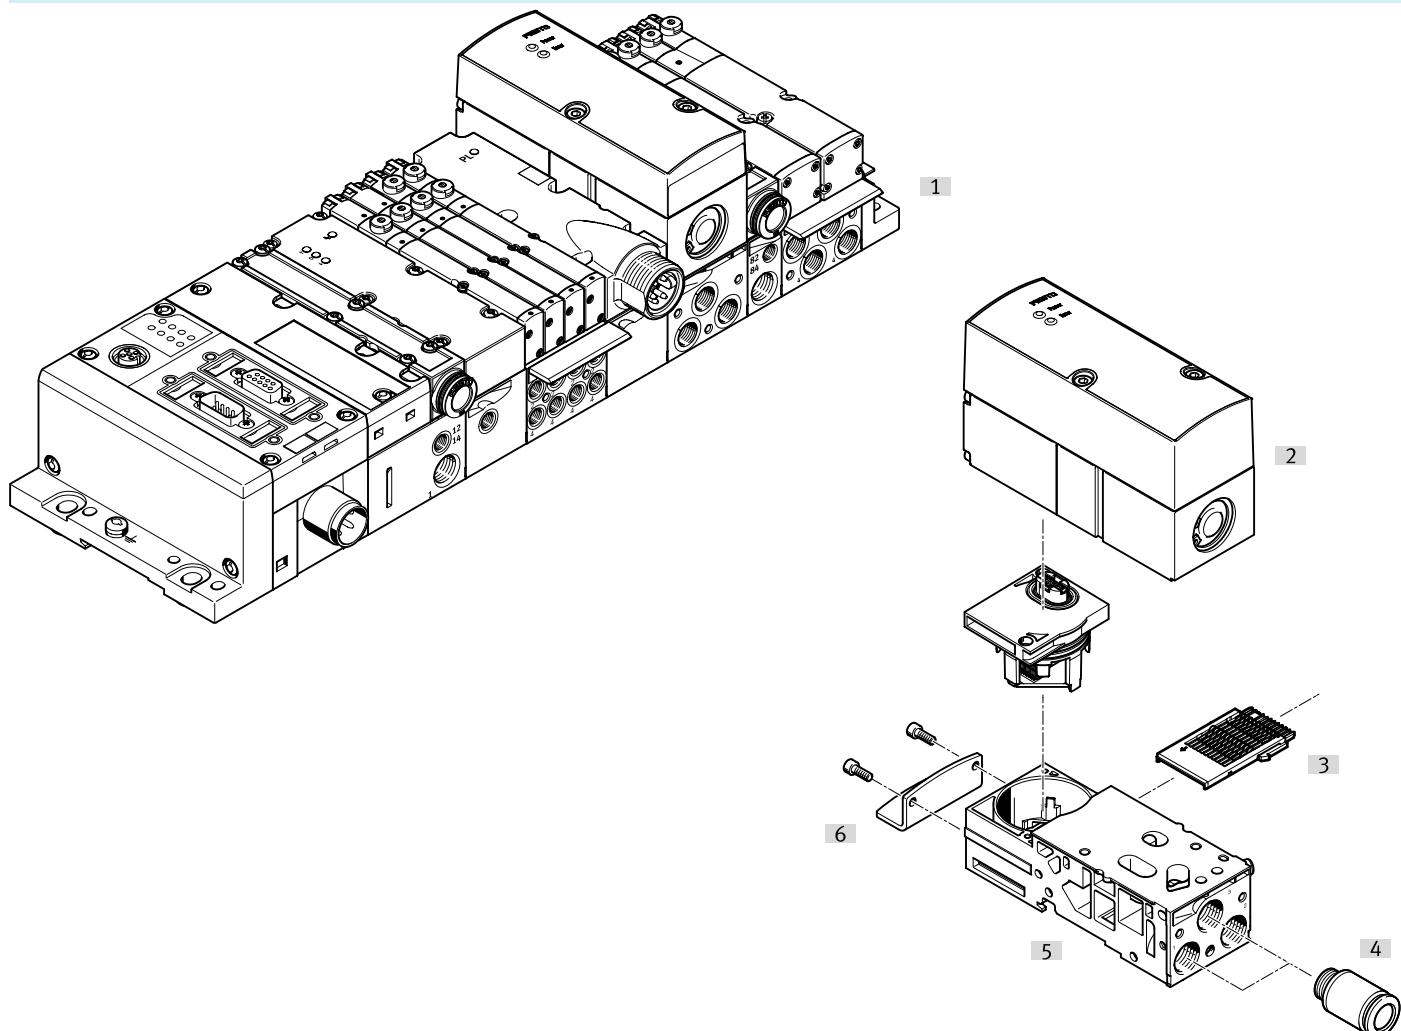

## Peripherals

Accessories		→ Page/Internet
Type/order code	Description	
[7] Plug socket with cable, straight	–	43
[8] Blanking plug	–	b
[9] Push-in fitting	For connecting tubing with standard O.D.	qs
[10] Silencer	For mounting in exhaust ports	u
[11] Cover plate	For vacant position, seal and countersunk screws are included in the scope of delivery	43

## Proportional-pressure regulator VPPM

### Peripherals

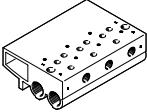

VPPM-6TA..., VPPM-8TA... for valve terminal MPA-S

Accessories	Type/order code	Description	→ Page/Internet
[1]	Valve terminal MPA-S	With fieldbus connection and VPPM	mpas
[2]	Proportional pressure regulator	For valve terminal MPA-S	mpas
[3]	Electrical interlinking module	For the sub-base of the proportional-pressure regulator	mpas
[4]	Push-in fitting	–	qs
[5]	Sub-base	Without electrical linking module or electrical module	mpas
[6]	Mounting	–	mpas

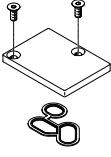

## Accessories

### Manifold block

	Product weight	Corrosion resistance class CRC <sup>1)</sup>	Part no.	Type
	900 g	2 - Moderate corrosion stress	542252	VABM-P1-SF-G14-2-P3
	1,230 g		542253	VABM-P1-SF-G14-3-P3
	1,565 g		542254	VABM-P1-SF-G14-4-P3

1) More information [www.festo.com/x/topic/crc](http://www.festo.com/x/topic/crc)

### Cover plate

	Product weight	Corrosion resistance class CRC <sup>1)</sup>	Part no.	Type
	35 g	1 - Low corrosion stress	558350	VABB-P1

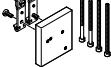

1) More information [www.festo.com/x/topic/crc](http://www.festo.com/x/topic/crc)

### Bracket

	Product weight	Corrosion resistance class CRC <sup>1)</sup>	Part no.	Type
	71 g	1 - Low corrosion stress	542251	VAME-P1-A

1) More information [www.festo.com/x/topic/crc](http://www.festo.com/x/topic/crc)

### H-rail mounting

	Product weight	Corrosion resistance class CRC <sup>1)</sup>	Part no.	Type
	150 g	1 - Low corrosion stress	542255	VAME-P1-T

1) More information [www.festo.com/x/topic/crc](http://www.festo.com/x/topic/crc)
